Canina®
SHOT
IN 5 DELICIOUS FLAVOURS

1, 2, 3... Shake it!

WITH NATURAL INGREDIENTS

It's that easy:

Preparation:
1. Fill the included glass to the fill line with lukewarm water.
2. Add powder according to dosage.
3. **Put the lid on – shake vigorously – done!**

Administer the shot once daily, either neat or mixed with food.
Clean the glass thoroughly after preparation.

Up to 95 shots! For dogs up to 15 kg body weight.
1× per day:

< 15 kg	15 – 30 kg	30 – 50	> 50 kg
½	1	1 ½	2

(1× = 2,5 g)

Note: All shots are supplementary feed.
The shots should be discontinued during pregnancy and lactation.

MOVE SHOT

Canina® *MOVE-SHOT* – More ease. More joy of movement.

Movement is fun – especially when it feels good.

MOVE-SHOT helps your dog stay active, supple and full of joy in everyday life – no matter what ends up in their bowl. Selected natural ingredients support mobility and well-being.

Developed in collaboration with vets and so easy that dogs simply love to take it. From curious puppies to relaxed seniors: ***MOVE-SHOT*** is always suitable when movement is part of everyday life.

Powder in water. Shake briefly. Shot ready. Active with joy.

Retail sizes:

Art.-No. 170050
120 g Box
with shot glass

4 027565 170050

Composition: Mollusc meal (from green-lipped mussels Perna canaliculus), collagen (from pigs, denatured), chicken liver hydrolysate (spray-dried), inulin (from chicory), rose hips (ground), methylsulphonylmethane (MSM), ginger root (ground), chondroitin sulphate (from fish)

Analytical constituents: Moisture 12.0 %, crude protein 45.4 %, crude fibre 3.5 %, crude fat 7.2 %, crude ash 6.3 %, sodium 1.28 %, calcium 0.36 %, phosphorus 0.58 %

Additives per kg: Technological additives: Lecithins (1c322) 50 g

DETOX SHOT

Canina® *DETOX-SHOT* – Naturally balanced.

Sometimes the body just needs a little help.

DETOX-SHOT helps your dog maintain its inner balance – no matter what food ends up in its bowl. Selected plant-based ingredients support natural metabolic processes and contribute to general well-being.

Developed in collaboration with vets and so easy that dogs simply love taking it. From curious puppies to relaxed seniors: ***DETOX-SHOT*** is always a good choice when the body needs a little support.

Powder in water. Shake briefly. Shot ready. Balance on.

Composition: Inactivated brewer's yeast (Saccharomyces cerevisiae), coconut cake (ground), chicken liver hydrolysate (spray-dried), sunflower seed press cake, inulin (from chicory), nettle leaves (ground), milk thistle seeds (ground), dandelion herb with root (ground), goldenrod (Solidago virgaurea, ground)

Analytical constituents: Moisture 6.1 %, crude protein 29.7 %, crude fibre 5.4 %, crude fat 13.5 %, crude ash 6.6 %, sodium 0.09 %, calcium 0.38 %, phosphorus 0.88 %

Additives per kg: Technological additives: Lecithins (1c322) 50 g, bentonite (1m558i) 10 g

POWER SHOT

Canina® *POWER-SHOT* – Energy to get started!

Does your dog love action? Then ***POWER-SHOT*** is just the thing for him.

This little shot with selected natural ingredients gives your four-legged friend an extra boost of energy, stamina and good mood – no matter what ends up in his bowl.

Developed in collaboration with veterinarians and so easy that dogs simply love it. From clumsy puppies to relaxed seniors: ***POWER-SHOT*** is always the right choice when the day calls for more exercise.

Powder in water. Shake briefly. Shot ready. Let's go!

Composition: Inactivated brewer's yeast (Saccharomyces cerevisiae), chicken liver hydrolysate (spray-dried), beef fat powder (72 % beef fat, 27.9 % beef broth (both cooked and spray-dried), algae powder (Schizochytrium), sunflower seed press cake, blueberries (ground), inulin (from chicory), red ginseng root (ground)

Analytical constituents: Moisture 5.7 %, crude protein 35.2 %, crude fibre 1.5 %, crude fat 22.6 %, crude ash 5.0 %, sodium 0.45 %, calcium 0.13 %, phosphorus 0.91 %

Additives per kg: Technological additives: Lecithins (1c322) 50 g
Nutritional additives: Taurine (3a370) 10 g

RELAX SHOT

Art.-No. 170067
120 g Box
with shot glass

4 027565 170067

Canina® *SENIOR-SHOT* – Clear head. New energy.

Experience counts. And a little support does too.

SENIOR-SHOT helps your dog in its prime to stay alert and enjoy everyday life with focus and energy – no matter what food ends up in its bowl. Selected natural ingredients support concentration and well-being.

Developed in collaboration with vets and so easy that dogs simply love to take it. For all those who are in the prime of life – and want to stay there.

Powder in water. Shake briefly. Shot ready. Focused throughout the day.

Composition: Whey protein powder, inulin (from chicory), apple pomace (dried), coconut cake (ground), sunflower seed press cake, blueberries (ground), beetroot (ground), ginkgo leaves (ground)

Analytical constituents: Moisture 5.7 %, crude protein 23.8 %, crude fibre 5.0 %, crude fat 9.6 %, crude ash 2.9 %, sodium 0.15 %, calcium 0.18 %, phosphorus 0.43 %

Additives per kg: Technological additives: Lecithins (1c322) 50 g
Nutritional additives: L-carnitine L-tartrate (3a911) 73.529 g

BACH FLOWER THERAPY FOR PETS

Retail sizes:

4 027565 700011 Art.-No. 700011
10 g

PETVITAL® BACH FLOWERS MIX NO. 1
According to the teaching of Dr. Edward Bach, this mix can have a positive influence in the case of emotionally stressful situations, such as in an emergency.*

Composition: Sucrose, products from the processing of plants: Star of Bethlehem, rock rose, impatiens, cherry plum, clematis. Cooked, liquefied and filtered.

Ingredients: Crude protein < 0.5 %, crude fibre < 0.3 %, crude fat < 1.0 %, crude ash < 0.5 %

Recommendation for use per animal and day: Administer the globules directly, dissolved in drinking water or mixed with the feed.

Dogs/cats: 2 globules per 5 kg body weight, 2 - 3 times a day.
Rodents/birds: 1 - 3 globules, 2 - 3 times a day.
Horses: 10 globules, 2 - 3 times a day.

*__Note__: This effect is not proven by conventional medicine.

Retail sizes:

4 027565 700028 Art.-No. 700028
10 g

PETVITAL® BACH FLOWERS MIX NO. 2
According to Dr. Edward Bach's teachings, this blend can have a positive effect on anxiety, insecurity and self-doubt.*

Composition: Sucrose, products from the processing of plants: Aspen, cerato, rock rose, mimulus. Cooked, liquefied and filtered.

Ingredients: Crude protein < 0.5 %, crude fibre < 0.3 %, crude fat < 1.0 %, crude ash < 0.5 %

Recommendation for use per animal and day: Administer the globules directly, dissolved in drinking water or mixed with the feed.

Dogs/cats: 2 globules per 5 kg body weight, 2 - 3 times a day.
Rodents/birds: 1 - 3 globules, 2 - 3 times a day.
Horses: 10 globules, 2 - 3 times a day.

*__Note__: This effect is not proven by conventional medicine.

PETVITAL® BACH FLOWERS MIX NO. 3

According to Dr. Edward Bach's teachings, this blend can have a positive effect on aggressive behaviour, irritability and intolerance.*

Composition: Sucrose, products from the processing of plants: Holly, beech, impatiens, water violet. Cooked, liquefied and filtered.

Ingredients: Crude protein < 0.5 %, crude fibre < 0.3 %, crude fat < 1.0 %, crude ash < 0.5 %

Recommendation for use per animal and day: Administer the globules directly, dissolved in drinking water or mixed with the feed.

Dogs/cats: 2 globules per 5 kg body weight, 2 - 3 times a day.
Rodents/birds: 1 - 3 globules, 2 - 3 times a day.
Horses: 10 globules, 2 - 3 times a day.

*__Note__: This effect is not proven by conventional medicine.

Canina®

PRODUCTS FOR

DOGS

BIOTIN FORTE POWDER & TABLETS

POWDER:
Feed material
Biotin for:
- A shiny, strong coat
- Optimal pigmentation of the coat, nose and paw pads
- Firm, strong claws

Canina® ***BIOTIN FORTE Powder*** is characterised by its balanced formulation. It is suitable for all coat types.

The powder can be given daily:
- To support skin and coat health
- Twice a year during the moulting season
- For pregnant and lactating bitches

TABLETS:
Complementary feed
Canina® ***BIOTIN FORTE TABLETS*** are characterised by a balanced formulation. They are suitable for all coat types.

Due to the high content of biotin, **Canina®** ***BIOTIN FORTE TABLETS*** are particularly suitable for supporting the coat quality of the pregnant or lactating dog.

Give your bitch a **Canina®** ***BIOTIN FORTE TABLETS*** daily from 14 days before whelping until the puppies are weaned. After weaning, your bitch will shed very little and, in most cases, will still be in show condition.

Composition:
Powder: Inactivated brewer's yeast (Saccharomyces cerevisiae)
Tablets: Inactivated brewer's yeast (Saccharomyces cerevisiae), potato starch, magnesium stearate

Ingredients:
Powder: Crude protein 42.2%, crude fibre 0.3%, crude fat 2.3%, crude ash 7.9%, moisture content 4.9%
Tablets: Moisture 4.5%, crude protein 39.1%, crude fibre 0%, crude fat 2.4%, crude ash 13.7%

Additives per kg:
Nutritional additives:
Powder: 400,000 µg biotin (3a880)
Tablets: 1,500,000 µg Biotin (3a880)

Feeding recommendation per animal and day:
Powder: 1 tablespoon per 10 kg body weight, max. 4 tablespoons (1 tablespoon = approx. 4 g)
If required, double the dose for a period of approx. 6 weeks.

Tablets: 1 tablet per 10 kg body weight, max. 5 tablets.
Adhere to the indicated dose for 8 weeks. Then half the dose is sufficient.

Retail sizes Powder:

COAT O.K. TABLETS

Complementary feed
Canina® ***COAT O.K.*** for all breeds and all ages for every day to prevent a feed-related biotin deficiency.

Especially during the first years of life, the young dog needs optimal care so that it develops properly. Older dogs also benefit from the vital substances in **Canina®** ***COAT O.K.*** and it promotes their well-being.

The dog receives biotin – even if only in small quantities – mainly through the feed. However, the amount of biotin produced by the intestinal flora is usually not sufficient for the need.

Biotin for:
- A shiny, strong coat
- Healthy, dandruff-free skin
- Optimal pigmentation of the coat, nose and paw pads
- Firm, strong claws

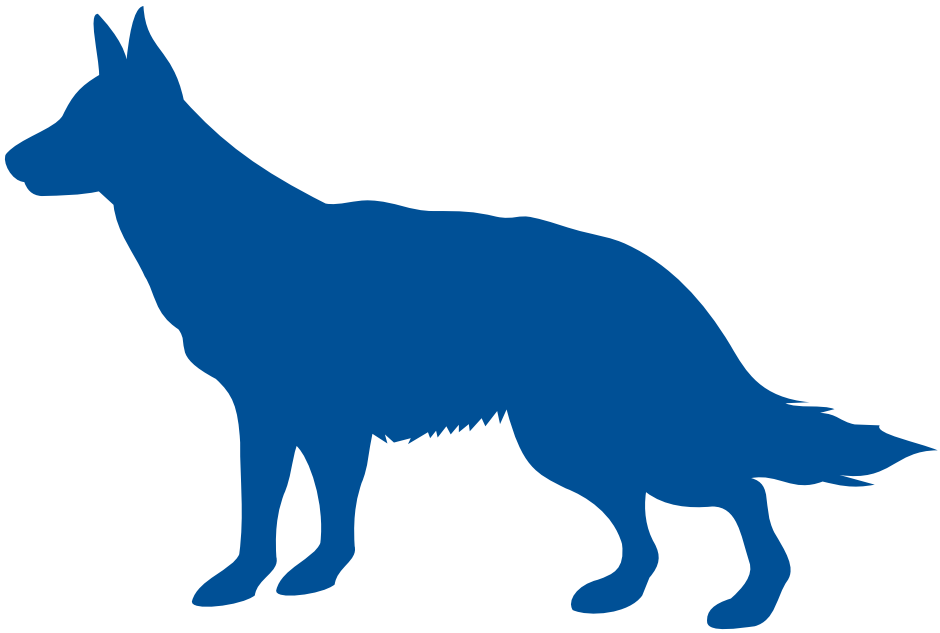

In the case of problems and when moulting as well as for long-haired dogs, we recommend **Canina®** ***BIOTIN FORTE***.

Composition:
Whey, rice flour, dextrose, potato starch, powdered cellulose, magnesium stearate, rapeseed oil, monoand diglycerides of fatty acids

Ingredients:
Crude protein 2.4%, crude fibre 2.2%, crude fat 2.4%, crude ash 7.7%

Additives per kg:
Nutritional additives:
Biotin (3a880) 100.000 µg

Feeding recommendation per animal and day:
1 tablet per 10 kg body weight, maximum 5 tablets

PETVITAL® BIOTIN-TABS

Retail sizes Tablets:

Art.-No. 702008
100 g
(approx. 50 tablets)

4 027565 702008

Complementary feed
PETVITAL® BIOTIN-TABS contain high-dose vitamin H (biotin), which has a specific effect on hair growth and hair pigments. Biotin is involved in the keratin synthesis as a coenzyme for hair growth and and claw substance. A nutritional deficiency of biotin can be manifested by increased hair loss and dry, brittle hair. The claws can become soft and brittle.
Biotin:
- For shiny, dense hair
- For strong pigments
- For firm, strong claws

How it works: ***PETVITAL® BIOTIN-TABS*** contain high-dose vitamin H (biotion), which has a specific effect on hair growth and hair pigments. Vitamin B_2 and nicotinic acid are important active ingredients for the function and pigmentation of the skin and hair.

Composition: Dextrose, whey, potato starch, rice flour, powder cellulose, magnesium stearate, Rapeseed oil, Mono- and diglycerides of edible fatty acids

Ingredients: Crude protein 45.0%, crude fibre 0.0%, crude fat 3.7%, crude ash 14.9%

Additives per kg: | Nutritional additives: Biotin 1,100,000 µg, vitamin B_2 350 mg, nicotinic acid 1,750 mg, choline chloride 8,060 mg

Feeding recommendation per animal and day:
1 tablet per 10 kg body weight, max. 5 tablets
Administer the tablets directly with the feed for 8 weeks or as a treat.

DOG COAT GEL

Retail sizes:

Art.-No. 130900
100 ml

4 027565 130900

Complementary feed
Biotin + zink: for a shiny coat, healthy, supple skin, optimal pigmentation and firm claws.

Canina® ***DOG COAT GEL*** has been specially developed for puppies, small dogs and dogs with sensitive palates. Biotin and zinc are required for the formation of hair structure, whilst keratin acts as a coenzyme in the dog's metabolism.

Composition: Glucose, sucrose, glycerine

Ingredients: Moisture 70%, crude protein < 0.0%, crude fibre 0.5%, crude fat 0.2%, crude ash 0.8%

Additives per l:
Technological additives: sorbic acid (potassium sorbate 1k202) 2.000 mg, Citric acid (1a330) 3.571 mg
Sensory additives: Yellow Orange S (2a110) 18 mg
Nutritional additives: Biotin (3a880) 333 mg, Zinc as zinc oxide (3b603) 500 mg

Feeding recommendation per animal and day:
For 8 weeks: 1 teaspoon (= 3 ml) for 5 kg body weight, with the feed or directly into the mouth. The indicated feeding recommendation must not be exceeded. Shake before use

YEAST POWDER & TABLETS

POWDER: Feed material; TABLETS: Complementary feed;
YEAST is an appetite-stimulating dietary supplement that your dog will enjoy. As a purely natural product, yeast contains many important nutrients. These act as catalysts in all tissues, play a role in carbohydrate and protein metabolism, and promote cell division. This support for metabolism improves your dog's vitality and mental resilience and can have a positive effect on the growth of hair and claws. The natural nutrients in ***YEAST*** can boost your dog's energy levels by stimulating energy production at a cellular level and supporting the immune system.

Whether to correct a nutritional imbalance caused by diet or to provide support during periods of high energy expenditure (puppy rearing, physical and mental training), ***YEAST*** is an ideal addition to your dog's daily diet, whatever you feed them!

Composition:

Powder: Inactivated brewer's yeast (Saccharomyces cerevisiae)
Tablets: Inactivated brewer's yeast (Saccharomyces cerevisiae), calcium carbonate, maltodextrin

Ingredients:

Powder: Crude protein 44.0%, crude fibre 0%, crude fat 3.3%, crude ash 7.3%, Methionine 0.6%, Lysine 2.5%, Cystine 0.6%, Threonine 2.0%, Tryptophan 0.6%, Vitamin B_1 60 mg/kg, Vitamin B_2 22 mg/kg, Vitamin B_6 25 mg/kg, Vitamin B_{12} 70 µg/kg, Biotin 750 µg/kg
Tablets: Moisture 7.4%, crude protein 38.9%, crude fibre 0%, crude fat 2.0%, crude ash 11.6%

Feeding recommendation per animal and day:

Powder: 1 teaspoon per 10 kg of body weight, max. 4 teaspoons (1 teaspoon = approx. 5 g)
Tablets: 1 tablet per 5 kg of body weight, max. 14 tablets
During pregnancy and lactation, the recommended dose may be doubled.

ORGANIC SEAWEED MEAL & SEAWEED TABLETS

MEAL: Feed material;
Canina® ORGANIC *SEAWEED MEAL* is made from fresh seaweed (Ascophyllum nodosum – from certified organic cultivation). Due to its high content of naturally occurring minerals, amino acids and trace elements, this high-quality natural product balances out an unbalanced diet and thanks to its iodine, zinc and carotenoid content, supports skin metabolism and the pigmentation of the coat, nose and paw pads.

The amino acid lysine in **Canina® ORGANIC *SEAWEED MEAL*** optimises feed conversion; cellulose and mannitol aid digestion. The immune system is strengthened by the high vitamin content (e.g. vitamin C), whilst fitness, performance and well-being are promoted.

Natural health – sourced from the sea!

Composition: 100% organic seaweed meal (Ascophyllum nodosum) from certified organic cultivation

Ingredients: Moisture 11.0%, crude protein 4.07%, crude fibre 5.3%, crude fat 3.13%, crude ash 25.6%, average iodine content 500 mg/kg

Feeding recommendation per animal and day:
½ teaspoon per 10 kg body weight, max. 3 teaspoons
(1 teaspoon = approx. 7 g)
To meet iodine requirements for B.A.R.F. / home-prepared meals:
Adult dogs: 0.03 g per kg body weight
Growing dogs, lactating bitches, dogs with increased muscle activity: 0.05 g per kg body weight

Iodine requirements can vary depending on the region, the individual animal, the breed, the gender and the animal's activity level.

TABLETS: Feed material
Canina® *SEAWEED TABLETS*, made from fresh seaweed (Ascophyllum nodosum), are high-quality natural products.

The naturally occurring minerals, amino acids and trace elements support the skin's metabolism and the pigmentation of the coat, nose and paws.

The natural ingredients in **Canina® *SEAWEED TABLETS*** support feed conversion and digestion. They help boost the immune system, overall condition, and performance.

Natural health – sourced from the sea!

Composition: Seaweed meal (Ascophyllum nodosum)

Ingredients: Moisture 10.9%, crude protein 5.1%, crude fibre 17.0%, crude fat 2.2%, crude ash 17.3%, sodium 2.37%, calcium 1.01%, phosphorus 0.09%

PETVITAL® DERM-CAPS & DERM-LIQUID

Complementary feed
The combination of evening primrose oil and salmon oil provides your pet with essential fatty acids that can help maintain a balanced skin metabolism.

The added vitamins A and E have a positive effect on the skin's barrier function and promote skin hydration and elasticity. Biotin, as a coenzyme in keratin synthesis, supports your pet's coat quality.

Zinc can help regulate the skin's sebum production and aids in protecting against harmful external influences.

So your dog can feel comfortable in its own skin again! Developed with vets.

Composition:
Caps: Evening primrose oil, salmon oil, beeswax
Liquid: Evening primrose oil, salmon oil

Ingredients:
Caps: Moisture 0.96%, crude protein 25.9%, crude fibre 0.3%, crude fat 62.7%, crude ash 0.50%, sodium 0.03%, calcium 0.01%, phosphorus 0.01%
Liquid: Moisture 0%, crude protein 0%, crude fibre 0%, crude fat 100%, crude ash 0%

Relative fatty acid composition as a % of total fatty acids:
Caps: Linoleic acid 49.0%, gamma-linolenic acid 7.3%, omega-3 fatty acids 4.7%, total polyunsaturated fatty acids 61.4%
Liquid: Linoleic acid 50.4%, gamma-linolenic acid 7.6%, omega-3 fatty acids 4.6%, total polyunsaturated fatty acids 62.9%

Additives per kg / l:
Nutritional additives:
Caps: Vitamin E (3a700) 2,300 mg, zinc as zinc bisglycinate (3b607) 1,000 mg, vitamin A (3a672a) 75 mg, biotin (3a880i) 150 µg
Technological additives: lecithins 9.46 g
Liquid: Vitamin E (3a700) 2,300 mg, zinc as zinc bisglycinate (3b607) 1,000 mg, vitamin A (3a672a) 75 mg, biotin (3a880i) 150 µg

Feeding recommendation per animal and day:

Caps:	up to 10 kg body weight	1 capsule
	10 kg – 30 kg body weight	2 capsules
	30 kg – 50 kg body weight	3 capsules
	> 50 kg body weight	4 capsules
Liquid:	up to 10 kg body weight	15 drops
	10 kg – 30 kg body weight	30 drops
	30 kg – 50 kg body weight	45 drops
	over 50 kg body weight	60 drops

15 drops are equivalent to approx. 0.3 ml

Please note: Cut off the tip of the dropper before using it for the first time.

ALGEA LIME

Feed material
The seaweed Lithothamnium calcareum (red algae) is a natural source of calcium, magnesium and other minerals. Calcium is essential for healthy bone metabolism and strong teeth; together with magnesium, it supports muscle function and nerve health. This seaweed is also characterised by the high bioavailability of its calcium within the body.

Canina® *ALGAE LIME* is an alternative to other calcium sources such as meat and bone meal or eggshell powder, particularly for dogs that have intolerances to animal-based calcium sources. **Canina® *ALGAE LIME*** is equally suitable for puppies, young dogs, adult dogs, senior dogs and pregnant/lactating bitches. As a natural source of calcium to optimise the nutritional requirements of home-prepared cooked or raw meals (B.A.R.F.), **Canina® *ALGAE LIME*** is a valuable supplement, as the algae have a low phosphorus content, thereby providing a balanced calcium-to-phosphorus ratio in meat-based meals that are naturally high in phosphorus (adult animals: calcium to phosphorus ratio 1.2 to 1).

Composition: 100% calcareous algae (Lithothamnium calcareum)

Ingredients: Crude protein 0.5%, crude fibre 1%, crude fat 0.5%, crude ash 93.5%

Minerals: Calcium 34%, phosphorus 0.04%, sodium 0.73%, magnesium 2.34%, potassium 0.04%, iodine 20 mg/kg

Additives per kg: None

Guideline doses for an optimal calcium intake: (Depending on age, size, physical condition, pregnancy, lactation and feeding regime; BW = body weight)

Puppies aged 2 to 4 months:	1.6 g/kg BW
Young dogs aged 5 to 6 months:	1.0 g/kg BW
Young dogs aged 7 to 12 months:	0.6 g/kg BW
Adult dogs from 12 months of age:	0.3 g/kg BW
Pregnant bitches from the 6th week of pregnancy, lactating bitches (depending on the number of puppies):	0.6 g to 0.8 g/kg BW

Retail sizes:

VELOX JOINT ENERGY

Feed material
100% green-lipped mussel meat meal
Not defatted – with natural omega fatty acids

The concentrated power of the New Zealand green-lipped mussel (Perna canaliculus) for your four-legged friend's musculoskeletal system and performance!

Canina® ***VELOX JOINT ENERGY*** provides the musculoskeletal system with high-quality glycosaminoglycans (GAGs) derived from New Zealands green-lipped mussels. GAGs, such as chondroitin sulphate, heparan sulphate and hyaluronic acid, support connective tissue structures such as tendons, ligaments, joint cartilage and intervertebral discs. Your pet's performance is improved and their well-being is promoted.

The naturally occurring omega fatty acids make a valuable contribution to overall metabolism in general and to joint metabolism in particular. They support the physiological function of the joint cartilage by enhancing its buffering capacity.

Puppies:	For optimal development of tendons, ligaments and joints
Mother dogs:	To support connective tissue during pregnancy
Older dogs:	To optimise well-being and quality of life
Performance:	To improve stamina and willingness to perform

Composition: 100% green-lipped mussel meat meal (Perna canaliculus)

Ingredients: Moisture 3.4%, crude protein 57.5%, crude ash 10.75%, crude fat 9.9%, omega-3 fatty acids 3.2%, glycosaminoglycans (GAG) 3.1%

Additives per kg: None

Feeding recommendation per animal and day:
For 4 weeks or on a long-term basis, as required.

Mix ½ teaspoon per 10 kg of body weight into the feed, up to a maximum of 2 teaspoons.

(1 teaspoon = approx. 3 g)

Stir the powder into warm water. Do not exceed the recommended feeding amount.

CALCINA MEAT BONE MEAL

Feed material
The calcium and phosphorus in **Canina®** ***CALCINA MEAT BONE MEAL*** support the development and maintenance of teeth, the skeleton and bone structure. Particularly suitable for pregnant and lactating bitches.

In addition to being highly palatable, **Canina®** ***CALCINA MEAT BONE MEAL*** has a positive effect on the animal's digestion.

This feed material consists of protein-containing products derived from mammalian tissue which must not be fed to ruminants.

Composition: 100% processed animal protein (from pork – of German origin)

Ingredients: Moisture 5%, crude protein 50.3%, crude fat 12.6%, crude ash 27.4%, calcium 12.2%, phosphorus 5.9%

Feeding recommendation per animal and day:
Canina® ***CALCINA MEAT BONE MEAL*** is added to home-prepared meals (B.A.R.F., home-cooked food) or plain tinned meat to ensure an optimal calcium intake. The powder is stirred into a little warm water in the dog's bowl and then mixed with the food.

Adult dogs:	6 g per 10 kg BW, max. 48 g
Pregnant bitches:	
From the 30th day of pregnancy:	12 g per 10 kg BW
Lactating bitches:	
1–4 puppies:	12 g per 10 kg BW
5–6 puppies:	24 g per 10 kg BW
> 7 puppies:	30 g per 10 kg BW

(1 teaspoon = approx. 7 g / BW = body weight)

For puppies and young dogs, we recommend **Canina®** ***BARFER'S BEST JUNIOR*** or **Canina®** ***PUPPY LIME*** in combination with **Canina®** ***V25 VITAMIN TABLETS*** or **Canina®** ***CANIVITA***.

For an accurate calculation of the daily ration for puppies and young dogs, we recommend seeking advice from a vet or a nutritionist.

CANHYDROX GAG

Complementary feed
Canina® ***CANHYDROX GAG*** has been specially developed for large and heavy dogs and provides high-quality support for connective tissue, joints, bones, tendons, ligaments, cartilage and teeth; it is particularly suitable for puppies, ageing dogs and working dogs. Tricalcium phosphate is a substance that makes up over 50% of bone and over 90% of teeth. It can support callus formation and the elastic strength of bone and has a positive effect on tooth enamel. It therefore provides optimal support for large dogs during their growth phase. Green-lipped mussel meat meal (from the green-lipped mussel Perna canaliculus) can improve joint cushioning capacity by supplying joint-active substances such as glycosaminoglycans (3%) and omega-3 fatty acids (3%). Vitamin C strengthens connective tissue and supports the gums. Vitamin E and selenium act as antioxidants to protect cells. Methionine, as a sulphur-donating amino acid, has a positive effect on joint metabolism.

Composition: 30% tricalcium phosphate (hydroxyapatite), inactivated brewer's yeast (Saccharomyces cerevisiae), maltodextrin, 10% mollusc meal (from the green-lipped mussel Perna canaliculus), seaweed meal (Ascophyllum nodosum), magnesium oxide, magnesium stearate, powdered cellulose

Ingredients: Moisture 5.5%, crude protein 20.0%, crude fibre 1.1%, crude fat 4.4%, crude ash 35.2%, calcium 8.6%, phosphorus 3.7%

Additives per kg: | Nutritional additives:
Vitamin C (3a300) 115,291 mg, Vitamin E (3a700) 11,000 mg, selenium as sodium selenite (3b801) 5 mg, DL-methionine (3c301) 11,000 mg

Feeding recommendation per animal and day:
Puppies from 8 weeks of age; young dogs: 2 tablets per 10 kg BW up to 15 months of age; **if higher doses are required**: 4 tablets per 10 kg BW (max. 12 tablets) for 3 months, thereafter 2 tablets per 10 kg BW.

Older dogs, senior dogs: 4 tablets per 10 kg BW (max. 12 tablets).

Performance dogs: 2 tablets per 10 kg BW (max. 12 tablets) during the performance phase; **for increased requirements:** 4 tablets per 10 kg BW (max. 12 tablets) over a period of 3 months.

BW = body weight

Do not exceed the recommended feeding amount. Always ensure there is plenty of fresh drinking water available.

FLEXAN

Complementary feed
Canina® *FLEXAN* naturally supports your dog's musculoskeletal system. Flexible joints, strong bones, mobility and fitness – bioactive collagen peptides are essential building blocks of the body. Collagen is the main structural protein of connective tissue. The targeted supply of collagen has been shown to activate cartilage-forming cells. In addition, bone-forming cells are stimulated and the stability, flexibility, substance and density of bone tissue are improved. The bioactive collagen in **Canina® *FLEXAN*** is produced from natural raw materials of animal origin. The collagen peptides are characterised by excellent bioavailability and are absorbed by the body with almost no loss.

Green-lipped mussel meat meal, derived from the New Zealands green-lipped mussel (Perna canaliculus), provides valuable building blocks (glycosaminoglycans) for joint cartilage and strengthens the entire connective tissue. The bioactive collagen peptides and the green-lipped mussel meat meal work together synergistically to optimise the effect on the entire musculoskeletal system.

Canina® *FLEXAN* is the perfect addition to a wide variety of feeding regimes. It is suitable for dogs of all ages and in all circumstances:

Older dogs: increased activity, greater mobility and flexibility, improved well-being

Active dogs: optimal function and strength of joints and bones, improved performance

Puppies and young dogs: improved nourishment of joint cartilage and bones, thereby optimising growth

The efficacy of bioactive collagen peptides has been scientifically proven in several clinical trials.

Composition: 90% collagen (100% pork), 10% green-lipped mussel meat meal (Perna canaliculus)

Ingredients: Crude protein 94.2%, crude fibre 0%, crude fat 0.8%, crude ash 2.8%

Feeding recommendation per animal and day:
Canina® *FLEXAN* is mixed into the daily food. It can be given to dogs of all ages, from puppies to senior dogs. For 6 weeks or on a long-term basis. Dry food must be moistened.

2 g per 10 kg of body weight, up to a maximum of 15 g.

PETVITAL® GAG POWDER & TABLETS

Complementary feed
PETVITAL® GAG provides the musculoskeletal system with high-quality glycosaminoglycans (GAGs).

Thanks to its high glycosaminoglycan content, it supports connective tissue structures such as tendons, ligaments, joint cartilage and intervertebral discs.

PETVITAL® GAG contains many natural substances that are essential for the function, performance and resilience of the musculoskeletal system:

- Amino acids and seaweed meal serve as readily available sources of sulphur
- Green-lipped mussel meat meal supplies the connective tissue and joint cartilage with glycosaminoglycans, chondroitin-4 and 6-sulphate, heparin and heparan sulphate, as well as omega-3 fatty acids
- Vitamin E and selenium act as cell-protective factors, primarily helping to break down cell-damaging metabolic by-products

Composition:

Powder: Fish meal, inactivated brewer's yeast (Saccharomyces cerevisiae), 19% seaweed meal (Ascophyllum nodosum), 15% mollusc meal (from the green-lipped mussel Perna canaliculus), calcium carbonate powder

Tablets: 30% green-lipped mussel meat meal (Perna canaliculus), calcium carbonate, inactivated brewer's yeast (Saccharomyces cerevisiae), 13% seaweed meal (Ascophyllum nodosum), fish meal, potato starch, powdered cellulose, magnesium stearate, rapeseed oil, mono- and diglycerides of fatty acids

Ingredients:

Powder: Moisture 6.0%, crude protein 37.6%, crude fibre 0.9%, crude fat 5.9%, crude ash 22.7%

Tablets: Moisture 6.0%, crude protein 35.8%, crude fibre 0.8%, crude fat 5.9%, crude ash 29.9%, calcium 8.39%, phosphorus 0.78%

Additives per kg: | Nutritional additives:

Powder: DL-methionine, technically pure (3c301) 10,000 mg, vitamin E (3a700) 10,000 mg, sodium selenite (3b801) 10 mg

Tablets: Vitamin E (3a700) 10,000 mg, selenium (3b801) 10 mg, DL-methionine (3c301) 10,000 mg

Feeding recommendation per animal and day:

Powder: 1 teaspoon per 10 kg of body weight, max. 4 teaspoons (1 teaspoon = approx. 3.5 g)

Tablets: 1 tablet per 10 kg of body weight, max. 5 tablets

Do not exceed the recommended feeding amount.

PETVITAL® ARTHRO-TABLETS

Complementary feed
PETVITAL® ARTHRO-TABLETS contain vitamins, minerals and dried plants. These ingredients have a beneficial effect on bone metabolism, strengthening weak joints and restoring their resilience. Ageing processes are slowed down by supporting the natural ion balance of bone tissue, whilst the elasticity of bones and tendons is increased. The plant powder contained in ***PETVITAL® ARTHRO-TABLETS*** supports the natural function of bones and joints.

Willow bark & ginger:	Used to support bones, joints and connective tissue.
Vitamin E:	Acts as an antioxidant to neutralise free radicals and functions as a vitamin that protects cells.
Vitamin B_1:	It is essential for the transmission of nerve impulses.
Iron:	Important for blood formation, oxygen transport and muscle activity.
Copper:	It plays a role in blood formation, the production of hair pigments and cartilage formation.
Zinc:	Supports cell growth and cell division.

Composition: Maltodextrin, 14% willow bark (ground), devil's claw root (ground), 5% ginger root (ground), magnesium stearate, potato starch

Ingredients: Moisture 5.6%, Crude protein 2.3%, Crude fat 0%, Crude fibre 14.7%, Crude ash 6.4%

Additives per kg: | Technological additives: Microcrystalline cellulose (1c460i) 200 g

Sensory additives: Vitamin B_1 (3a821) 7,768.80 mg, Vitamin B_{12} (3a835) 2.4651 mg, Vitamin E (3a700) 2,203.65 mg, iron(II) carbonate (3b101) 143.415 mg, manganese sulphate monohydrate (3b503) 9.945 mg, zinc oxide (3b603) 7.47 mg, copper(II) sulphate pentahydrate (3b405) 1.215 mg

Feeding recommendation per animal and day:

Puppies/young dogs:	2 tablets per 10 kg of body weight (max. 12 tablets), spread throughout the day; for 1 month. Repeat after 6 months.
Adult dogs:	5 tablets per 10 kg of body weight (max. 20 tablets), spread throughout the day; for 3 months. Repeat once a year.

PETVITAL® MINERAL-TABS

Complementary feed
PETVITAL® MINERAL-TABS contain an optimal combination of different types of calcium.

When administered regularly, calcium deficiencies are corrected and bone formation is promoted. ***PETVITAL® MINERAL-TABS*** help to meet the increased calcium requirements during the growth phase, pregnancy and lactation.

The addition of vitamin D_3 ensures that calcium is effectively incorporated into the bones. Yeast provides valuable nutrients that support the body's overall metabolism.

Composition: Monocalcium phosphate, calcium carbonate, sodium chloride, potato starch, inactivated brewer's yeast 0.076% (Saccharomyces cerevisiae), magnesium oxide, powdered cellulose, magnesium stearate, rapeseed oil, mono- and diglycerides of fatty acids

Ingredients: Moisture 3%, crude protein 6.1%, crude fibre 1.0%, crude fat 1.5%, crude ash 68.8%, calcium 18.0%, phosphorus 6.64%, sodium 4.76%

Additives per kg: | Nutritional additives:
Vitamin D_3 (3a671) 11,399 IU, iron as iron(II) sulphate, monohydrate (3b103) 1,044.9483 mg, zinc as zinc oxide (3b603) 474.9765 mg, manganese as manganese(II) oxide (3b502) 113.9944 mg, copper as copper(II) sulphate, pentahydrate (3b405) 106.3947 mg, iodine as calcium iodate, anhydrous (3b202) 3.7998 mg, selenium as sodium selenite (3b801) 5.6997 mg

Feeding recommendation per animal and day:
PETVITAL® MINERAL-TABS are added to home-prepared meals (B.A.R.F., home-cooked food) or tinned meat to ensure an optimal intake of calcium, phosphorus and vitamin D_3. The tablets can be given as a treat by hand or mixed into the food.

Adult dogs:	2 tablets per 10 kg BW, max. 5 tablets
Pregnant bitches:	
From the 30th day of pregnancy:	3 tablets per 10 kg KGW
Lactating bitches:	
1 - 4 Puppies:	3 tablets per 10 kg KGW
> 5 Puppies:	5 tablets per 10 kg KGW

(BW = body weight / 1 tablet = approx. 2 g)

For an accurate calculation of the correct portion size for puppies and young dogs, we recommend seeking advice from a vet or a nutritionist. Do not exceed the recommended feeding amount. Vitamin D_2 must not be administered at the same time.

CALCIUM CARBONATE POWDER & TABLETS

POWDER: Feed material; TABLETS: Mineral feed
Calcium is essential for a dog's health. The body needs calcium:
- to maintain muscle function
- to ensure strong teeth
- to build and maintain the skeleton.

An adult dog needs a daily supply of calcium to maintain a balanced metabolism.

Composition:
Powder: 100% calcium carbonate
Tablets: Calcium carbonate, inactivated brewer's yeast (Saccharomyces cerevisiae), potato starch, cellulose powder, magnesium stearate

Ingredients:
Powder: Calcium 36%, HCl-insoluble ash 9%
Tablets: Moisture 4.4%, crude ash 76.3%, crude protein 3.5%, crude fat 1%, crude fibre 2.2%, calcium 27.0%, HCl-insoluble ash 5%

Feeding recommendation per animal and day:
Powder: **Canina®** ***CALCIUM CARBONATE POWDER*** is added to home-prepared meals (B.A.R.F., home-cooked food) or tinned meat to ensure an optimal calcium intake. The powder is stirred into a little warm water in the dog's bowl and then mixed with the food.

Adult dogs: 2 g per 10 kg BW, max. 16 g

Pregnant bitches:
From the 30th day of pregnancy: 4 g per 10 kg BW

Lactating bitches:
1 - 4 Puppies: 4 g per 10 kg BW
5 - 6 Puppies: 8 g per 10 kg BW
> 7 Puppies: 10 g per 10 kg BW
1 teaspoon = approx. 12 g / BW = body weight

Tablets: **Canina®** ***CALCIUM CARBONATE TABLETS*** are added to home-cooked meals (B.A.R.F., home-cooked food) or tinned meat to ensure an optimal calcium intake. The tablets can be given as a treat by hand or mixed into the food.

Adult dogs: 3 tablets per 10 kg BW, max. 24 tablets

Pregnant bitches:
From the 30th day of pregnancy: 6 tablets per 10 kg BW

Lactating bitches:
1 - 4 Puppies: 6 tablets per 10 kg BW
5 - 6 Puppies: 12 tablets per 10 kg BW
> 7 Puppies: 15 tablets per 10 kg BW
1 tablet = approx. 1 g / BW = body weight

For puppies and young dogs, we recommend **Canina®** ***BARFER'S BEST JUNIOR*** or **Canina®** ***PUPPY LIME*** in combination with **Canina®** ***V25 VITAMIN TABLETS*** or **Canina®** ***CANIVITA***.

For an accurate calculation of the correct portion size for puppies and young dogs, we recommend seeking advice from a vet or a nutritionist.

PETVITAL® VITAMIN-TABS

Complementary feed
Vitamins for:

- Increased energy levels
- Improved fitness
- Support during the growth and development phase
- Reduced loss of appetite and nervousness
- A shiny coat

PETVITAL® VITAMIN-TABS have been developed to provide the necessary vitamins.

PETVITAL® VITAMIN-TABS are essential, particularly for pregnant and lactating animals, during the growth phase and when nutritional requirements are increased.

A brief guide to vitamins:

Vitamin A:	Helps build and regenerate skin and mucous membranes; plays a role in growth and fertility; supports the immune system
Vitamin D_3:	Regulates calcium and phosphorus storage
Vitamin E:	Regulation of carbohydrate and hormone metabolism
Vitamin C:	Supports the formation of connective tissue, bones and cartilage and is essential for a strong immune system
Vitamin B:	Transmission of nerve impulses, carbohydrate and protein metabolism, blood formation, growth, fat metabolism, protection of the skin and mucous membranes
Biotin:	A coenzyme involved in the formation of keratin, the protein that makes up hair

Composition: Inactivated brewer's yeast (Saccharomyces cerevisiae), monocalcium phosphate, powdered cellulose, calcium carbonate, magnesium stearate, rapeseed oil, mono- and diglycerides of fatty acids

Ingredients: Moisture 6.7%, crude protein 27.7%, crude ash 29.1%, crude fat 2.5%, crude fibre 1.5%

Additives per kg: | Nutritional additives:
Vitamin A (3a672a) 613,990 IU, Vitamin B_1 (3a821) 270.156 mg, Vitamin B_2 (3a825i) 180.104 mg, Vitamin B6 (3a831) 135.078 mg, Vitamin B_{12} (3a837) 2026.17 µg, Vitamin C (3a700) 2251.3 mg, Vitamin D_3 (3a671) 11,756 IU, Vitamin E (3a700) 2701.56 mg, Vitamin K_3 (3a710) 67.539 mg, Calcium D-pantothenate (3a841) 330.9411 mg, Niacin (3a314) 1344.0216 mg, Biotin (3a880) 11,256.5 µg

Feeding recommendation per animal and day:
1 tablet for every 10 kg of body weight

Vitamin D_2 must not be administered at the same time. The recommended feeding amount must not be exceeded.

V25 VITAMIN TABLETS

Complementary feed
Vitamins are micronutrients that are essential for a healthy metabolism. Most vitamins must be obtained from food, as dogs cannot produce them themselves.

Canina® *V25 VITAMIN TABLETS* contain 13 essential vitamins that a dog should be getting in sufficient quantities from its complete dog food. However, in certain life stages such as growth, pregnancy/lactation, old age or periods of increased physical exertion, nutritional gaps may arise. Even with home-prepared food (cooked or raw), we recommend supplementing the diet with **Canina® *V25 VITAMIN TABLETS*** to prevent any potential deficiencies.

Canina® *V25 VITAMIN TABLETS* can provide optimal support for your dog's well-being, fitness and performance, from puppies to senior dogs.

Composition: Inactivated brewer's yeast (Saccharomyces cerevisiae), dextrose, potato starch, powdered cellulose, magnesium stearate

Ingredients: Crude protein 20,4 %, crude fibre 2,4 %, crude fat 2,7 %, crude ash 5,4 %

Additives per kg: | Nutritional additives:
Vitamin A (3a672a) 400,000 IU, Vitamin D_3 (3a671) 11,000 IU, Vitamin E (3a700) 440 mg, Vitamin C (3a300) 1,000 mg, Vitamin K_3 (3a710) 44 mg, Vitamin B_1 (3a821) 44 mg, Vitamin B_2 (3a825i) 110 mg, Vitamin B_6 (3a831) 44 mg, Vitamin B_{12} (3a835) 220 µg, Niacin (3a314) 660 mg, calcium D-pantothenate (3a841) 220 mg, folic acid (3a316) 11 mg, biotin (3a880) 20,000 µg

Feeding recommendation per animal and day:
1 tablet per 10 kg of body weight, up to a maximum of 3 tablets.

During pregnancy, lactation and periods of extreme stress, the dosage should be doubled.

The recommended feeding amount must not be exceeded. Vitamin D_2 must not be administered at the same time.

CANILETTES & CANIPOWDER

Mineral feed

Canina® ***CANILETTES & CANIPOWDER*** are vitamin and mineral supplements for home-cooked meals (whether raw = B.A.R.F. or cooked) or to be added to tinned meat. Your dog will receive an optimal supply of essential nutrients, including calcium and phosphorus, which are necessary for maintaining muscle function and ensure physiological bone metabolism (supporting the skeleton and teeth).

Brewer's yeast provides B vitamins, which can have a positive effect on appetite and digestion. Seaweed acts as a natural source of minerals and supports the pigmentation of the coat.

Composition:

CANILETTES: Monocalcium phosphate, calcium carbonate, calcium-magnesium-carbonate, 9% inactivated brewer's yeast (Saccharomyces cerevisiae), sodium chloride, calcium-sodium-phosphate, 3% seaweed meal (Ascophyllum nodosum), powdered cellulose, magnesium stearate, potato starch

CANIPOWDER: Monocalcium phosphate, calcium carbonate, inactivated brewer's yeast (Saccharomyces cerevisiae), seaweed meal (Ascophyllum nodosum), calcium-magnesium-carbonate, sodium chloride, calcium-sodium-phosphate

Ingredients:

CANILETTES: Moisture 5.3%, crude protein 4.1%, crude fibre 1.6%, crude fat 1.4%, crude ash 69.8%, sodium 3.3%, calcium 17.0%, phosphorus 9.8%

CANIPOWDER: Moisture 2.4%, crude protein 4.9%, crude fibre 0.8%, crude fat 1.0%, crude ash 68.8%

Additives per kg: | Nutritional additives:

CANILETTES:

Vitamin A (3a672a) 469,000 IU, Vitamin D_3 (3a671) 10,500 IU, Vitamin E (3a700) 280 mg, Vitamin B_1 (3a821) 84 mg, Vitamin B_2 (3a825i) 199.5 mg, Vitamin B_6 (3a831) 84 mg, Vitamin B_{12} (3a837) 980 µg, Niacin (3a314) 630 mg, Calcium D-pantothenate (3a841) 630 mg, Folic acid (3a316) 14 mg, Iron (3b103) 1,225 mg, Zinc (3b603) 525 mg, Manganese (3b502) 262.5 mg, Copper (3b405) 122.5 mg, Iodine (3b202) 4.2 mg, Selenium (3a801) 6.3 mg

CANIPOWDER:

Vitamins: Vitamin A 469,000 IU, Vitamin D_3 10,500 IU, Vitamin E 280 mg, Vitamin B_1 84 mg, Vitamin B2 as riboflavin 199.5 mg, vitamin B_6 84 mg, vitamin B_{12} as vitamin B_{12} preparation 9,800 µg, Niacinamide 630 mg, Calcium D-pantothenate 630 mg, Folic acid 14 mg

Trace elements: Iron as ferrous sulphate, monohydrate 1,225 mg, zinc as zinc oxide 525 mg, manganese as manganese(II) oxide 262.5 mg, copper as copper(II) sulphate, pentahydrate 122.5 mg, Iodine as calcium iodate, anhydrous 4.2 mg, selenium as sodium selenite 6.3 mg

Minerals: calcium 18.5%, sodium 3.72%, phosphorus 8.89%

Feeding recommendation per animal and day:
CANIPOWDER:
Canina® ***CANIPOWDER*** is added to home-prepared meals (B.A.R.F., home-cooked food) or tinned meat to ensure an optimal intake of calcium, phosphorus, other minerals and vitamins. The powder is stirred into the dog's bowl with a little warm water and then mixed with the food.

Adult dogs:	4 g per 10 kg BW, max. 32 g
Pregnant bitches:	
From the 30th day of pregnancy:	8 g per 10 kg BW
Lactating bitches:	1 - 4 Puppies: 8 g per 10 kg BW, 5 - 6 Puppies: 16 g per 10 kg BW, > 7 Puppies: 20 g per 10 kg BW

(1 teaspoon = approx. 10 g / BW = body weight)

For puppies and young dogs, **Canina®** ***BARFER'S BEST JUNIOR*** or **Canina®** ***PUPPY LIME*** is recommended in combination with **Canina®** ***V25 VITAMIN TABLETS*** or **Canina®** ***CANIVITA***.

For an accurate calculation of the daily ration for puppies and young dogs, we recommend seeking advice from a vet or a nutritionist.

Do not exceed the recommended feeding amount. Vitamin D^2 must not be administered at the same time.

CANILETTES:
Canina® ***CANILETTES*** are added to home-cooked meals (B.A.R.F., home-cooked food) or tinned meat to ensure an optimal intake of calcium, phosphorus, other minerals and vitamins. The tablets can be given as a treat by hand or mixed into the food.

Adult dogs:	3 tablets per 10 kg BW max. 11 tablets
Pregnant bitches:	
From the 30th day of pregnancy:	4 tablets per 10 kg BW
Lactating bitches:	4 tablets per 10 kg BW

(1 tablet = approx. 2 g / BW = body weight)

For an accurate calculation of the daily ration for puppies and young dogs, we recommend seeking advice from a vet or a nutritionist.

Do not exceed the recommended feeding amount. Vitamin D^2 must not be administered at the same time.

PETVITAL® ENERGY-GEL

Complementary feed
PETVITAL® ENERGY-GEL is an energy concentrate designed to quickly replenish nutrient deficiencies.

It provides valuable energy, B vitamins and vitamin E during stages of a dog or cat's life when increased nutritional requirements arise: if the animal is not eating, it supplies energy and stimulates the appetite. Weak animals begin to eat again with the help of ***PETVITAL® ENERGY-GEL***. During the growth phase of puppies and young animals, and during the pregnancy and lactation of the mother dog, it bridges nutritional gaps that may arise due to high energy requirements and high performance levels when fed a standard diet.

PETVITAL® ENERGY-GEL - the energy boost for vitality, performance and well-being!

Composition: Marine oil, sunflower oil, malt (extracted)

Ingredients: Moisture 0.7%, crude protein 1.9%, crude fibre < 0.3%, crude fat 75.9%, crude ash 6.3%

Additives per kg: | Nutritional additives:
Vitamin E (3a700) 1,000 mg, Vitamin B_1 (3a821) 200 mg, Vitamin B_2 (3a825i) 150 mg, Vitamin B_6 (3a831) 100 mg, Vitamin B_{12} (3a837) 1,000 µg, nicotinamide (3a315) 1,000 mg, calcium D-pantothenate (3a841) 500 mg

Feeding recommendation per animal and day:
1 teaspoon per 10 kg of body weight, max. 4 teaspoons
(1 teaspoon = approx. 3 ml)

PETVITAL® ENERGY-GEL can be given either on its own or mixed with food. Shake well before use!

CANIVITA

Complementary feed
CANIVITA is a palatable vitamin emulsion containing a blend of 11 essential water- and fat-soluble vitamins. ***CANIVITA*** is used to address any potential gaps in the vitamin intake of dogs and cats: during pregnancy, lactation, when dogs are subjected to extreme physical exertion, as well as a dietary supplement to home-prepared meals, whether raw or cooked, to optimise vitamin intake.

For puppies, apply 1 drop under the tongue using your finger to boost vitality.

Composition: Soybean oil, sucrose, sodium citrate

Ingredients: Moisture 54.00%, crude protein 0.01%, crude fibre 0.95%, crude fat 37.15%, crude ash 0.19%

Additives per litre: | Technological additives:
Sorbic acid (1k202) 1,050 mg, butylated hydroxyanisole (BHA) (1b320) 240 mg, propyl gallate (E 310) 240 mg

Nutritional additives:
Vitamin A (3a672b) 500,000 IU, Vitamin D_3 (3a671) 10,000 IU, Niacinamide (3a315) 4,000 mg, calcium D-pantothenate (3a841) 1,000 mg, vitamin B_2 (3a826i) 1,000 mg, vitamin E (3a700) 1,000 mg, vitamin B_1 (3a820) 600 mg, vitamin B_6 (3a831) 250 mg, vitamin K_3 (3a710) 100 mg, folic acid (3a316) 10.0 mg, vitamin B_{12} (3a837) 1,000 µg

Feeding recommendation per animal and day:
½ teaspoon per 10 kg of body weight, up to a maximum of 2 teaspoons (½ teaspoon = 2.5 ml)

During periods of increased stress, such as pregnancy, lactation, training or hunting, the recommended dosage may be doubled. The recommended feeding amount must not be exceeded. Vitamin D_2 must not be administered at the same time.

Please note: Cut off the tip of the dropper before using it for the first time.

CANIFLORA VITAL

Complementary feed
Canina® ***CANIFLORA VITAL*** supports the gut microbiome and thus helps maintain a balanced gut flora in your dog. This product contains an optimal blend of both lactic acid-producing bacteria and lactic acid bacteria. **Canina®** ***CANIFLORA VITAL*** can be used as a complementary treatment to support the gut microbiome.

Three high-dose strains of probiotic cultures can have a positive effect on the gut immune system, which is the body's largest interconnected defence system. The prebiotics – carrots, inulin, cellulose and psyllium husks – provide fibre that has a positive effect on gut motility and stool consistency. They serve as a source of energy for the bacteria in the large intestine and support their activity.

Canina® ***CANIFLORA VITAL*** is gluten-free and very well tolerated.

Composition: Inulin (from chicory), carrots (ground), psyllium husks (ground), powdered cellulose

Ingredients: Moisture 4.5%, crude protein 6.7%, crude fibre 8.5%, crude fat 0%, crude ash 17.5%, sodium 0.10%, calcium 5.80%, phosphorus 0.15%

Additives per kg: | Zootechnical additives: Enterococcus faecium DSM 10663/NCIMB 10415 (4b1707) 2 x 10^{12} CFU, Bacillus velezensis DSM 15544 (4b1820) 2 x 10^{12} KBE, Lactobacillus acidophilus CECT 4529 (4b1715) 2 x 10^{12} CFU

Feeding recommendation per animal and day:

< 5 kg BW	1 g	25 up to 40 kg BW	4 g
5 up to 15 kg BW	2 g	> 40 kg BW	5 g
15 up to 25 kg BW	3 g		

BW = body weight, 1 measuring spoon = approx. 1 g

The powder is mixed with your pet's usual food. It can be fed for 8 weeks, or longer if necessary.

Canina® ***CANIFLORA VITAL*** can be fed to dogs of all ages, from puppies to senior dogs. It is suitable for pregnant and lactating bitches.

FIBRE MIX

Retail sizes:

Art.-No. 144006
100 g

Art.-No. 144013
300 g

Art.-No. 144020
1.000 g

Complementary feed
Canina® ***FIBRE MIX*** contains plant-based fibre sources from apples, alfalfa, peas and carrots, which enhance the daily meal. Fibre is important for maintaining a healthy gut flora; as prebiotics, it acts as food for the bacteria in the large intestine. The plant-based ingredients provide hemicellulose, cellulose, lignin and natural minerals such as magnesium and potassium.

Canina® ***FIBRE MIX*** can be added to any type of food. Even B.A.R.F. diets and home-cooked meals often lack fibre, which stimulates natural bowel movement and increases stool bulk. This dietary fibre can have a positive effect on peristalsis, stool consistency and the emptying of the anal glands.

Canina® ***FIBRE MIX*** is very well accepted, as it has a slightly sweet smell and an apple-like taste. Rapeseed oil supports a healthy metabolism thanks to its naturally occurring fatty acids.

The individual ingredients in **Canina®** ***FIBRE MIX*** work together perfectly and, when taken as a whole, enhance the product's gut-supporting effects.

Canina® ***FIBRE MIX*** is grain-free and gluten-free and contains no animal proteins. It is therefore suitable for dogs with dietary sensitivities.

Composition: Apple pomace, alfalfa meal, pea fibre, carrot pomace, linseed cake, yeast cell walls (Saccharomyces cerevisiae), brewer's yeast (Saccharomyces cerevisiae), Jerusalem artichoke, 1% rapeseed oil, calcium carbonate

Ingredients: Crude protein 11.9%, crude fat 6.3%, crude fibre 27.3%, crude ash 7.5%, phosphorus 0.25%, calcium 1.16%, sodium 0.41%, potassium 1.19%, magnesium 0.16%

Additives per kg: | Technological additives: Diatomaceous earth E551c 30 g

Feeding recommendation per animal and day:
Canina® ***FIBRE MIX*** can be added to your dog's diet from puppyhood right through to old age. It is suitable for all types of feeding (dry food, wet food or home-cooked meals, whether cooked or raw).

The product is also suitable for pregnant or lactating bitches.

The powder should be stirred into the food bowl with a little lukewarm water and then mixed with the dog's usual food before serving.

0.3 g per kg of body weight, up to a maximum of 15 g

Always ensure there is plenty of fresh drinking water available.

HEART VITAL

Retail sizes:

Art.-No. 112036
100 ml

Art.-No. 112050
250 ml

Complementary feed
L-carnitine can have a positive effect on the energy supply to the heart and skeletal muscles. It can help boost your dog's or cat's vitality, energy levels and general well-being. It can help support the heart's normal function.

Composition: Dextrose, inactivated yeast, hawthorn

Ingredients: Moisture 56.0%, crude protein 4.0%, crude fibre 1.2%, crude fat 0.8%, crude ash 1.8%

Additives per l: Nutritional additives: L-carnitine (3a910) 25,374 mg

Technological additives: Potassium sorbate (1k202, calculated as sorbic acid) 3160 mg, propionic acid (1k280) 5920 mg

Feeding recommendation per animal and day: ½ teaspoon per 10 kg of body weight, up to a maximum of 3 teaspoons (1 teaspoon = approx. 3 ml). ***HEART VITAL*** should be administered with food over a period of 6 months. It is recommended that you seek advice from a vet before starting to feed this product or extending the duration of treatment.

PETVITAL® INTESTINAL-GEL

Retail sizes:

Art.-No. 712304
30 ml

Complementary feed
PETVITAL® INTESTINAL-GEL supports the intestinal flora and thus the well-being of dogs and cats thanks to the microorganism it contains.

The lactic acid-producing bacterium Enterococcus faecium survives the passage through the stomach unscathed and multiplies rapidly in the small intestine. The physiological intestinal flora is stabilised and digestion is supported. Use, for example, following a change in diet.

Composition: Sunflower oil, potato starch, sucrose, rapeseed oil

Ingredients: Crude protein 0.5%, crude fibre 0.0%, crude fat 83.0%, crude ash 5.0%

Additives per litre: | Zootechnical additives: 1 x 10^{12} CFU Enterococcus faecium strain DSM 10 663 / NCIMB 10 415 (4b1707)

Feeding recommendation per animal and day: 1 level teaspoon mixed with a small amount of food or administered directly into the mouth before meals. For 1 week or longer.

1 level teaspoon = 4 ml
(4 x 10^{9} CFU Enterococcus faecium)

PETVITAL® ACTIVATOR

Retail sizes:

Art.-No. 712007
20 ml

4 027565 712007

Complementary feed
PETVITAL® ACTIVATOR contains bovine blood serum obtained using a special process. It helps to stimulate the appetite and support the recovery phase. Indications: For physical and mental stress such as pregnancy and lactation; for sporting and hunting dogs to optimise training performance; to promote concentration and balance.

Composition: Blood products (bovine serum), water

Ingredients: Crude protein 0.06%, crude fibre 0.00%, crude fat 0.00%, crude ash 0.07%

Additives per litre: | Sensory additives: Flavourings and appetite-stimulating substances: Ethanol: 164.4 g

Feeding recommendation per animal and day: 1 drop per kilogram of body weight, up to a maximum of 20 drops. Administer the drops with food for 4 weeks, followed by a 2-week break, then administer the drops again with food for 4 weeks at the same dosage. Repeat up to 4 times a year as needed.

PEAT EXTRACT

Retail sizes:

Art.-No. 112708
250 ml

4 027565 112708

Feed made from natural peat
The humic substances contained in ***PEAT EXTRACT*** protect the mucous membranes in the gastrointestinal tract and support the gut-associated immune system in both young and adult animals. ***PEAT EXTRACT*** for pets is a natural feed ingredient free of additives and preservatives.

Areas of use:
- To stimulate appetite
- To promote growth and strengthen the immune system
- To promote fertility in female and male animals
- To stimulate blood formation

Composition: 100% peat (liquid)

Ingredients: Moisture 95.3%, crude fiber 0.9%, crude protein 0.7%, crude fat 0%, crude ash 0%

Feeding recommendation per animal and day: Shake well before use! Mix the ***PEAT EXTRACT*** with the feed before serving. Always re-seal the bottle after use.

Small dogs weighing up to 5 BW:	2,5 ml
Small dogs weighing up to 10 BW:	5 ml
Medium-sized dogs weighing up to 20 BW:	10 ml
Larger dogs up to 35 BW:	15 ml
Dogs weighing over 35 BW:	20 ml

(BW = body weight)
Do not exceed a dose of 20 ml per day.

Retail sizes:

4 027565 131006 Art.-No. 131006
250 g

STOMACH BALANCE

Mineral feed
The natural supplement **Canina®** ***STOMACH BALANCE*** was developed by veterinarians and is used to support digestive health in dogs of all ages, from puppies to senior dogs.

The ground bark of the red elm (Slippery Elm) forms mucilage that coats the stomach lining like a protective film. Gentian and centaury contain bitter compounds, tannic acid, inulin, and mucilage, which help balance the stomach. Wormwood contains a high concentration of bitter compounds that support the regulation of the gastrointestinal tract. Natrolite-phonolite is a natural mineral; the umbrella term for these minerals is zeolite.

Natrolite-phonolite has a crystalline structure with cavities and pores (high absorbency). Thanks to natrolite-phonolite's high cation exchange capacity, the stomach environment is positively influenced, and your dog's stomach remains in balance.

Bentonite is a natural rock composed of various clay minerals that forms through the weathering of volcanic ash. It has a lamellar structure and is hydrophilic; water seeps between the layers, causing the clay minerals to swell. This swelling improves stool consistency, which also has a positive effect on anal gland expression.

Canina® ***STOMACH BALANCE*** – natural support for your dog's stomach.

Composition: Carrots (ground), 20% red elm bark (ground), 5% wormwood (ground), 5% gentian root (ground), 5% centaury (ground)

Ingredients: Moisture 5.4%, crude protein 5.0%, crude fiber 9.6%, crude fat 0.0%, crude ash 42.5%, ash insoluble in hydrochloric acid 20.9%, sodium 0.61%, calcium 2.01%, phosphorus 0.13%

Additives per kg: | Technological additives: Natrolite-phonolite (E566) 300 g, bentonite (1m558i) 100 g

Feeding recommendation per animal and day:
½ teaspoon per 10 kg of body weight, up to a maximum of
4 teaspoons (1 teaspoon = approx. 5 g)

For 4 weeks, or longer if necessary. Discontinue use during pregnancy. Do not exceed the recommended feeding amount.

The powder is mixed in with the feed. Dry feed must be moistened with water.

If medication is being administered at the same time, a gap of at least 2 hours must be observed between administering the medication and feeding **Canina®** ***STOMACH BALANCE***.

ORGANIC COCONUT OIL

Retail sizes:

Art.-No. 150007
200 ml

4 027565 150007

Feed material
Canina® ***ORGANIC COCONUT OIL*** is a pure natural product. The virgin coconut oil is obtained through a cold-pressing process. Since it is a pure natural product, it is not refined, bleached, hydrogenated, or deodorized.

Canina® ***ORGANIC COCONUT OIL*** is rich in medium-chain fatty acids, such as lauric acid, caprylic acid, and capric acid, which are converted directly into energy rather than being stored as fat, so the coconut oil has a positive effect on metabolism. It is also recommended to help prevent worm infestations and treat existing ones.

Many pet owners also use coconut oil topically. The lauric acid in coconut oil is said to help keep unwanted pests away from pets. The medium-chain fatty acids it contains nourish the skin and coat and provide moisture. The coat becomes silky and shiny and is easy to comb.

Composition: 100% pure coconut oil, from certified organic farming

Ingredients: Moisture 0%, crude protein 0%, crude fibre 0%, crude fat 97.4%, lauric acid content 50.5%

Energy value per 100 g: 900 kcal / 3768 kJ

Feeding recommendation per animal and day:
Canina® ***ORGANIC COCONUT OIL*** can be added to regular food in either its solid or liquid form. It changes from a solid to a liquid state at temperatures above 20 °C and melts.

1 g per 5 kg of body weight, up to a maximum of 12 g

For external use: To achieve a smooth consistency, rub **Canina®** ***ORGANIC COCONUT OIL*** between your hands and then massage it into the skin and coat. Depending on the animal's size, apply a pea-sized (cat) to plum-sized amount of coconut oil (large dog) several times a week. The animal's coat should be well moistened.

BLACK CUMIN SEEDS

Retail sizes:

4 027565 131105

Art.-No. 131105
250 g

Feed material
Canina® ***BLACK CUMIN SEEDS*** are rich in polyunsaturated fatty acids such as linoleic acid; they also contain a variety of essential oils and bitter compounds (e.g., nigellin). They can have a regulating effect on metabolism and digestion. Your dog's well-being and performance can be positively influenced, and the body's immune system can be strengthened.

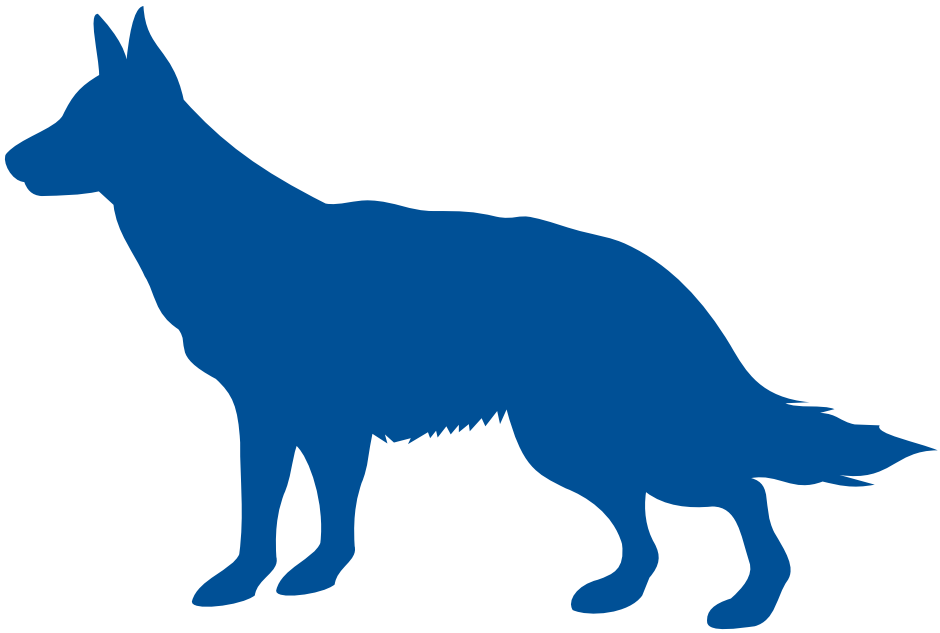

Thanks to their nutty, spicy aroma, **Canina®** ***BLACK CUMIN SEEDS*** are generally very well received.

Composition: 100% Nigella sativa (Egyptian black cumin seeds)

Ingredients: Moisture 5.0%, crude protein 22.2%, crude fiber 7.9%, crude fat 32.2%, crude ash 4.0%

Feeding recommendation per animal and day:
1 teaspoon per 10 kg of body weight, up to a maximum of 4 teaspoons (1 teaspoon = approx. 3 g)

Mix **Canina®** ***BLACK CUMIN SEEDS*** with a little lukewarm water in the food bowl and then mix them in with the usual food. Do not use for pregnant or nursing dogs.

BLACK CUMIN OIL

Retail sizes:

Art.-No. 131112
250 ml

4 027565 131112

Feed material
Black cumin oil has been known in the Middle East for thousands of years for its beneficial effects on the entire metabolism. The ancient Egyptians used it for virtually every ailment. This valuable oil, with its nutty, spicy note, is rich in essential oils, bitter compounds, and polyunsaturated fatty acids, particularly gamma-linolenic acid. These essential fatty acids are indispensable for a functioning, healthy metabolism. Amino acids, vitamins C and E support and regulate the body's immune system.

Canina® ***BLACK CUMIN OIL*** can be used for allergies of all kinds, as well as for gastrointestinal issues, respiratory problems, and skin irritations. Since it harmonizes and regulates overall metabolism, it is recommended for all conditions associated with an overactive (allergies) or a weak immune system.

In addition, **Canina®** ***BLACK CUMIN OIL*** has antioxidant properties due to its phytochemicals (nigellin, saponin, thymochinone) and protects cells from free radical damage.

Composition: 100% pure black cumin oil (from Nigella sativa seeds), cold-pressed, filtered, with no added ingredients

Ingredients: Fat content 100%

Additives per kg: None

External use: For skin irritations, apply a few drops 1–3 times daily to the affected areas. For nourishing care of the skin and coat, as well as for parasite prevention: 1–3 times a week, depending on the dog's size, distribute 1–5 ml of **Canina®** ***BLACK CUMIN OIL*** in the palms of your hands or apply it to a brush, then massage or brush it into the coat

Internal use:
Feeding recommendation per animal and day:
0.3 ml/kg body weight, up to 12 ml per animal, mixed with feed.
Discontinue use during pregnancy and lactation.

Retail sizes:

4 027565 700707 Art.-No. 700707
15 ml

IMMUNE BOOSTER

Dietary supplement feed
Nutritional Recovery and Convalescence > High energy content and high concentration of essential nutrients

Canina® ***IMMUNE BOOSTER*** provides dogs and cats with easily digestible, readily available energy, highly concentrated vitamins, and immunoglobulins from colostrum. This is the first milk produced by the mother during and after birth. It is rich in lactoferrin and lysozyme. **Canina®** ***IMMUNE BOOSTER*** supports the body's natural defense system and optimizes the animals' recovery phase, particularly during and after physical stress such as birth (mother and offspring), training, sports, and competitions. The lactic acid-producing bacterium Enterococcus faecium in **Canina®** ***IMMUNE BOOSTER*** ensures rapid colonization with important lactobacilli. These are essential for a healthy, balanced gut flora and, consequently, for a stable intestinal immune system. **Canina®** ***IMMUNE BOOSTER*** is a tasty paste that dogs and cats enjoy. It is equally suitable for puppies/kittens through to senior animals. To support well-being and performance, **Canina®** ***IMMUNE BOOSTER*** can enhance the daily diet. The paste can also be administered during certain life stages when the daily food does not optimally meet the high demands.

Composition: Vegetable oils and fats (sunflower oil, refined), colostrum powder 20%, glucose

Ingredients: Crude protein 14.00%, crude fat 63.60%, crude fiber 0.20%, crude ash 4.00%, hydrochloric acid-insoluble ash 3.70%

Additives per kg: | Nutritional additives:
Vitamin A (3a672b) 2,210,000 IU
Vitamin D_3 (3a671) 100,000 IU
Vitamin E (3a700) 9,000 mg

Intestinal flora stabilisers: Enterococcus lactis NCIMB 10415 (4b1705i) 200 x 10^9

Energy value per 100 g: 651 kcal / 2726 kJ

Feeding recommendation per animal and day:

Dog puppies and cats:	0,25 ml
Small dogs up to 5 kg:	0,25 - 0,5 ml
Medium dogs 5-10 kg:	0,5 - 1 ml
Large dogs over 10 kg:	1 - 2 ml

Recommended feeding duration:
Until a full recovery.

Feeding instructions:
The measuring aid (ring on the syringe) ensures accurate feeding for puppies from day one. It is recommended that you seek advice from a nutritionist or vet before use or if extending the feeding period. Due to the higher levels of additives compared to complete feeds, this complementary feed must only be fed to the specified animal species in accordance with the feeding guidelines.

DOG IMMUNE PROTECT

Retail sizes:

Art.-No. 142354
150 g

Art.-No. 142361
300 g

Complementary feed
DOG IMMUNE PROTECT contains egg antibodies that support the body's natural defences. The gut stabiliser Enterococcus faecium helps maintain a healthy balance of gut flora.

Mother dog: The egg antibodies and the valuable proteins and amino acids naturally present in the egg boost vitality and support the production of sufficient quantities of valuable colostrum.

Puppies: In the event of a large litter, insufficient milk production by the mother dog, or even the loss of the mother dog, the egg antibodies enhance the quality of the puppy milk substitute, enabling the puppies to develop optimally and gain weight. Their immune systems are strengthened in stressful situations such as the weaning period or moving to a new home.

Adult dogs and performance dogs: The proteins, amino acids and enzymes contained in ***DOG IMMUNE PROTECT*** boost vitality and well-being and strengthen the body's natural defences. When used in the run-up to competitions, shows and tournaments, they enhance the dogs' performance and shorten the recovery period afterwards. The intestinal stabiliser Enterococcus faecium contained in ***DOG IMMUNE PROTECT*** balances the intestinal flora, which is particularly important for dogs with sensitive intestines.

Composition: Whole egg powder, inactivated brewer's yeast (Saccharomyces cerevisiae), powdered cellulose

Ingredients: Crude protein 32.0%, crude fibre 1.1%, crude fat 14.0%, crude ash 3.7%

Additives per kg: | Nutritional additives:
3 x 10^9 KBE Enterococcus faecium NCIMB 10415 (4b1705)

Feeding recommendation per animal and day:
Puppies from day 1: 1 pinch, mixed into **Canina®** ***PUPPY MILK*** (1 g 3 x 109 CFU Enterococcus faecium)

Puppies and young dogs: ½ teaspoon

Adult dogs, nursing bitches, elderly/ill dogs, performance dogs:
½ teaspoon per 10 kg body weight, up to a maximum of 3 teaspoons (1 teaspoon = approx. 4 g = 12 x 10^9 CFU Enterococcus faecium)

DOG IMMUNE PROTECT is mixed with the dog's food and given as a supplement for 3 months.

Do not exceed the recommended feeding amount.

Retail sizes:

4 027565 141029 Art.-No. 141029

4 027565 141036 Art.-No. 141036
500 g

HEMP POWDER

Feed material
Canina® ***HEMP POWDER*** is produced using a particularly gentle manufacturing process from the leaves of the hemp plant Cannabis sativa. Hemp naturally contains important essential amino acids and unsaturated fatty acids, which are vital for optimal metabolism. The nutritionally balanced amino acid profile in **Canina®** ***HEMP POWDER*** supports muscle development, performance and the musculoskeletal system, which is particularly important for active dogs; however, older, young or stressed dogs in convalescence also benefit from the unique variety of valuable ingredients: Natural trace minerals and vitamins strengthen the body's immune system, whilst valuable dietary fibre contributes to gut health.

Last but not least, essential fatty acids such as alpha- and gamma-linolenic acid help regulate hormone metabolism, which contributes to the dog's well-being. Nervous dogs prone to hyperactivity benefit from the natural unsaturated fatty acids in **Canina®** ***HEMP POWDER***, which results in improved nerve strength and stress resistance.

Young dogs that tend to lose weight can be supplemented with **Canina®** ***HEMP POWDER***. Older dogs that are prone to rapid muscle loss can have their muscle strength supported by the valuable amino acids; vitality and well-being, and thus the quality of life of older dogs, are improved. As a side effect, **Canina®** ***HEMP POWDER*** has a positive influence on coat quality and hair growth due to its essential fatty acids.

Canina® ***HEMP POWDER*** has no intoxicating effect, as it is made from industrial hemp.

Composition: 100% hemp flour (ground leaves of Cannabis sativa L.)

Ingredients: Moisture 10.5%, crude protein 29.7%, crude fibre 30.3%, crude fat 7.1%

Average fatty acid composition:
Polyunsaturated fatty acids: linoleic acid 58.26%, alpha-linolenic acid 19.14%, gamma-linolenic acid 0.05%
Monounsaturated fatty acids: palmitoleic acid 0.10%, oleic acid 11.61%, Gadoleic acid 0.41%
Saturated fatty acids: Myristic acid 0.10%, Palmitic acid 6.28%, Stearic acid 2.72%, Arachidic acid 0.88%, Behenic acid 0.33%, Lignoceric acid 0.15%

Feeding recommendation per animal and day:
3 g per 10 kg of body weight
3 g = approx. 1 teaspoon

The specified amount can be doubled if necessary. Do not exceed 30 g per day.

HEMP STICKS

Retail sizes:

Art.-No. 141005
200 g
4 027565 141005

Art.-No. 141012
500 g
4 027565 141012

Feed material
Canina® ***HEMP STICKS*** are produced using a particularly gentle manufacturing process from the finest parts of the Cannabis sativa hemp plant. Hemp naturally contains important essential amino acids and unsaturated fatty acids, which are vital for optimal metabolism. The nutritionally balanced amino acid profile in **Canina®** ***HEMP STICKS*** supports muscle development, performance and the musculoskeletal system, which is particularly important for active dogs; however, older, young or stressed dogs in convalescence also benefit from the unique variety of valuable ingredients: Natural trace minerals and vitamins strengthen the body's immune system, whilst valuable dietary fibre contributes to gut health.

Last but not least, essential fatty acids such as alpha- and gamma-linolenic acid help regulate hormone metabolism, which contributes to the dog's well-being. Nervous dogs prone to hyperactivity benefit from the natural unsaturated fatty acids in **Canina®** ***HEMP STICKS***, which results in improved nervous system strength and stress resistance.

Young dogs that tend to lose weight can be supplemented with **Canina®** ***HEMP STICKS***. Older dogs that are prone to rapid muscle loss can benefit from the valuable amino acids to support their muscle strength; this improves their vitality and well-being, and thus their quality of life. As a side effect, **Canina®** ***HEMP STICKS*** have a positive effect on coat quality and hair growth thanks to their essential fatty acids.

Canina® ***HEMP STICKS*** have no intoxicating effect, as they are made from feed-grade hemp.

Composition: 100% natural hemp ingredients (from Cannabis sativa L.)

Ingredients: Moisture 10.5%, crude protein 29.7%, crude fibre 30.3%, crude fat 7.1%

Average fatty acid composition:
Polyunsaturated fatty acids: linoleic acid 58.26%, alpha-linolenic acid 19.14%, gamma-linolenic acid 0.05%
Monounsaturated fatty acids: palmitoleic acid 0.10%, oleic acid 11.61%, gadoleic acid 0.41%
Saturated fatty acids: myristic acid 0.10%, palmitic acid 6.28%, stearic acid 2.72%, arachidic acid 0.88%, behenic acid 0.33%, lignoceric acid 0.15%

Feeding recommendation per animal and day:
3 g per 10 kg of body weight

The recommended amount can be doubled if necessary. Do not exceed 30 g per day. **Canina®** ***HEMP STICKS*** are given as a healthy treat between meals. They are easy to break into pieces, allowing for individual portioning. Also suitable for puppies.

Retail sizes:

SLIM & VITAL

Complementary feed
Canina® ***SLIM & VITAL*** is designed to boost the metabolism. Chitosamine (derived from the exoskeleton of crustaceans) is able to bind fat, meaning that the calories from this fat are not absorbed.

Inulin has a beneficial effect on the gut flora and acts as a prebiotic.

L-carnitine tartrate, a naturally occurring substance in the body, improves energy supply to the cells. Thermogenic spices such as ginger, chilli and mustard seeds support fat metabolism (the conversion of dietary energy into heat energy).

Composition: 30% chitosamine (from the exoskeleton of crustaceans), 10% inulin, seaweed meal (Ascophyllum nodosum), spirulina, ground fennel, ground aniseed, 0.5% ground ginger, 0.3% ground chilli, 0.2% ground yellow mustard, ground caraway

Ingredients: Crude protein 21.0%, crude fibre 0.6%, crude fat 0.4%, crude ash 16.1%

Additives per kg: | Nutritional additives:
L-carnitine L-tartrate 108.8 g, vitamin C 22 g

Sensory additives: Tamarind seed extract 310 g (Garcinia cambogia extract, min. 60% HCA)

Technological additives: Microcrystalline cellulose 30 g

Energy values: ME = 10.8 MJ/kg (ME = metabolisable energy)

Feeding recommendation per animal and day:
1 teaspoon per 10 kg of body weight, up to a maximum of 4 teaspoons (1 teaspoon = approx. 5 g)

Canina® ***SLIM & VITAL*** should be mixed with lukewarm water and then served mixed in with the food. Fresh drinking water should always be available in sufficient quantities.

CELLULOSE POWDER

Retail sizes:

Art.-No. 129010
150 g

Art.-No. 129003
400 g

Feed material
Canina® ***CELLULOSE POWDER*** is derived from plant cell walls and, like starch, is a complex carbohydrate. Unlike starch, however, cellulose is not broken down but acts as a water-insoluble dietary fibre that helps cleanse the intestines.

Canina® ***CELLULOSE POWDER*** has a wide range of uses: It can help with weight management by replacing part of the usual diet with low-calorie fibre. This ensures that no excess calories are consumed, whilst the animal still feels full. For intestinal cleansing, to support bowel function and stool passage, to optimise nutrient absorption from the intestine into the bloodstream by maintaining and protecting the intestinal villi; stimulation of natural intestinal peristalsis. The improved stool consistency (firmer and bulkier) optimises the mechanical emptying of the anal glands through pressure.

For cats, **Canina®** ***CELLULOSE POWDER*** can help them pass swallowed hair more easily. When administered in conjunction with **Canina®** ***CATLAX-GEL*** from **Canina®**, it forms an ideal combination. If vegetables, fruit or fermented grains in a BARF diet are poorly tolerated or not well accepted, **Canina®** ***CELLULOSE POWDER*** replaces the dietary fibre necessary for gut health in the diet. The fibres are tasteless and odourless, very well tolerated and are therefore eaten without any problems.

Canina® ***CELLULOSE POWDER*** is suitable for all life stages, from puppies and kittens to senior pets, throughout their entire lives.

Composition: 100 % powdered cellulose

Ingredients: Moisture 3.2%, crude protein 0%, crude fibre 65.6%, crude fat 0%, crude ash 0%

Additives per kg: None

Feeding recommendation per animal and day:
0.5 g to a maximum of 1 g per kg of body weight, not exceeding 80 g. The animal should be gradually introduced to cellulose (increasing the dose to a maximum of 1 g per kg over one to two weeks).

Only dry food needs to be moistened; BARF or wet food already has a sufficiently high water content. If several meals are fed per day, the total daily amount of fibre should be spread across the individual meals.

To optimise weight, to improve stool consistency (firmer, bulkier): Replace approx. 5 to a maximum of 10% of the daily feed ration with cellulose.

It is important to note that reducing the daily food intake also reduces the amount of essential nutrients. If this is done for longer than 4 weeks, a vitamin and mineral supplement, such as **Canina®** ***CANILETTEN***, should be added to the diet to maintain a healthy metabolism and meet the animal's daily nutritional requirements.

Fresh drinking water must be available at all times to prevent blockages.

B.A.R.F. WITH PRODUCTS FROM **Canina®**

With products from **Canina®** you can easily and simply feed your B.A.R.F. dog according to his needs - with all the vitamins and minerals your dog needs every day to stay healthy and active!

B.A.R.F is the abbreviation for "Biologically Apperpriate Raw Food". B.A.R.F. dogs are fed raw meat and bones and are also given raw vegetables, fruit in pureed form and possibly also cereals and dairy products.

This natural, transparent feed contains no additives, colorants or other unhealthy substances. contained. You decide for yourself what you put in your dog's food bowl.

What additional supplementary food does a barbered dog need to cover its requirements? Your dog needs calcium, other macro- and microminerals, trace elements. Vitamins and essential fatty acids for a balanced metabolism, strong bones, a healthy coat and elastic skin. Only with these food supplements will your dog remain vital, efficient and healthy!

Various B.A.R.F. options with **Canina®** products (plus ***BARFER'S OIL*** with every combination):

BARFER'S BEST

Complementary feed
Canina® ***BARFER'S BEST*** contains essential nutrients, including calcium, which are necessary for a balanced BARF meal and enhance the diet. This helps keep your dog active and in good health.

When used in combination with **Canina®** ***BARFER'S OIL*** your dog is provided with vitamins, minerals and essential fatty acids..

Canina® ***BARFER'S BEST*** contains: seaweed calcium as a source of calcium, which is easily absorbed and essential for bone structure, teeth, claws and muscles. As a coenzyme, calcium activates numerous metabolic processes, regulates nerve impulses and supports heart function.

Natural seaweed provides vitamins and trace minerals such as iodine, fluoride and selenium, and promotes pigmentation.

Yeast provides a wide range of amino acids, B vitamins and minerals such as copper, iron, manganese and zinc; it has a beneficial effect on the skin and hair and promotes energy and vitality.

Composition: Inactivated brewer's yeast (Saccharomyces cerevisiae), seaweed lime (Lithothamnium calcareum), seaweed meal (Ascophyllum nodosum)

Ingredients: Moisture 6,8 %, crude protein 25,1 %, crude fibre 0,6 %, crude fat 2,2 %, crude ash 29,3 %, calcium 7,93 %, phosphor 0,72 %

Feeding recommendation per animal and day:
5 g per 10 kg of body weight, max. 6 teaspoons
(1 teaspoon = approx. 4 g)

Do not exceed the recommended feeding amount.

BARFER'S OIL

Feed material
Canina® ***BARFER'S OIL*** is made from pure, natural hemp oil, which is extracted at low temperatures and then mechanically filtered. No further processing takes place. Hemp oil provides essential fatty acids that support overall metabolism and skin health (gamma-linolenic acid). It is easily digestible and is popular due to its mild, nutty, slightly hay-like flavour.

Hemp oil is particularly rich in essential fatty acids, which dogs cannot produce themselves and must therefore be provided through their diet. It is essential for dogs fed a raw meat (B.A.R.F.) or cooked meat diet! When used in conjunction with **Canina®** ***BARFER'S BEST***, ***BARFER'S OIL*** meets their daily requirements, ensuring that their meat-based meal – whether raw or cooked – is complete.

Composition: Hemp oil

Ingredients: Fat: 100%

Average fatty acid composition: saturated fatty acids: 11%, monounsaturated fatty acids: 13%, polyunsaturated fatty acids: 76%, of which gamma-linolenic acid: 3%

Energy value per 100 ml: 900 kcal / 3.700 KJ

Feeding recommendation per animal and day: 1 teaspoon (2 ml) per 10 kg of body weight, up to 3 teaspoons

BARFER'S BEST JUNIOR

Complementary feed for puppies and young dogs
Canina® ***BARFER'S BEST JUNIOR*** contains trace elements, including calcium, which puppies and young dogs fed a raw meat diet need every day.

Puppies and young dogs have high nutritional requirements when it comes to their daily B.A.R.F. meals. Bones and muscles develop rapidly, the coat changes from puppy fur to that of an adult dog and – last but not least – the young dog learns quickly and intensively during the first few months of its life. To support this development optimally, we have created a product for BARF-fed puppies and young dogs that supplies the growing organism with vital nutrients to ensure the best possible development. **Canina®** ***BARFER'S BEST JUNIOR*** is easily digestible, tastes great and should be a staple of every BARF meal until the end of the growth phase. It supports the development of the musculoskeletal system, teeth and muscles.

The addition of green-lipped mussel meat meal (Perna canaliculus from New Zealand) helps to strengthen the natural function of the entire connective tissue system, including tendons, ligaments and joints.

Combined with **Canina®** ***BARFER'S OIL***, **Canina®** ***COD LIVER OIL*** and other **Canina®** B.A.R.F. supplements such as ***BOVINE BLOOD POWDER***, this provides the perfect complement to a B.A.R.F. meal for puppies and young dogs.

Composition: Calcium carbonate, inactivated brewer's yeast (Saccharomyces cerevisiae), seaweed lime (Lithothamnium calcareum), green-lipped mussel meat meal (Perna canaliculus 5 %), seaweed meal (Ascophyllum nodosum)

Ingredients: Moisture 3.1%, crude protein 9.7%, crude fibre 0.3%, crude fat 1.0%, crude ash 70.5%, calcium 21.5%, phosphorus 2.58%, sodium 3.38%

Additives per kg: | Nutritional additives:
Zinc as zinc oxide (3b603) 800 mg, manganese as manganese(II) oxide (3b502) 186 mg, copper as copper(II) sulphate pentahydrate (3b405) 155 mg, Iodine as calcium iodate (anhydrous) (3b202) 12.4 mg, selenium as sodium selenite (3b801) 3.6 mg

Feeding recommendation per animal and day (guide only):
Adult weight / Age of the puppy in months:
5 - 20 kg BW / 1 - 5 months = 2 tsp; 6 - 15 months = 1 tsp
> 20 kg BW / 1 - 5 months = 3 tsp; 6 - 15 months = 2 tsp
BW = body weight / tsp = teaspoon / 1 tsp = approx. 6 g

The dosage depends on the adult dog's body weight (BW), the puppy's or young dog's age in months, and its current weight, which varies considerably depending on the breed and type of dog.

We recommend consulting a nutritionist or vet for the exact dosage, so that the amount can be adjusted to suit your growing dog's current weight.

BARFER'S BEST SENIOR

Complementary feed
Canina® ***BARFER'S BEST SENIOR*** provides ageing and elderly dogs with all the vitamins and minerals they need for a balanced metabolism. Elderly dogs are demanding, have specific needs and face particular health risks; that is why we have developed **Canina®** ***BARFER'S BEST SENIOR***, a B.A.R.F. supplement tailored precisely to the needs of older dogs:

Calcium from seaweed is easily absorbed and does not place a strain on the metabolism; it ensures strong bones and supports muscle function, which often declines in older dogs. L-carnitine, a substance produced naturally by the body, promotes energy supply to the heart and every cell in the body. Seaweed and yeast provide important minerals and enzymes, whilst carrots have a cleansing effect on the intestines and help combat worms. Bioactive pure collagen peptides support joint cartilage; in addition, the high vitamin C content from rosehip husks ensures firm connective tissue and a strong, natural immune system. The gingerols naturally present in ginger optimise joint function and help with problems in the musculoskeletal system.

FOS = fructooligosaccharides from chicory act as prebiotic bioregulators and strengthen the physiological gut flora, which can quickly become unstable in older dogs.

OPC = oligomeric proanthocyanidins from grape seed flour are natural antioxidants; they can neutralise harmful free radicals and provide protection at the cellular level.

Canina® ***BARFER'S BEST SENIOR*** - an essential addition to the daily B.A.R.F. meal for older and senior dogs!

Composition: Algae lime (Lithothamnium calcareum), collagen, carrot meal, seaweed meal (Ascophyllum nodosum), rosehip peel, inactivated brewer's yeast (Saccharomyces cerevisiae), grape seed meal (OPC = oligomeric proanthocyanidins), chicory powder (FOS = fructooligosaccharides), ginkgo powder, ginger

Ingredients: Crude protein 28%, crude fibre 3.2%, crude fat 1.9%, crude ash 26.6%, calcium 8.08%

Additives per kg: | Nutritional additives:
L-carnitine L-tartrate 10,000 mg

Feeding recommendation per animal and day (guide only):
5 g per 10 kg of body weight, max. 6 teaspoons
(1 teaspoon = approx. 3 g)

Do not exceed the recommended feeding amount.

EGGSHELL POWDER

Feed material
Canina® ***EGGSHELL POWDER*** supplies not only calcium – an essential mineral required for bone metabolism, healthy teeth and muscle function – but also other natural minerals such as magnesium, potassium, sodium, iron, copper and zinc.

Thanks to its fine grind, **Canina®** ***EGGSHELL POWDER*** is easily digestible, and its bioavailability – and thus the absorption of calcium – is very high.

For dogs that are allergic to meat proteins, such as those from beef, chicken or pork, **Canina®** ***EGGSHELL POWDER*** is a high-quality alternative to meat and bone meal.

Due to its low phosphorus and high calcium content, **Canina®** ***EGGSHELL POWDER*** is particularly suitable for supplementing raw meat-based meals (B.A.R.F.) or cooked meat dishes that are high in phosphorus and low in calcium.

Composition: 100% ground eggshell

Ingredients: Crude ash 96%, calcium 36%, phosphorus 0.1%

Feeding recommendation per animal and day:
To meet calcium requirements when feeding raw meat, tinned meat alone or cooked meat meals, without supplementing the diet with bones or meat-and-bone meal:
0.2 g per kg of BW, up to a maximum of 16 g per animal

1 teaspoon = approx. 5 g BW = body weight

Remove with a clean, dry spoon.

BOVINE BLOOD POWDER

Feed material
Canina® ***BOVINE BLOOD POWDER*** naturally contains various minerals and trace elements. Furthermore, bovine blood provides proteins, which in turn consist of amino acids that are required for the formation of genetic material in every single cell of the body.

The addition of **Canina®** ***BOVINE BLOOD POWDER*** is particularly recommended for dogs and cats fed a raw meat diet (B.A.R.F.), as the raw meat no longer contains any blood. Due to its naturally high protein content, **Canina®** ***BOVINE BLOOD POWDER*** can help promote muscle growth.

During the growth phase, bovine blood powder helps to promote the development of a well-proportioned physique.

Dogs and cats benefit from being given **Canina®** ***BOVINE BLOOD POWDER*** following periods of intense exertion or special tasks (sporting dogs, working dogs, hunting dogs, breeding dogs and cats): it supports strength, stamina and well-being, and improves performance.

Composition: Blood products (dried whole bovine blood)

Ingredients: Moisture 4.0%, crude protein 92.0%, crude fat 0.2%, crude ash 6.0%, calcium 0.1 g/kg, magnesium 0.1 g/kg, phosphorus 0.8 g/kg, potassium 2.2 g/kg, sodium 19.4 g/kg, iron 2.5 g/kg

Additives per kg: None

Feeding recommendation per animal and day:
0.3 g per kg of body weight, up to 12 g per day

Feed as a supplement for 6 weeks. Add to the daily B.A.R.F. meal. **Canina®** ***BOVINE BLOOD POWDER*** should be mixed into the food. Dry food must be moistened with warm water.

(100 ml of fresh blood is equivalent to 12.5 g of **Canina®** ***BOVINE BLOOD POWDER***)

BEEF FAT POWDER

Complementary feed
Canina® ***BEEF FAT POWDER*** is a natural source of energy made from cooked beef fat and the resulting beef stock, with no added sugar. Dogs and cats can convert the energy from this animal fat – derived exclusively from beef – and utilise it for their bodies. Growing young animals that tend to be underweight and lose weight despite eating enough will develop more substance and build a body fit for show; pregnant and lactating animals benefit from the fat calories, including for the nourishment of their puppies (increased fat content in the mother's milk). For dogs that are physically very active (hunting, guard and sporting dogs), **Canina®** ***BEEF FAT POWDER*** should be included in their daily meal as a natural source of energy for greater strength, performance and stamina. Animals with a sensitive palate or those that are poor eaters may accept their meal more readily and develop a better appetite with **Canina®** ***BEEF FAT POWDER***, as fat is an excellent flavour enhancer.

Canina® ***BEEF FAT POWDER*** is also an excellent source of animal fat for optimising a B.A.R.F. meal; dogs fed a raw meat diet often lose weight because the meal contains too little animal fat from the meat.

Canina® ***BEEF FAT POWDER*** is tasty, easily digestible and provides energy for the whole day!

Composition: Animal by-products: 72% beef fat & 27.9% beef stock (both cooked and spray-dried)

Ingredients: Moisture 1.1%, crude protein 35.3%, crude fibre 0%, crude fat 56.9%, crude ash 6.1%

Additives per kg: | Sensory additives: Rosemary extract 1 g

Energy value: 740 kcal = 3,100 kJ per 100 g of beef fat powder

Feeding recommendation per animal and day:
½ teaspoon per 10 kg of body weight, max. 3 teaspoons
(tsp = teaspoon / 1 teaspoon = approx. 2 ½ g)

The powder should be mixed in with the usual food; dry food must be moistened.

COD LIVER OIL

Feed material
Canina® ***COD LIVER OIL*** is a valuable source of vitamins and rich in unsaturated fatty acids (EPA, DHA, linolenic acid), which dogs and cats cannot produce themselves.

Its natural vitamin A and vitamin D_3 content can help fill nutritional gaps in home-cooked meals and thus enhance the nutritional value of the diet.

Vitamin A is important for eyesight and the mucous membranes, whilst vitamin D_3 aids the absorption of calcium and phosphorus in the gut, thereby supporting bone development. When used daily in rotation with **Canina®** ***BARFER'S OIL***, it helps prevent potential deficiency symptoms in home-cooked meals (vitamins A, E and D_3).

Composition: 100% fish oil (cod liver oil)

Ingredients: 100% fat

Average fatty acid composition:
Saturated fatty acids 17%, monounsaturated fatty acids 53%, polyunsaturated fatty acids 30%, linoleic acid 1.5%, linolenic acid 2.0%, stearidonic acid 2.5%, eicosapentaenoic acid (EPA) 11.5%, docosahexaenoic acid (DHA) 12%

Additives per liter: Nutritional additives:
Vitamin A (3a672b) 375,000 IU, Vitamin D_3 (3a671) 50,000 IU

Energy value per 100 ml: 831 kcal/3,415 kJ

Feeding recommendation per animal and day:
Administer 2 ml per 10 kg of body weight (max. 10 ml) mixed with the feed

Canina® ***COD LIVER OIL*** should be given 2–3 times a week. On the other days, please use one of our other feed oils as a supplement.

SALMON OIL

Feed material
Canina® ***SALMON OIL*** consists of 100% pure salmon oil and is rich in polyunsaturated fatty acids (omega fatty acids, EPA and DPA). As dogs and cats cannot produce these fatty acids themselves, they must be supplied through their diet. They are essential and indispensable for a properly functioning metabolism.

Canina® ***SALMON OIL*** supports the skin and coat and helps regulate the body's overall metabolic processes. Whatever you feed your pet, **Canina®** ***SALMON OIL***, as a high-quality feed ingredient, enhances your pet's meal.

Composition: 100% salmon oil

Ingredients: crude fat 99 %

Fatty acid composition: Free fatty acids 1.5%, saturated fatty acids 17%, polyunsaturated fatty acids 56%, monounsaturated fatty acids 27%, total omega-3 fatty acids 14%, total omega-6 fatty acids 11%, eicosapentaenoic acid (EPA) 2%, docosahexaenoic acid (DHA) 3%, docosapentaenoic acid (DPA) 1%

Additives per litre: none

Complementary feed
Canina® ***MARINE OIL BLEND PREMIUM*** is a specially formulated blend of high-quality edible oils, which complement each other perfectly in their beneficial effects on the entire body.

Natural marine omega-3 oil is rich in unsaturated fatty acids (EPA, DHA), which are essential for dogs and cats; these must be obtained from their diet, as the animals cannot produce them themselves. Naturally occurring vitamins, antioxidants and phytochemicals support bone and skin metabolism, vision, growth and cell protection, and have a positive effect on metabolism.

Whatever you feed your pet, **Canina®** ***MARINE OIL BLEND PREMIUM*** enhances every meal. Used in rotation with **Canina®** ***BARFER'S OIL***, **Canina®** ***SALMON OIL*** or **Canina®** ***COD LIVER OIL***, **Canina®** ***MARINE OIL BLEND PREMIUM*** completes the B.A.R.F. meal.

Composition: Fish oil (with a natural content of omega-3 fatty acids from mackerel, sardines, anchovies, cod, herring, capelin and tuna), walnut oil, argan oil, rosehip seed oil

Ingredients: crude fat 100 %

Average fatty acid composition: Eicosapentaenoic acid (EPA) 11.6%, docosahexaenoic acid (DHA) 7.6%, linoleic acid 4.7%, linolenic acid 18.6%

Energy value per 100 ml: 822 kcal/3,438 kJ

Feeding recommendation per animal and day: Administer 2 ml per 10 kg of body weight (max. 10 ml) mixed with the feed

Canina®

PUPPY MILK

Milk substitute complete feed
SPECIAL PUPPY MILK with biologically valuable nutrients: a high-energy food containing all the vitamins and minerals necessary for healthy growth.

Replacement milk for puppies from day one
- Feeding motherless puppies
- If the bitch's milk production is insufficient
- For large litters
- For preparation and during lactation
- As a supplement for working and breeding dogs
- As a supplement for ageing dogs

How to prepare: In line with the bitch's natural milk, the milk formula is prepared using 4 parts by weight of water (80%) and 1 part by weight of puppy milk (20%). Boil the water and stir the puppy milk into water at approx. 50 °C using a whisk. Prepare the milk fresh for each meal and feed it at body temperature (38 °C). Do not leave any leftover milk standing; dispose of it. Initially, feed every 2 hours; towards the end of the weaning period, feed every 4 hours; observe a night-time break of 6 - 8 hours.

Important notes: Adjust the amount of milk to suit the puppies' individual needs. Well-fed, contented puppies will suckle and sleep, but will not cry. Ensure the highest standards of hygiene: clean feeding bottles, teats, etc. in boiling water before each use. From the 6th week of life, start supplementing with **Canina®** ***PUPPY LIME***.

Composition: Coconut oil (refined), whey powder (sweetened), soya protein isolate, skimmed milk powder, whole egg powder, sodium chloride, monocalcium phosphate, salmon oil, calcium carbonate, dicalcium phosphate, maltodextrin

Ingredients: Moisture 3.20%, crude protein 30.0%, crude fibre 0.20%, crude fat 30.2%, crude ash 9.70%, sodium 1.50%, calcium 1.20%, phosphorus 1.00%, DHA C 22:6 (Omega-3) 896.00 mg/kg, EPA C 20:5 (Omega-3) 668.00 mg/kg

Additives per kg: | Nutritional additives:
Vitamin A (3a672a) 15,000 IU, Vitamin D_3 (3a671) 1,500 IU, Vitamin E (3a700i) 150 mg, Vitamin C (3a300) 50 mg, Biotin (3a880) 500 µg, Folic acid (3a316) 1 mg, Vitamin B1 (3a821) 5 mg, Vitamin B_2 (3a825i) 10 mg, Vitamin B_6 (3a831) 5 mg, Vitamin B_{12} (3a835) 50 µg, Niacinamide (3a315) 20 mg, calcium D-pantothenate (3a841) 20 mg, choline chloride (3a890) 1,250 mg, iron (3b103) 50 mg, copper (3b405) 15 mg, zinc (3b603) 20 mg, iodine (3b201) 3 mg, selenium (3b801) 0.3 mg, taurine (3a370) 100 mg

Technological additives: Lecithin, liquid (1c322i) 1,800 mg

Feeding guide for orphaned puppies (per puppy):
The adult dog's body weight applies | The amount of puppy milk in ml per meal.
1 and 2 days old (8*): DB = 5 - 10 ml | SB = 10 - 15 ml | MB = 15 - 20 ml | LB = 20 - 25 ml | ELB = 25 - 30 ml
3 to 7 days old (6*): DB = 15 ml | SB = 20 ml | MB = 30 ml | LB = 40 ml | ELB = 50 ml
8 to 14 days old (5*): DB = 20 - 25 ml | SB = 30 - 35 ml | MB = 40 - 50 ml | LB = 60 - 70 ml | ELB = 70 - 80 ml
15 days old through to weaning (4*): DB = 30 - 35 ml | SB = 50 - 60 ml | MB = 60 - 70 ml | LB = 100 - 120 ml | ELB = 120 - 150 ml
*Meals per day | (DB = dwarf breeds up to 5 kg | SB = small breeds 5 - 15 kg | MB = medium-sized breeds 15 - 25 kg | LB = large breeds 25 - 40 kg | ELB = extra large breeds over 40 kg)
Do not exceed the recommended feeding amount. Very young puppies should be fed using a dropper; older puppies using a feeding bottle; and from the fourth week of life, they can also be fed from a small bowl. If feeding this food in addition to their mother's milk, reduce the number of meals per day. Do not administer vitamin D_2 at the same time.

PUPPY LIME POWDER & TABLETS

Mineral feed for puppies and young dogs from 6 weeks to 15 months

Canina® ***PUPPY LIME*** is an easily digestible animal feed lime, enriched with the minerals zinc, manganese, copper, iodine and selenium. Its formula is specially adapted to growing dogs and can be added to their diet from the 6th week of life until the end of the growth phase (approx. 15 months of age).

Canina® ***PUPPY LIME*** supports the development of bones and joints and the formation of strong teeth, whilst helping to bridge any nutritional gaps. **Canina®** ***PUPPY LIME*** contains no added vitamins to prevent an overdose when mixed with your dog's usual food. We therefore recommend adding **Canina®** ***V25 VITAMIN TABLETS*** or **Canina®** ***CANIVITA*** multivitamin emulsion if you are feeding your dog home-prepared food (cooked or raw).

SENIOR VITAL

Complementary feed
A natural blend of essential nutrients for ageing dogs.

- Does your dog seem more tired than usual?
- Does your dog show reduced ability to learn or recognise things?
- Does your dog get lost in familiar places?
- Does your dog no longer greet its owners?
- Does your dog seek less contact?
- Does your dog have less appetite?
- Does your dog seem restless or irritable?

Then: **Canina®** ***SENIOR VITAL***! Because as dogs age – from around 7 years old – their stamina and physical and mental performance begin to decline.

The active ingredients in ***SENIOR VITAL*** support your dog's mental and physical abilities and enhance their daily diet:

- Mussel meat meal from the green-lipped mussel (Perna canaliculus) to support joints and connective tissue
- Biotin for coat, skin and claws
- Ginkgo to support cognitive function and learning ability
- L-carnitine as an energy source for the heart and muscles
- Grape seed flour to support the metabolism
- Rosehip: The naturally high vitamin C content of rosehips supports the body's natural defences and helps maintain firm connective tissue
- Seaweed, a natural source of minerals and vitamins, supports pigmentation

Composition: 30% seaweed meal (Ascophyllum nodosum), 20% ginkgo powder, 15% grape seed meal, 10% rosehip, 10% green-lipped mussel meat meal (Perna canaliculus), powdered cellulose, 5% FOS (fructooligosaccharides)

Ingredients: Moisture 7.5%, crude protein 13.7%, crude fibre 9.5%, crude fat 8.7%, crude ash 13.2%

Additives per kg: | Nutritional additives:
Biotin (3a880) as a preparation 900,000 µg, L-carnitine (3a911) 50,000 µg

Feeding recommendation per animal and day: 1 teaspoon per 10 kg, max. 4 teaspoons (1 teaspoon = approx. 5 g)

Canina® ***SENIOR VITAL*** is mixed with your dog's usual feed and can be given to ageing and older dogs on a daily basis.

Please moisten the dry food with warm water.

KRÄUTER-DOC® IMMUNE SYSTEM

Retail sizes:

Art.-No. 160501
150 g

Art.-No. 160518
500 g

Complementary feed
Canina® ***KRÄUTER-DOC® IMMUNE SYSTEM*** is a finely ground herbal blend that is easily digestible and should be added to your pet's diet to provide nutritional support for the body's natural defences.

Herbs provide important phytonutrients that may be lacking in our daily diet. They supply the body with vitamins, minerals, amino acids and phytochemicals.

The specially balanced blend of herbs provides optimal support for your dog's natural defences by supplying essential nutrients. During periods of physical exertion and stress, these plant-based compounds, along with the natural content of vitamin C and trace elements, help maintain your dog's performance and well-being.

Canina® ***KRÄUTER-DOC® IMMUNE SYSTEM*** contains no chemical additives. 100% natural!

Composition: Dried and ground herbs and fruits (rosehip, carrot, rockrose, echinacea, sea buckthorn)

Ingredients: Moisture 9.5%, crude protein 5.8%, crude fibre 14.7%, crude fat 1.9%, crude ash 6.8%

Additives per kg: None

Feeding recommendation per animal and day:

Dogs up to 10 kg:	2,5 g (½ teaspoon)
Dogs up to 25 kg:	5 g (1 teaspoon)
Dogs up to 50 kg:	10 g (2 teaspoon)
Dogs over 50 kg:	15 g (2½ teaspoon)

Mix into your pet's daily food for over two months. Repeat after a six-month break. Moisten the dry feed or steep the herbal mixture briefly in hot water; then mix it into the feed.

If your dog is under increased physical or mental stress, **Canina®** ***KRÄUTER-DOC® IMMUNE SYSTEM*** can be given as a supplement for up to 3 months.

If using several ***KRÄUTER-DOC®*** products at the same time, you should alternate between the mixtures on a daily basis.

Discontinue during pregnancy!

KRÄUTER-DOC® RESPIRATORY TRACT

Complementary feed
Canina® ***KRÄUTER-DOC® RESPIRATORY TRACT*** respiratory tract is a finely ground herbal blend that is easily digestible and can be added to the diet to provide nutritional support for the respiratory tract.

Herbs provide important phytonutrients that may be lacking in our daily diet. They supply the body with vitamins, minerals, amino acids and phytochemicals.

These specially formulated herbs support the bronchial tubes and upper respiratory tract. They help to boost your dog's performance and well-being.

Canina® ***KRÄUTER-DOC® RESPIRATORY TRACT*** contains no chemical additives. 100% natural!

Composition: Dried and ground herbs and fruits (aniseed, ginkgo, thyme, liquorice root, pansy, eucalyptus, marshmallow root)

Ingredients: Crude protein 14.4%, crude fibre 15.8%, crude fat 10.4%, crude ash 12.0%

Additives per kg: None

Feeding recommendation per animal and day:

Dogs up to 10 kg:	2,5 g (½ teaspoon)
Dogs up to 25 kg:	5 g (1 teaspoon)
Dogs up to 50 kg:	10 g (2 teaspoon)
Dogs over 50 kg:	15 g (2½ teaspoon)

Mix into your pet's daily food for over two months. Repeat after a six-month break. Moisten the dry feed or steep the herbal mixture briefly in hot water; then mix it into the feed.

Canina® ***KRÄUTER-DOC® RESPIRATORY TRACT*** can be given as a lifelong supplement.

If using several ***KRÄUTER-DOC®*** products at the same time, you should alternate between the mixtures on a daily basis.

Discontinue during pregnancy!

PRODUCTS AGAINST

PESTS

PETVITAL® NOVERMIN

***PETVITAL® NOVERMIN* for the repelling of fleas and ticks.**
Provides up to 4 weeks' protection against bites (repellent). Thanks to its unique water-insoluble carrier, the product remains fully effective even after rain, exposure to moisture or a short bath.

Composition: 25 g/kg lauric acid, 25 g/kg neem extract from cold-pressed oil derived from the hulled seeds of Azadirachta indica, extracted using supercritical carbon dioxide

Dog application:
Depending on the dog's size and coat type, apply either just part of the ampoule's contents (short coat, long silky coat without an undercoat) or the entire contents of the ampoule (thick, long coat, undercoat) drop by drop, every 3 - 4 cm from the base of the tail to the top of the head, directly onto the skin.

Part the fur! Do not apply to the coat! Do not rub in! Do not use on puppies weighing less than 1 kg. Do not use around the eyes or nose area. Do not use on fresh wounds or skin lesions.

Cat application:
Depending on the cat's size and coat type, apply 1 - 3 drops (the entire ampoule, for example, for a large Maine Coon tom weighing 8 - 10 kg) directly onto the skin in a circular motion between the shoulder blades, spaced 3 cm apart: up to 2 kg body weight: 1 drop; 2 - 5 kg body weight: 2 drops; 5 - 7 kg body weight: 3 drops; and over 8 kg body weight: the entire ampoule.

Part the fur! Do not apply to the coat! Do not rub in! Do not use on kittens weighing less than 1 kg. Do not use around the eyes or nose area. Do not use on fresh wounds or skin lesions.

PETVITAL® VERMINEX

Spot-On Repellent:
- Pests cannot develop resistance
- Does not enter the body
- Excellent immediate and long-term effects

Active ingredients: 25 g/l lauric acid, 25 g/l neem extract from cold-pressed oil derived from the hulled seeds of Azadirachta indica, extracted using supercritical carbon dioxide

Application (1x weekly):

Dogs/Cats: Apply a few drops to the skin approximately every 3 cm from the base of the tail to the top of the head. Additionally, depending on the size of the affected animal, apply 2 - 4 drops to the armpits. Use only on animals weighing 1 kg or more and aged 4 months or older.

Rodents: Apply 1 to 4 drops to the skin, depending on the area.

Birds: Apply 1 to 3 drops to the skin, depending on the size.

Do not rub the drops in with your finger. The treatment must be repeated after washing the animal.

PETVITAL® VERMINEX SHAMPOO

Effective against fleas, lice, ticks, mites and their larvae/eggs
Repels pests after just one use. Removes unpleasant odours.

Ingredients: 15% - 30% anionic surfactants, < 5% amphoteric surfactants, fragrances (hexyl cinnamal, benzyl salicylate, hydroxycitronellal, linalool), preservatives (phenoxyethanol)

Active ingredients of the biocidal product: 30 g/kg lauric acid, 5 g/kg neem extract from cold-pressed oil derived from the hulled seeds of Azadirachta indica, extracted using supercritical carbon dioxide

Application: Moisten the animal's coat with lukewarm water, apply a small amount of shampoo to the coat and massage it in. Leave for approx. 5 minutes, then rinse thoroughly and dry. The shampoo's texture helps wash existing fleas out of the coat. Repellent ingredients help prevent re-infestation.

Other pests will also be washed away and kept at bay for a certain period of time. For optimum protection, apply ***PETVITAL® VERMINEX*** once the surface is dry and spray the resting area with ***PETVITAL® ORGANIC INSECT-SHOCKER***.

Pest control product, effective insect protection for all pets and household animals

Reliably keeps fleas, lice, ticks, hair lice and mites away from your pet's environment. ***PETVITAL® ORGANIC INSECT-SHOCKER*** is a so-called repellent, which effectively repels common ectoparasites (external parasites) after just the first application, preventing eggs or nits from becoming established in the animal's environment. In the event of a flea infestation, it is recommended to additionally treat the animal with the ***NOVERMIN SPOT-ON*** product for dogs/cats, which exerts its repellent effect directly on the animal itself. Flea eggs and nits can also be washed out of the animal's coat with ***VERMINEX SHAMPOO***, which takes effect immediately.

Active ingredients in the biocidal product: 15 g/kg lauric acid, 5 g/kg neem extract from cold-pressed oil derived from the hulled seeds of Azadirachta indica, extracted using supercritical carbon dioxide

Application: Spray the areas infested with pests sparingly with ***PETVITAL® ORGANIC INSECT-SHOCKER*** from a distance of approx. 30 cm, paying particular attention to the animals' sleeping and resting areas (approx. every 4 - 6 weeks). The contents of the bottle are sufficient for approx. 6 m²

USE BIOCIDES SAFELY.
ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.

PETVITAL® ORGANIC INSECT-SHOCKER FOR BIRDS & RODENTS

Retail sizes:

4 027565 441303	Art.-No. 441303 **150 ml (Birds)**
4 027565 541300	Art.-No. 541300 **150 ml (Rodents)**

Pest control product for birds / rodents
PETVITAL® ORGANIC INSECT-SHOCKER is a repellent that effectively repels common ectoparasites (external parasites) after just one application, preventing them from laying eggs or establishing themselves.

Suitable for all types of birds, such as budgies, canaries and parrots, and all rodents, such as rabbits, guinea pigs, hamsters, rats, mice, chinchillas and hedgehogs.

Application: Depending on the severity of the infestation, spray the cages sparingly every 2 - 4 weeks. In the event of a very severe infestation, spray for 3 consecutive days and then once a week for 4 weeks. The product is safe for the skin (of both humans and animals) and for feathers and fur.

Active ingredients in the biocidal product: 15 g/kg lauric acid, 5 g/kg neem extract from cold-pressed oil derived from the hulled seeds of Azadirachta indica, extracted using supercritical carbon dioxide

USE BIOCIDES SAFELY.
ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.

CAPHA® DISINFECTANT SPRAY

Cleaning and disinfectant, ready-to-use spray

CAPHA® DISINFECTANT SPRAY from **Canina®** is a highly effective cleaning and disinfectant free from alcohol and aldehydes. It is effective against bacteria, viruses and fungi. It is non-irritating, has a subtle citrus scent and is economical to use. It is suitable for use in all areas where animals are present or which are used by animals: stables, litter trays, cages, perches, transport equipment, exercise areas, vehicles, equipment, veterinary surgery rooms, etc. The special combination of active ingredients in ***CAPHA® DISINFECTANT SPRAY*** provides excellent cleaning and disinfection in a single step, whilst being highly compatible with materials.

Tested in accordance with the Digital Care Act (DVG) and German Society for Hygiene and Microbiology (DGHM). The product is resistant to acrylic glass and non-corrosive.

Ingredients: Water, benzalkonium chloride (< 5 %), didecyldimonium chloride (< 5 %), fragrance, colourant

Active ingredients of the biocidal product: 2.4 g/kg didecyldimethylammonium chloride, 2.4 g/kg alkyldimethylbenzylammonium chloride, 2.4 g/kg alkyldimethylethylammonium chloride

Instructions for use: ***CAPHA® DISINFECTANT SPRAY*** is ready to use and takes effect within one minute. Spray on and leave for 1 minute, then rinse off with clean water. As with all cleaning and disinfectant products, safe use requires the product to be handled correctly: After cleaning and disinfecting, the surface must be thoroughly rinsed with clean water. Terrariums and whelping boxes can also be cleaned and disinfected with ***CAPHA® DISINFECTANT SPRAY*** when empty of animals, provided the product is used correctly (thorough rinsing with clean water).

USE BIOCIDES SAFELY.
ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.

NOVAGard Green®

ANTI PARASITE SHAMPOO

Shampoo is effective against fleas, mites and other ectoparasites. ***NOVAGard Green® ANTI PARASITE SHAMPOO*** complements the ***NOVAGard Green® PARASITE PRODUCTS*** with a mild natural formulation based on margosa. ***NOVAGard Green® ANTI PARASITE SHAMPOO*** is a shampoo developed on the basis of mild cleansing surfactants that combines the parasite-repellent effect of margosa oil with the caring effect of nettle extract. Existing fleas, mites, lice and their clutches are first mechanically removed from the coat by the foam, the product helps to prevent re-infestation and we recommend the simultaneous use of ***NOVAGard Green® KOMBI PLUS*** in the animal's environment. In case of ear mite infestation, please also use the ***NOVAGard Green®*** ear care products.

Active ingredient: Margosa oil 1 %

Ingredients: Mild cosmetic cleansing surfactants, nettle extract 2 % - emulsified.

Recommended use: Massage the product sparingly into the damp coat, lather, leave on briefly and rinse thoroughly. Repeat application about 2 - 3 times a week in case of flea infestation. Avoid mucous membranes and eyes as well as the entrance to the outer ear.

KOMBISPRAY PLUS

Plant-based spray for dogs and cats to destroy fleas and other parasites.

In the case of an infestation of ectoparasites, especially fleas, treatment of the animal alone is not enough. In most cases, the animal's environment is also affected by parasite infestation.

NOVAGard Green® KOMBISPRAY PLUS (for dogs and cats) is an innovative spray in the fight against ectoparasites. It can be used as a repellent "anti-flea spray" both in the animal's environment and on the animal itself (also repellent). It is therefore also suitable as an "anti-tick spray". It is also effective against mites, lice and mosquitoes around dogs and cats.

Active ingredient: Margosa oil emulsified 6 g / 100 g

Ingredients: Water, cold-pressed coconut oil

Retail sizes:

Art.-No. NG0112

Sprühflasche

4 260118 880239

USE BIOCIDES SAFELY.
ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.

Recommended use: Spray ***NOVAGard Green® KOMBI PLUS*** (for dogs and cats) generously on areas infested with pests and pests from a distance of approx. 30 cm. Spray the animal itself very sparingly from a distance of approx. 30 cm, avoiding the eyes and mucous membranes. If an infestation is detected, first repeat the treatment 3 - 4 days in succession and then, as a precaution, at intervals of 4 - 6 weeks. The sleeping, lying and resting areas of the animals should be treated particularly thoroughly. One bottle is sufficient for about 30 m2. In addition, carefully clean the pet's environment regularly and vacuum thoroughly, especially in the case of flea infestation.

1 Tick card

TICK CARD

For easy removal of ticks.

A tick must be removed correctly so that pathogens cannot enter the skin in an uncontrolled manner or the tick's head gets stuck. It is essential to use the right technique and the right tools.

Observe the following during removal:
- Remove the tick as early as possible.
- Use the right tool.
- Apply the tool close to the skin.
- Do not squeeze the tick.
- Pull the tick out slowly and in a controlled manner.
- Do not use oil, gasoline, nail polish remover, etc. This will cause the tick to vomit and the pathogens will enter the wound.
- Disinfect the area after removal.
- If redness does not go away but spreads or swells and / or flu-like symptoms occur, please consult a vet / doctor.
- If you are not sure that the tick has been completely removed, please consult a vet/doctor.

NOVAGard Green® TICK CARD makes it easy to remove the tick. Thanks to the integrated magnifying glass, ticks can be easily found even in the early stages, and after removal it is very easy to check whether the tick has been completely removed.

Recommended use: ***NOVAGard Green® TICK CARD*** has 2 differently sized V-shaped openings for ticks of different sizes. Slowly push the appropriate side directly onto the skin towards the tick. Fix the tick at the end of the V-opening and guide the card further forward and upwards at the same time (the ***NOVAGard Green® TICK CARD*** works like a lever). Use the built-in magnifying glass to check whether the tick has been completely removed. Disinfect the area and keep it under observation for a few days.

EYE CARE

Proper care of the eyes and ears is very important for the health and well-being of dogs and cats. Watery or clogged eyes are an everyday problem, as is itching in the ears, especially in cats in general and in dogs with floppy ears. Prevention with a natural, gentle and effective care product that also effectively supports veterinary treatment.

NOVAGard Green® EYE CARE (for dogs and cats) cleans and cares for clogged / weeping animal eyes (+ eye area). Instilled into the eye, irritated eyes are soothed. The product can be used for daily eye care and prevents renewed stickiness and irritation. The innovative use of colloidal silver prevents inflammation.

Ingredients: Demineralized water, sodium hyaluronate, colloidal silver, retinol palmitate in phosphate buffer.

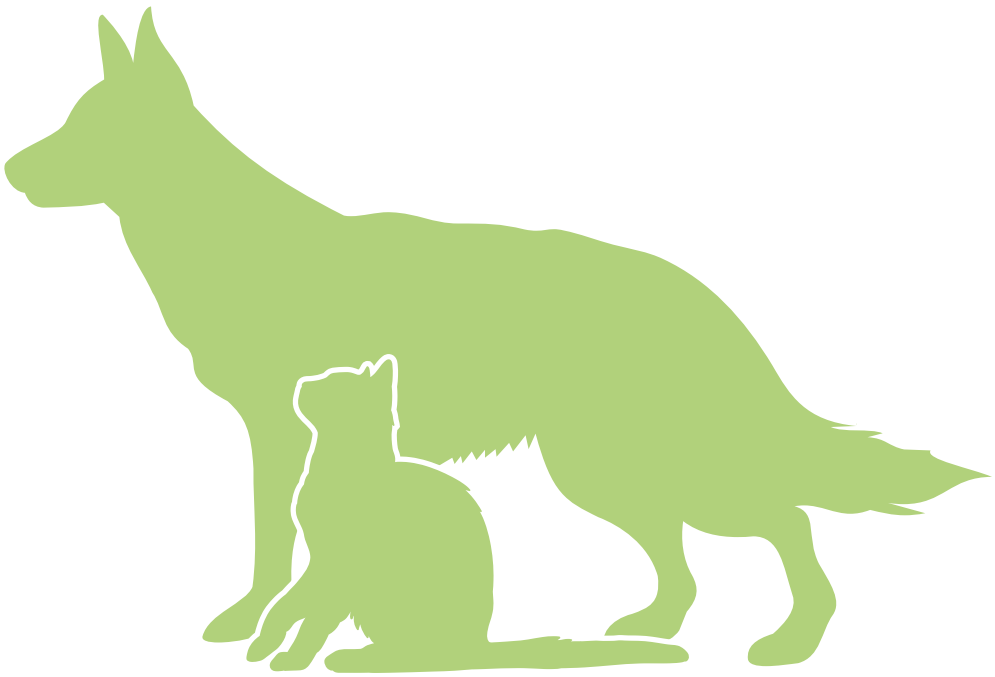

Recommended use: Apply a few drops to the conjunctival sac. Carefully clean the area around the eye with a fresh, moistened cellulose tissue. Several applications per day are possible.

FRESH COAT CARE

Retail sizes:

4 260118 880192

Art.-No. NG0019
200 ml
Spray bottle

What dog owner hasn't experienced it: a walk in rainy, damp weather and the unpleasant musty smell is already in the coat and in the home. Here we offer a natural remedy with the innovative ***NOVAGard Green® FRESH COAT CARE*** (for dogs) with aloe vera, wheat germ oil and lavender oil for smooth hair and a pleasant scent.

The improved formula contains aloe vera fresh plant leaf juice (a high proportion moisturizes the skin), wheat germ oil (nourishes skin and coat) and a trace of natural lavender oil (skin and coat become supple, nourished and shiny and fragrant). ***NOVAGard Green® FRESH COAT CARE*** (for dogs) makes brushing the coat easier by making the hair supple and shiny. In addition, the lavender oil it contains releases a pleasant fragrance without being overpowering or unpleasant for sensitive dog noses.

Ingredients: aloe vera, wheat germ oil, natural emulsifier, lavender oil, sodium benzoate, potassium benzoate

Recommended use: Spray on several times a day as required, leave to absorb and brush out.

PAW CARE

Retail sizes:

4 260118 880161

Art.-No. NG0016
50 ml Can

100 % natural care ingredients

NOVAGard Green® PAW CARE (for dogs) supports the healing of minor, superficial skin irritations, small bite wounds and scratched skin areas in dogs on a natural basis (Vaseline). Itchy and irritated skin is soothed. The product generally supports the skin's regeneration processes after the initial treatment of a wound/skin irritation and scar care.

NOVAGard Green® PAW CARE (for dogs) contains high-quality vegetable oils and no preservatives. The product can also be used in both summer and winter to care for paw pads. Pure, cold-pressed sea buckthorn pulp oil: has anti-inflammatory, antibacterial and skin-healing properties. Calendula oil has wound-healing and pain-relieving properties and panthenol (the precursor of vitamin B_5) supports skin regeneration.

Ingredients: Vaseline, sea buckthorn pulp oil, calendula oil, panthenol

Recommended use: Apply several times a day to the affected areas of skin and massage in gently.

EAR CARE

NOVAGard Green® ear products (for dogs and cats) offer a coordinated system of gentle but thorough ear cleaning and plant-based ear care to prevent disease. Many dog and cat owners are familiar with the problem of allergies, itching or ear mite infestation. Itching puts a considerable strain on your pet's well-being and constant scratching on/in the sensitive ears causes inflammation. ***NOVAGard Green®*** ear products contain colloidal silver - inflammation can be prevented and healing supported in a gentle way.

NOVAGard Green® EAR CARE (for dogs) with marigold extract can be used in the regular care of the dog. An acidic environment is maintained in the ear area, which supports the ears' natural protective skin layer. Mite infestation and inflammation are prevented and existing itching, which can have many causes besides mites, is also soothed.

NOVAGard Green® EAR CARE (for cats) contains the particularly mild and nourishing lady's mantle extract. Ear mites are a major problem for cats, especially outdoor cats. ***NOVAGard Green® EAR CARE*** (for cats) can prevent re-infestation. In addition, it effectively supports thorough cleaning, veterinary measures and the general administration of spot-on preparations (against ear parasites).

NOVAGard Green® EAR CLEANER (for dogs and cats) and ***NOVAGard Green® EAR CARE*** (for dogs and cats) differ in their consistency and the dosage of the active ingredients they contain. They complement each other perfectly in their combination to prevent mite infestation thoroughly and gently from the outset.

Ingredients:
Dog: Demineralized water, propanediol, glycerine, marigold flower extract, hydroxyethyl cellulose, lactic acid, salicylic acid of natural acid of natural origin, colloidal silver

Cat: Demineralized water, propanediol, glycerin, lady's mantle extract, hydroxyethylcellulose extract, hydroxyethylcellulose, lactic acid, salicylic acid of natural origin, colloidal silver acid of natural origin, colloidal silver

Recommended use:
NOVAGard Green® EAR CARE (for dogs and cats) is dripped daily into the outer ear (1 - 2 drops) as a preventive measure or it can be rubbed into the outer ear with a cotton ball. Use the product sparingly. Please avoid contact of the pipette with the animal's skin or the surface of the cotton swab.

As a supplement, ***NOVAGard Green® EAR CLEANER*** (for dogs and cats) is used several times a week for mite infestations and at least every 14 days as a preventative measure.

DRY CARE FOAM

Retail sizes:

4 260118 880246

Art.-No. NG0113
200 ml
Dispenser bottle

Whether in fall, winter, spring or summer rain - our dogs and outdoor cats often come home with dirty coats. They are dirty, smelly and leave dirt in the house.

Long-haired dogs in particular leave sand and mud on their bellies, legs and necks. An alternative to bathing is particularly important when traveling. Too frequent bathing is not good for the balance of skin and coat. ***NOVAGard Green® DRY CARE FOAM*** (for dogs and cats) is the perfect alternative for "quick cleaning in between". Especially after a long walk, you can clean the dog quickly before getting into the car, because simply drying the wet coat is not a real alternative. The typical "wet dog smell" soon develops and this can also be a problem in the car. Non-pet owners may be sensitive to these odors.

Cats are normally very clean animals, but supportive hygiene can also be an advantage for an outdoor cat. Even if a cat is no longer able to clean itself for health reasons, this product offers excellent support. Many cat owners know that bathing a cat is not easy. ***NOVAGard Green® DRY CARE FOAM*** (for dogs and cats) has been specially developed for this purpose and its quick and easy handling makes it particularly suitable for the additional care and cleaning of cats.

NOVAGard Green® DRY CARE FOAM (for dogs and cats) offers a simple, convenient and above all quick solution.

Ingredients: Mild, nature-identical cosmetic foam base (including vegetable glycerine, sugar surfactants, natural emulsifier, natural moisturizing factor), colloidal silver (prevents the development of inflammatory processes and has an antibacterial effect)

Recommended use: A mild, excellently tolerated cosmetic foam base that is very economical to use and cares for the coat and skin. Apply a walnut-sized portion of ***NOVAGard Green® DRY CARE FOAM*** (for dogs and cats) to the palm of your hand and lather the area to be cleaned thoroughly. After about 30 seconds, rub the foam out of the coat with a towel. Brush again if necessary. A little colloidal silver reliably prevents odors. The dog is clean, groomed and odor-free in 60 seconds.

The foam is also suitable for sensitive dog skin and can therefore be used if it is no longer possible to bathe the dog or clean the cat independently for reasons of age or health.

ANTI-ODOR

Against urine odor for use in and around the litter box for hygiene and a fresh scent in your pet's environment!

The subtle and fine fragrance reliably binds odors without irritating the sensitive noses of cats and dogs. ***NOVAGard Green® ANTI-ODOR*** (for dogs and cats) is an odor absorber that can be used especially in and around the litter box. Thanks to the fine spray head, even the clumping litter can be sprayed without forming lumps.

Bad odors from the litter box are a thing of the past. The litter tray can also be sprayed with ***NOVAGard Green® ANTI-ODOR*** (for dogs and cats) after cleaning before the new litter is added. ***NOVAGard Green® ANTI-ODOR*** (for dogs and cats) has also proved very effective as an air freshener around the litter tray. The odor-binding effect is long-lasting.

The delicate lavender note creates a fresh, clean impression that both humans and animals appreciate. Resting places for dogs and cats in the house and in the car also benefit from treatment with ***NOVAGard Green® ANTI-ODOR*** (for dogs and cats).

Ingredients: Water, propanediol, odor absorber, fragrance, colloidal silver

Recommended use: ***NOVAGard Green® ANTI-ODOR*** (for dogs and cats) is suitable for treating upholstery, textiles and surfaces and especially for litter in the cat toilet. Spray the surface to be treated from a distance of 30 cm. Use sparingly, soaking the surfaces to be treated is unnecessary. When using as an air freshener, spray one or two short bursts of ***NOVAGard Green® ANTI-ODOR*** (for dogs and cats) into the air. For sensitive surfaces, carry out an application test in an inconspicuous place.

Canina®

PRODUCTS FOR

CARE & HYGIENE

PETVITAL® EYE WIPES

Disposable wet wipes for cleaning and caring for the eyes
The wipes are soaked in an eye-friendly solution. They are therefore ideal for the care and cleansing of the eyes, particularly the eyelids.

Composition: Aqua, Propylene Glycol, PEG-60 Hydrogenated Castor Oil, Parfum, Diazolidinyl Urea, Sodium Benzoate, PEG-40 Hydrogenated Castor Oil, Potassium Sorbate, Trideceth-9, Aloe barbadensis Extract, Cocamidopropyl Betaine, Polysorbate-20, Dimethicone, Hamamelis virginiana Extract, Citric Acid, Sodium Sulfite

Application:
1) Open the lid of the tin.
2) Remove the silver foil.
3) Insert the end of the roll of cloth into the opening in the flap.
4) Close the tin.
5) Pull the wet wipe out of the opening up to the tear-off point, then tear it off at a right angle.

EYE CARE LOTION

Retail sizes:

4 027565 140008 Art.-No. 140008
100 ml

- for cleaning and caring for the eyes and the area around them (removal of tear stains and discharge)
- prevents irritation caused by dirt and dust

Composition: Demineralised water, sodium hydrogen phosphate dodecahydrate, dihydrate, heptahydrate

Application: Use a fresh, lint-free pad for each eye. For external use on the eye. Removes dirt, dust, tear stains and secretions.

Do not use on animals intended for food production.

Please note: Cut off the tip of the dropper before using it for the first time.

EAR BALM

Retail sizes:

4 027565 140305 Art.-No. 140305
100 ml

Ear care lotion for dogs and cats

What distinguishes this product:
- cares for and cleans safely and quickly
- desodorises in a soothing way
- contributes to the animal's hygiene
- easy to use

Composition: Isopropyl Alcohol, Glycerin, Arnica Montana Flower Extract

Application: Apply a few drops of ***EAR BALM*** into the ear and massage gently from the bottom upwards for approx. 1 minute. The animal will shake out any excess ***EAR BALM*** itself, along with loosened earwax and dirt. There is no need to dry the area, as the product evaporates quickly.

If used regularly, approximately twice a week, you can prevent your ears from becoming blocked.

Shake well before use! Do not use on irritated ears!

Please note: Cut off the tip of the dropper before using it for the first time.

SKIN CARE SPRAY

Skin care spray for dogs, cats, horses, rodents, birds and reptiles
The spray is used to care for the skin in cases of skin irritation, minor injuries and skin barrier disorders. It provides soothing support during the skin's regeneration process in cases of irritation or bald patches. It can be sprayed directly onto damaged skin without causing a stinging sensation.

Ingredients: Purified water, colloidal silver 25 ppm

Recommended use: The skincare spray containing colloidal silver can be applied to the affected areas of skin several times a day and is suitable for people with allergies.

DENTAL CAN

Dental care product
Regular daily use of **Canina®** ***DENTAL CAN*** helps to prevent halitosis. It is now estimated that 95% of all dogs over the age of five suffer from this problem.

Composition: Chamomile extract, peppermint oil, benzalkonium chloride, thymol, sage tincture

Application: Place the nozzle into the corner of the mouth and, by pressing the bottle briefly, squirt a small amount of **Canina®** ***DENTAL CAN*** into the corner of the mouth. Do not spray into the throat. Then massage the relevant side of the mouth briefly.

Repeat the process on the other side. Treatment using a small sponge or a toothbrush is also very effective.

Use daily if possible, after the last feeding.

MICROSILVER DENTAL GEL

Retail sizes:

4 027565 742639 Art.-No. 742639
50 ml

Dental care product
Canina® ***MICROSILVER DENTAL GEL*** with grapefruit seed extract counteracts the main problems of oral hygiene in dogs and cats, such as plaque, tartar and gingivitis.

The tooth-cleaning effect is based on a gentle formula containing microsilver and grapefruit seed extract. When used regularly, it effectively prevents the build-up of new tartar. It is safe to ingest.

The bioflavonoids in grapefruit seed extract have an antioxidant effect. They help to protect the teeth from attacks by plaque-causing bacteria. The vitamin C contained in the product supports healthy gums, whilst the amino acids and fatty acids from the grapefruit seed extract help break down plaque.

Composition: Aqua, Polyglyceryl-4-Caprate, Carbomer, Potassium Sorbate, Silver, Sodium Hydroxide, Sodium Phosphate, Glycerin, Citrus Grandis (Grapefruit) Seed Extract

Areas of use: The gel should be applied daily, ideally in the evening, one hour after eating, to the outer surfaces of the upper molars and gums using the index finger.

Dosage per application (strip of gel on the index finger per side):

Dogs up to 10 kg:	1 cm gel
Dogs from 10 up to 20 kg:	2 cm gel
Dogs from 20 up to 30 kg:	3 cm gel
Dogs over 30 kg:	4 cm gel (maximum)
Cats:	½ cm gel

MICROSILVER EAR WASH

Retail sizes:

4 027565 742615 Art.-No. 742615
100 ml

Gentle ear cleaner with elemental silver particles
Canina® ***MICOSILVER EAR WASH*** gently cleanses sensitive ears without irritating the ear mucosa.
Thanks to the special formulation, even deeply embedded dirt is loosened from the innermost parts of the ears, allowing the dog or cat to shake it out themselves. Moisturising agents gently care for the outer ears; the natural microflora of the ear mucosa is supported. The elemental silver particles remain on the skin and have a positive effect on the natural skin flora.

When used regularly, **Canina®** ***MICROSILVER EAR WASH*** helps to keep ears healthy; it is ideal when used in combination with **Canina®** ***MICROSILVER EAR LIQUID***.

Composition: Aqua, Glycerin, Propylene Glycol, Polyglyceryl-4 Caprate, Salicylic Acid, Benzyl Alcohol, Sclerotium Gum, Sodium Hydroxide, Lemon Peel Oil, Limonene, Chlorhexidine Digluconate, Silver, Citral

Recommended use: Drip a few drops into the auricle and gently massage into the ear. Then clean the pinna with a lint-free cloth. The rinse loosens the dirt deep within the ear and the dog or cat will shake it out themselves by shaking their head. With **Canina®** ***MICROSILVER EAR LIQUID***, ears can be cleaned up to three times a week.

Canina® ***MICROSILVER EAR WASH*** should be used before applying the nourishing **Canina®** ***MICROSILVER EAR LIQUID***.
Please note: Cut off the tip of the dropper before using it for the first time.

MICROSILVER EAR LIQUID

Retail sizes:

Art.-No. 742608
50 ml

4 027565 742608

Soothing ear drops containing elemental silver particles, specially formulated for the care of the delicate ear canal lining
Contaminated and irritated areas of skin in the external ear canal are particularly uncomfortable for dogs and cats. They scratch their ears, shake their heads more frequently and show their discomfort by tilting their head to one side. **Canina®** ***MICROSILVER EAR LIQUID*** is particularly suitable for the care of stressed, irritated ears. The elemental silver particles soothe redness, strengthen the natural skin barrier of the sensitive ear mucosa and support the physiological microflora, making it more difficult for potential pathogens to attack the skin and become deeply embedded. Your pet's well-being improves, and after just a few cleaning and care cycles, the animals stop scratching their ears.

When used regularly, **Canina®** ***MICROSILVER EAR LIQUID*** helps to keep ears healthy; it is ideal when used in combination with **Canina®** ***MICROSILVER EAR WASH***.

Composition: Aqua, Glycerin, Propylene Glycol, Polyglyceryl-4 Caprate, Panthenol, Acrylates Copolymer, Benzyl Alcohol, Ethylhexylglycerin, Silver, Lemon Peel Oil, Limonene, Sodium Hydroxide, Citric Acid, Citral

Recommended use: Apply a few drops into the ear and gently massage them into the ear. **Canina®** ***MICROSILVER EAR LIQUID*** is designed to have a long-lasting effect in the ear, so do not remove it!

Before use, apply **Canina®** ***MICROSILVER EAR WASH*** to remove dirt and stubborn crusts from the ear mucosa, so that the ear liquid can reach and nourish the mucous membranes of the ear. **Canina®** ***MICROSILVER EAR LIQUID*** can be used up to three times a week.

Please note: Cut off the tip of the dropper before using it for the first time.

MICROSILVER SET: EAR LIQUID + EAR WASH

Retail sizes:

Art.-No. 742622

INTIM CLEAN HYGIENIC WIPES

Retail sizes:

Art.-No. 740031
1 Package
(25 Tissues)

Art.-No. 740048
Display
(4 x 25 Tissues)

For gentle cleaning of the anal and intimate area of the dog or cat. Easy to remove using the resealable adhesive tab.

Practical for on the go, especially for:
- Diarrhoea or softer faeces
- Heat cycle – for quick cleaning
- Gentle support when cleasing the anal glands

How to use: Open the tab, remove the hygienic wipe and close the tab again to protect the remaining wipes from drying out. Use the damp wipe to carefully clean the anal or intimate area. Wipes must only be used once and disposed of in household waste.

Composition: Aloe vera, panthenol (moisturising)

WITHOUT: Silicones, parabens, paraffin, sodium, laureth, sulphates and PEGs

Ingredients: Aqua, Cocamindopropyl Betaine, Propylene, Glycol, Phenoxyethanol, Aloe Extract, Polyaminopropyl Biguanide, Anthemis Nobilis Flower Extract, Glycerin, Parfum, Ethylhexylglycerin, Panthenol, Tocopherol, Citric Acid

CANILIND

Retail sizes:

Art.-No. 140404
50 ml

Art.-No. 140442
200 ml

Hydroactive emulsion based on Aloe barbadensis
The juice from the leaves of the aloe vera plant is known for its skin-soothing properties. The carbohydrates (acemannans) and amino acids it contains support the skin's natural functions. Thanks to its hydrophilic properties, **Canina®** ***CANILIND*** penetrates deep into the skin and promotes its regeneration.

Canina® ***CANILIND*** allows the skin to 'breathe' by letting oxygen from the air pass through, whilst also protecting it from harmful external influences.

Composition: Aloe Barbadensis gel 10%, neutral ointment base, glycerine, water

Free from preservatives and fragrances.

Areas of application: For insect bites, tick bites, mechanical damage to the skin such as grazes and cuts, and for non-specific itching.

Method and duration of use: Apply to the affected areas 2 to 3 times a day and massage in gently. Use for several days.

EYE CARE

Retail sizes:

Art.-No. 750009
10 ml

4 027565 750009

Eye care for dogs and cats
Canina® ***EYE CARE*** cleanses and soothes sticky, watery eyes in dogs and cats. It helps to soothe irritated eyes. As a cosmetic care product, it is very well tolerated.

Application: Apply a few drops to the eye. This can be done several times a day.

Ingredients: Deionised water, sodium hyaluronate, colloidal silver, retinol palmitate in phosphate buffer

Safety instructions: Do not use the product if the bottle is damaged. Reseal the bottle after use. Avoid direct contact between the bottle opening and the eye. Use the bottle within 6 weeks of opening. If inflammation or allergic reactions persist, contact your vet.

If accidentally swallowed, do not induce vomiting. Consult a doctor or vet, referring to the label!

FOAM BAR – SOLID SHAMPOO

Retail sizes:

Art.-No. 742806
100 g

4 027565 742806

Canina® ***FOAM BAR*** is a vegan, palm oil-free soap specially formulated to match the pH value of your pet's skin (pH 9 – 10).

This solid shampoo contains high-quality Greek olive oil, which nourishes the skin with replenishing ingredients.

Chamomile tea and calendula tea extracts gently cleanse the skin and coat, making it ideal for sensitive skin. **Canina®** ***FOAM BAR*** has a subtle scent, ensuring even sensitive pet noses enjoy bath time.

By using this solid shampoo, you care for your pet in an environmentally conscious way with a small ecological footprint.

Canina® ***FOAM BAR*** was developed in collaboration with veterinarians and manufactured in Germany.

Ingredients: Sodium Olivate, Sodium Cocoate, Sodium Stearate, Water, Rosmarinus Officinalis Leaf Oil, Calendula Officinalis Flower Extract, Chamomilla Recutita Flower Extract, Glycerine, Sodium Chloride, Tetrasodium Glutamate Diacetate, Rosmarinus Officinalis Leaf, Clay, Limonene, > 30% soap, < 5% anionic surfactants
Other ingredients: Aqua, Glycerin, Sodium Chloride, Sodium Thiosulphate

Retail sizes:

DOG STOP FORTE TABLETS

Complementary feed
The special blend of chlorophyll from stinging nettle and B vitamins from yeast in ***DOG STOP FORTE TABLETS*** helps to neutralise body and mouth odours. Stinging nettle acts as an internal deodorant and eliminates unpleasant mouth and body odours without causing any discomfort to the dog.

The yeast contained in the product also supports coat quality and vitality and has a positive effect on the nervous system. The calcium carbonate contained in the product strengthens the teeth and skeletal system, and as a source of calcium, plays a role in muscle function.

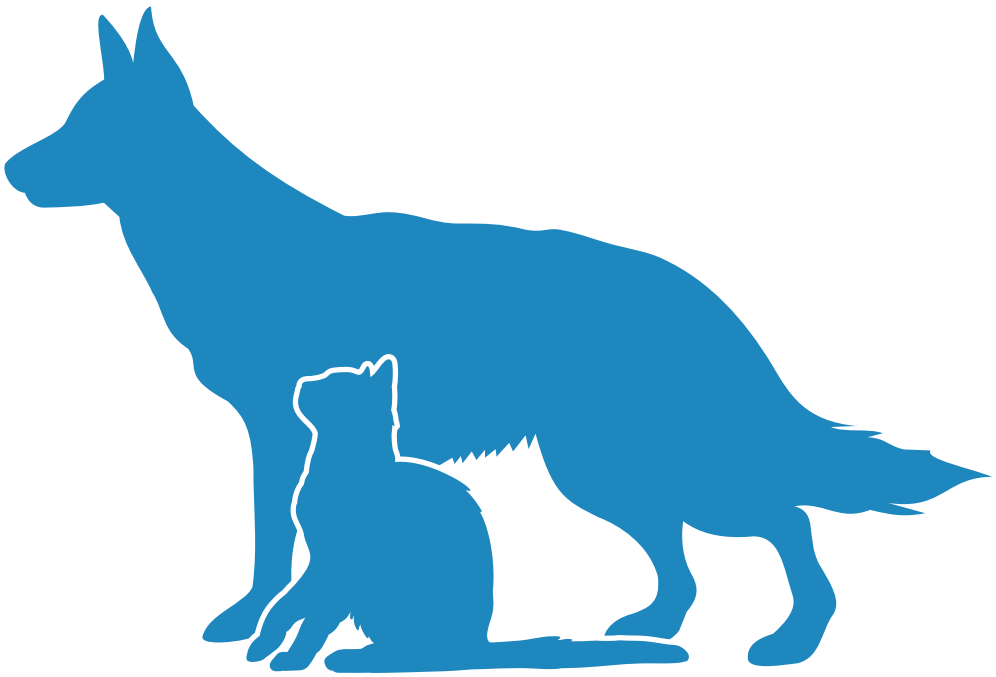

Composition: Yeast, stinging nettle, powdered cellulose, calcium carbonate, talc

Ingredients: Crude protein 36.9%, crude fibre 9.2%, crude fat 2.6%, crude ash 13.3%

Feeding recommendation per animal and day:
At the first signs of oestrus and throughout the entire oestrus cycle:
Dogs: 3 tablets per 10 kg of body weight, mixed with food or given as a treat; maximum 12 tablets
Cats: 1 tablet, up to 2 tablets

If your pet has an unpleasant mouth or coat odour:
Dogs: 2 tablets per 10 kg of body weight
Cats: 1 tablet

The tablets can also be used in breeding bitches and queens, as they do not impair the physiological process of heat and fertility. Discontinue two days before a planned mating.

DOG STOP SPRAY

DOG STOP SPRAY should be applied several times a day at the first signs of the heat cycle. Spray the rear parts of the dog or cat's body, the inside of the hind legs and the base of the tail thoroughly from all sides. These areas are particularly affected by the secretions produced during the heat cycle and therefore smell unpleasant. ***DOG STOP SPRAY*** cares for these areas and eliminates the odour.

The product should be used throughout the entire heat cycle. It is best used in combination with ***DOG STOP SPRAY*** (which help prevent the development of the scent associated with the heat cycle).

For best results, ***DOG STOP SPRAY*** must be applied regularly and at the right time. Do not spray into the eyes or on the nose.

DOG STOP SPRAY can also be used:
- before walks
- at exhibitions
- in the presence of male dogs/tomcats

Composition: Isopropyl alcohol, paraffinum liquid, butylene glycol, eucalyptus oil, isobornyl-acetate, p-chloro-m-cresol

Application: Pressurised spray without propellant gas. Shake briefly before use. After each application, turn the bottle upside down and spray the valve until empty. To prevent unwanted marking, spray the affected areas repeatedly with ***DOG STOP SPRAY***. The strong scent of eucalyptus prevents further marking.

Note: Contains eucalyptus oil and chlorocresol. May cause allergic reactions.

CAPHA® ANIMAL CARE BALM

Retail sizes:

4 027565 140329 Art.-No. 140329 **25 ml**

4 027565 140336 Art.-No. 140336 **100 ml**

Balm for the care of dogs, cats, horses, rodents and birds
The ***ANIMAL CARE BALM*** is used for nourishing care and as an adjunct to treatment, for example on heavily stressed, flaky or thickened skin. It is also ideal for the special care of mucous membranes and gums. In birds, it has proven effective when applied to the legs and beak.

Composition: 3% chamomile flower extract, 15% sage leaves in paraffin

Application: For the skin: Apply a few drops to the affected area and rub in. Shave hairy areas beforehand. For birds, it is best to use cotton buds; avoid contact with the plumage and remove any sandy or dusty bedding. **For mucous membranes (e.g. gums):** For small pets, cats and small dogs, apply 1 to 2 drops using a cotton bud; for larger dogs, apply 3 to 6 drops using a cotton bud, a lint-free cloth or your fingertip, and spread evenly.

Instructions for use: Unless otherwise advised by your vet: 1 - 3 times a day.

MINERAL SPRAY

Retail sizes:

4 027565 742400 Art.-No. 742400 **250 ml**

Mineral spray with propolis for all pets
Canina® ***MINERAL SPRAY*** contains valuable minerals from the Dead Sea, such as calcium, magnesium, sodium, iron and bromine, in particularly high concentrations. They support natural skin health and have a soothing effect on skin irritation, redness and itching.

Propolis, the bees' resin, supports the skin's natural defences and helps it to regenerate after minor injuries. The synergistic effect of salts and propolis optimises the skin's cell-renewal process and preserves its natural acid mantle.

Composition: Aqua, Maris Sal, Propolis

Hazard information: Avoid contact with the eyes, nose, and ear canal. In rare cases, allergic reactions may occur. Keep out of reach of children.

Recommended Use: Spray the affected areas of skin at least 3 times a day until the skin has fully recovered. Shake well before use. For external use only.

PAW BALM

Water-free paw balm for protection and care
Features: A dog's sensitive paws are particularly stressed during the summer and in the cold season. Heat and cold dry out the paw pads, which can become cracked and hard. Road salt draws moisture from the sensitive skin of the paw pads - making them lose their elasticity and become prone to injury.

Canina® ***PAW BALM*** provides optimal protection for sensitive dog paws against heat, dryness, wetness, cold, snow, and road salt. Because the product is water-free, the paws cannot freeze, as no watery film forms around the paw pads. Instead, the beeswax in the formula forms a protective layer on the pads and in the interdigital skin, preventing moisture, salt, or dirt from penetrating. Apricot kernel oil and shea butter nourish and soften the pads, maintaining their elasticity; this helps prevent cracks and minor injuries.

Canina® ***PAW BALM*** prevents ice from forming between the toes, allowing dogs to walk long distances in snow and ice without any problems. This is especially important for sled dogs, hunting dogs and rescue dogs on duty.

The tea tree oil and neem oil in **Canina®** ***PAW BALM*** prevent dogs from licking and chewing their paws and help care for the skin on their paw pads, thereby preventing mechanical irritation.

Composition: Petrolatum, Paraffinum liquidum, Butyrospermum parkii Butter Extract (shea butter), Mineral Oil, Polyethylene, Zinc Oxide, Cera Alba (Beeswax), Prunus Armeniaca Kernel Oil (Apricot Kernel Oil), Hydrogenated Vegetable Oil, Nylon-12, Azadirachta Indica (Neem Oil), Melaleuca Alternifolia Leaf Oil (Tea Tree Oil), Tocopherol (Vitamin E)

Areas of application: Canina® ***PAW BALM*** prevents paw pads from drying out and helps prevent cracks caused by moisture, cold, ice, and snow. It also protects your dog's paws from road salt and in particular, from dry paw pads during hot summer weather.

Method and duration of use: Apply **Canina®** ***PAW BALM*** to clean paw pads before every walk using a cloth or your hands. Massage it into the skin between the pads as well. **Canina®** ***PAW BALM*** can also be used for care after spending time outdoors.

Retail sizes:

FINE GLOSS SPRAY

Retail sizes:

4 027565 742004

Art.-No. 742004
200 ml

Canina® ***FINE GLOSS SPRAY*** – the perfect finishing touch for a naturally silky sheen. **Canina®** ***FINE GLOSS SPRAY*** is especially suitable as a "finishing touch" at dog shows.

Each individual hair is coated with a protective film that prevents dirt from sticking to it right away. The hair stays clean longer and becomes soft, light, and shiny. **Canina®** ***FINE GLOSS SPRAY*** is suitable for daily use and for all hair types.

Composition: Paraffin oil, isopropyl myristate, caprylic/capric glycerides, PPG-3 benzyl ether myristate, ethylhexyl stearate, fragrance, BHA, BHT

Application: **Canina®** ***FINE GLOSS SPRAY*** should be sprayed sparingly onto dry or damp hair (after washing) and should not be rinsed out.

Special Note: In rare cases, allergic reactions may occur. Do not spray into the eyes, nose, or open wounds! Keep out of reach of children.

MINERAL SHAMPOO

Retail sizes:

4 027565 742509

Art.-No. 742509
200 ml

pH-balanced mineral shampoo
Canina® ***MINERAL SHAMPOO*** contains valuable minerals from the Dead Sea - such as calcium, magnesium, sodium, iron, and bromine - in particularly high concentrations. These minerals support natural skin health and help soothe irritation, redness, and itching.

The skin is cleansed of dandruff, dead skin cells and organic matter, which are responsible for unpleasant body odor. The coat becomes easy to comb, full-bodied and shiny.

Ingredients: 5 - 15% anionic surfactants, < 5% amphoteric surfactants, < 5% nonionic surfactants, fragrances (LINALYL ACETATE, TRIMETHYLBENZENEPROPANOL), preservatives (PYRITHIONE SODIUM (INNM) (2), BENZISOTHIAZOLINONE)

Composition: AQUA, SODIUM LAURETH SULFATE, DISODIUM LAURETH SULFOSUCCINATE, MARIS SAL, COCAMIDOPROPYL BETAINE, BETAINE, TRIDECETH-9, SODIUM CAPROYL / LAUROYL LACTYLATE, SODIUM CHLORIDE, HYDROXYPROPYL GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE, PANTHENOL, PEG-5 ETHYLHEXANOATE, COCAMIDE DEA, PARFUM, GLYCERIN, SODIUM LACTATE, SODIUM BENZOATE, POTASSIUM SORBATE / SODIUM BENZOATE, CITRIC ACID, CI 42090

Recommended use:
Apply the shampoo evenly to wet hair and massage it in; let it sit for about 5 minutes, then rinse thoroughly.

Suitable for daily use. Also suitable for puppies 8 weeks of age and older. For external use only. Avoid contact with the eyes, nose and ear canal. In rare cases, allergic reactions may occur.

OAT MILK SHAMPOO

Retail sizes:

Art.-No. 741915
100 ml

4 027565 741915

Wheat protein and oat extract for gentle care of sensitive skin and delicate coats. The proteins in the shampoo bind to the keratin in each hair strand and coat them with a light, non-weighing protective layer.

Canina® ***OAT MILK SHAMPOO*** contains no artificial silicones or mink oil, in order to protect this species.

The pH level of this gentle shampoo is between 7 and 7.5, making it suitable for the skin of dogs and cats and helping to maintain a healthy skin microbiome.

Mild cleansing agents remove dandruff, dead skin cells, and organic matter from the coat and skin, which are responsible for unpleasant odors. The coat becomes soft, easy to comb, shiny and supple. Since the shampoo has only a very subtle scent of its own, it is well tolerated by dogs and cats.

Ingredients: Aqua, Sodium Laureth Sulfate, Cocamidopropyl Betaine, Cocamide DEA, Sodium Chloride, Propylene Glycol, Glycol Distearate, Parfum, Citric Acid, Hydrolyzed Wheat Protein, Disodium EDTA, Avena Sativa (Oat) Kernel Extract, CI 18820, CI 18050, Phenoxyethanol, Methylchloroisothiazolinone, Methylisothiazolinone

Ingredients in accordance with Regulation (EC) No 648/2004: ≥ 5% – < 15% non-ionic surfactants, < 5% amphoteric surfactants, fragrances (HEXAMETHYLINDANOPYRAN), preservatives (METHYLCHLOROISOTHIAZOLINONE, METHYLISOTHIAZOLINONE, 2-PHENOXYETHANOL)

Labelling in accordance with Regulation (EC) No 1272/2008 (CLP): EUH208 Contains a reaction mixture of 5-chloro-2-methyl-2H-isothiazol-3-one [EC No. 247-500-7] and 2-methyl-2H-isothiazol-3-one [EC No. 220-239-6] (3:1). May cause an allergic reaction.

Application: Apply the ready-to-use shampoo evenly to wet hair and massage in until it lathers. Leave on for 3 to 5 minutes, then rinse thoroughly. The shampoo is suitable for puppies and kittens. For external use only.

Retail sizes:

4 027565 740086

Art.-No. 740086

PETVITAL® ORGANIC FRESH & CLEAN SHAMPOO

Gentle shampoo to combat unpleasant body odour
Thanks to innovative microbiological ingredients, ***PETVITAL® ORGANIC FRESH & CLEAN SHAMPOO*** is highly effective at combating unpleasant body odours in animals.

Performance:
- effectively and naturally eliminates the animal's natural odour for a long time
- also removes strong odours, such as those caused by a dog rolling in organic matter
- Caring for older and severely stressed animals is made significantly easier
- the coat will be clean and well-groomed

PETVITAL® ORGANIC FRESH & CLEAN SHAMPOO is very gentle on the skin and coat; it has been dermatologically tested (on humans) with a rating of "Very Good!" A veterinary medical certificate also rated it “VERY GOOD”.

Composition: Aqua, Sodium Laureth Sulfate, Cocoamidopropyl Betaine, Coco-Glucoside, Cocoamide MIPA, Laureth-4, Microorganisms Class 1, Fragrance

Application: Rinse the coat with lukewarm water, apply the shampoo and massage it in thoroughly. Let it sit for 5 to 10 minutes, then rinse. Repeat the process after one week. Use as needed. Allergic reactions are possible in rare cases.

PETVITAL® ORGANIC FRESH & CLEAN

Pet-Friendly Cleaner & Odor Remover
Areas of applications:

- Lying areas
- Kennels and enclosures
- Cat litter boxes
- Dog baskets
- Ferret enclosures
- Bird cages and aviaries
- Household: upholstery, carpets, textiles, rooms and furniture
- and much more

What *PETVITAL® ORGANIC FRESH & CLEAN* can do:

- cleans and eliminates odors effectively using microorganisms
- Urine, feces, manure, sweat, and saliva are broken down without producing any odor
- Removes strong-smelling territorial markings
- Fly infestations are greatly reduced
- Eliminates odors in drains

Ingredients: Nonionic surfactants & anionic surfactants < 5%, fragrances, dyes, benzisothiazolinone, laurylamine dipropylene diamine, 2-bromo-2-nitropropane-1,3-diol; contains microorganisms, Class 1, pH 6–7

Application: Shake well before use. For wiping, dilute 100 ml in 5 liters of water; wipe with a damp cloth; do not rinse. For spraying, dilute 100 ml in 1 liter of water. Spray onto surfaces and fabrics and let dry.

Additional information: Suitable for use around people and animals.

PETVITAL® ORGANIC FRESH & CLEAN meets the criteria for the RAL-UZ 84 eco-label for sewage treatment plant-compatible sanitary additives. It is non-toxic and non-sensitizing. The bacteria are non-pathogenic and harmless to aquatic life.

PETVITAL® ORGANIC FRESH & CLEAN has been dermatologically tested and received a rating of “Very Good.”

PETVITAL® BIOTIN-TABS

Retail sizes Tablets:

Art.-No. 702008
100 g (approx. 50 Tablets)

4 027565 702008

Complementary feed
PETVITAL® BIOTIN-TABS contain high-dose vitamin H (biotin), which has a specific effect on hair growth and hair pigments. Biotin is involved in the keratin synthesis as a coenzyme for hair growth and and claw substance. A nutritional deficiency of biotin can be manifested by increased hair loss and dry, brittle hair. The claws can become soft and brittle.

Biotin:
- For shiny, dense hair
- For strong pigments
- For firm, strong claws

How it works: *PETVITAL® BIOTIN-TABS* contain high-dose vitamin H (biotion), which has a specific effect on hair growth and hair pigments. Vitamin B_2 and nicotinic acid are important active ingredients for the function and pigmentation of the skin and hair.

Composition: Dextrose, whey, potato starch, rice flour, powder cellulose, magnesium stearate, Rapeseed oil, Mono- and diglycerides of edible fatty acids

Ingredients: Crude protein 45.0%, crude fibre 0.0%, crude fat 3.7%, crude ash 14.9%

Additives per kg: | Nutritional additives: Biotin 1,100,000 µg, vitamin B_2 350 mg, nicotinic acid 1,750 mg, choline chloride 8,060 mg

Feeding recommendation per animal and day:
1 tablet. Administer the tablets directly with the feed for 8 weeks or as a treat.

CAT-COAT TOP GEL

Retail sizes:

Art.-No. 230907
100 ml

4 027565 230907

Complementary feed
For all breeds and ages; highly palatable even for finicky cats. Biotin is needed as a coenzyme in keratin synthesis to support hair growth.
Biotin for:
- shiny, thick coat
- healthy, dandruff-free skin
- optimal pigmentation of the coat, nose and paw pads
- strong, sturdy claws

Composition: Glucose, sucrose, glycerin

Ingredients: Moisture 70.0%, crude protein 0.0%, crude fiber 0.5%, crude fat 0.2%, crude ash 0.8%

Additives per liter:
Technological additives: Sorbic acid (potassium sorbate 1k202) 2,000 mg, citric acid (1a330) 3,571 mg
Sensory additives: Yellow-orange S (2a110) 18 mg
Nutritional additives: Biotin (3a880) 333 mg, zinc as zinc oxide (3b603) 500 mg

Feeding recommendation per animal and day:
Depending on the cat's size: 1 - 2 teaspoons mixed with food over an 8-week period. (1 teaspoon = approx. 3 ml) If additional supplementation is needed, double the dosage during the first 4 weeks. Do not exceed the recommended feeding amount.

ORGANIC SEAWEED MEAL & SEAWEED TABLETS

MEAL: Feed material;
Canina® ORGANIC *SEAWEED MEAL* is made from fresh seaweed (Ascophyllum nodosum – from certified organic cultivation). Due to its high content of naturally occurring minerals, amino acids and trace elements, this high-quality natural product balances out an unbalanced diet and thanks to its iodine, zinc and carotenoid content, supports skin metabolism and the pigmentation of the coat, nose and paw pads.

The amino acid lysine in **Canina® ORGANIC *SEAWEED MEAL*** optimises feed conversion; cellulose and mannitol aid digestion. The immune system is strengthened by the high vitamin content (e.g. vitamin C), whilst fitness, performance and well-being are promoted.

Natural health – sourced from the sea!

Composition: 100% organic seaweed meal (Ascophyllum nodosum) from certified organic cultivation

Ingredients: Moisture 11.0%, crude protein 4.07%, crude fibre 5.3%, crude fat 3.13%, crude ash 25.6%, average iodine content 500 mg/kg

Feeding recommendation per animal and day:
1.5 g (1 teaspoon = approx. 7 g)
Iodine requirements for BARF / home-prepared food:
Adult cats (2–10 kg body weight): 0.04 g
Growing cats, nursing cats, outdoor cats with plenty of exercise: 0.06 g

Iodine requirements can vary depending on the region, the individual animal, the breed, the gender and the animal's activity level.

TABLETS: Feed material
Canina® *SEAWEED TABLETS*, made from fresh seaweed (Ascophyllum nodosum), are high-quality natural products.

The naturally occurring minerals, amino acids and trace elements support the skin's metabolism and the pigmentation of the coat, nose and paws.

The natural ingredients in **Canina® *SEAWEED TABLETS*** support feed conversion and digestion. They help boost the immune system, overall condition, and performance.

Natural health – sourced from the sea!

Composition: Seaweed meal (Ascophyllum nodosum)

Ingredients: Moisture 10.9%, crude protein 5.1%, crude fibre 17.0%, crude fat 2.2%, crude ash 17.3%, sodium 2.37%, calcium 1.01%, phosphorus 0.09%

Feeding recommendation per animal and day:
1 tablet
Administer with food.

CAT COAT O.K. TABLETS

Complementary feed
CAT COAT O.K. TABLETS are suitable for all cats and all ages. Thanks to their high palatability, the tablets are readily accepted even by cats with a sensitive palate. Biotin acts as a coenzyme in keratin synthesis during hair growth; hair consists largely of the protein keratin.

Composition: Inactivated brewer's yeast (Saccharomyces cerevisiae), potato starch, maltodextrin, rapeseed oil, mono- and diglycerides of fatty acids

Ingredients: Moisture: 6.4%, crude protein 42.3%, crude fibre < 0.3%, crude fat 2.2%, crude ash 9.4%

Additives per kg: | Nutritional additives:
Biotin (3a880) 118.280 µg

Feeding recommendation per animal and day:
Depending on the cat's size, give 4 - 6 tablets over a period of 8 weeks. If problems have already arisen, double the dose for the first 4 weeks.

Do not exceed the recommended feeding amount.

PETVITAL® DERM-CAPS & DERM-LIQUID

Complementary feed
The combination of evening primrose oil and salmon oil provides your pet with essential fatty acids that can help maintain a balanced skin metabolism.

The added vitamins A and E have a positive effect on the skin's barrier function and promote skin hydration and elasticity. Biotin, as a coenzyme in keratin synthesis, supports your pet's coat quality.

Zinc can help regulate the skin's sebum production and aids in protecting against harmful external influences.

So your dog can feel comfortable in its own skin again! Developed with vets.

Composition:
Caps: Evening primrose oil, salmon oil, beeswax
Liquid: Evening primrose oil, salmon oil

Ingredients:
Caps: Moisture 0.96%, crude protein 25.9%, crude fibre 0.3%, crude fat 62.7%, crude ash 0.50%, sodium 0.03%, calcium 0.01%, phosphorus 0.01%
Liquid: Moisture 0%, crude protein 0%, crude fibre 0%, crude fat 100%, crude ash 0%

Relative fatty acid composition as a % of total fatty acids:
Caps: Linoleic acid 49.0%, gamma-linolenic acid 7.3%, omega-3 fatty acids 4.7%, total polyunsaturated fatty acids 61.4%
Liquid: Linoleic acid 50.4%, gamma-linolenic acid 7.6%, omega-3 fatty acids 4.6%, total polyunsaturated fatty acids 62.9%

Additives per kg / l:
Nutritional additives:
Caps: Vitamin E (3a700) 2,300 mg, zinc as zinc bisglycinate (3b607) 1,000 mg, vitamin A (3a672a) 75 mg, biotin (3a880i) 150 µg
Technological additives: lecithins 9.46 g

Liquid: Vitamin E (3a700) 2,300 mg, zinc as zinc bisglycinate (3b607) 1,000 mg, vitamin A (3a672a) 75 mg, biotin (3a880i) 150 µg

Feeding recommendation per animal and day:
Caps: 1 capsule

Liquid: 15 drops

15 drops are equivalent to approx. 0.3 ml

Please note: Cut off the tip of the dropper before using it for the first time.

CAT-MINERAL TABS

Mineral feed
CAT-MINERAL TABS should be added to every meal, whatever you feed your cat.

When given as a daily supplement, this product provides your cat with minerals such as calcium and phosphorus to support the musculoskeletal system (bones, joints and muscles) as well as the teeth, and with trace elements and vitamins to optimise metabolism, fitness and vitality.

Seaweed enhances the colour of the coat, whilst yeast stimulates the appetite and can aid digestion.

Composition: Monocalcium phosphate, calcium carbonate, calcium-magnesium carbonate, sodium chloride, calcium-sodium phosphate, 33% inactivated brewer's yeast (Saccharomyces cerevisiae), 9% seaweed meal (Ascophyllum nodosum), powdered cellulose

Ingredients: Moisture: 3.6%, crude protein 18.5%, crude fibre 0.6%, crude fat 1.2%, crude ash 48.0%, calcium 12.0%, phosphorus 5.7%, sodium 2.8%

Additives per kg:
Nutritional additives:
Vitamin A (3a672a) 350,912 IU, Vitamin D_3 (3a671) 7,856 IU, Vitamin E (3a700) 209.5 mg, Vitamin B_1 (3a821) 62.85 mg, Vitamin B_2 (3a825i) 149.27 mg, Vitamin B_6 (3a831) 62.85 mg, Vitamin B_{12} (3a837) 733.25 µg, Niacin (3a314) 471.375 mg, calcium D-pantothenate (3a841) 471.375 mg, folic acid (3a316) 10.475 mg, iron as ferrous sulphate monohydrate (3b103) 916.5625 mg, zinc as zinc oxide (3b603) 392.8125 mg, manganese as manganese(II) oxide (3b502) 196.4062 mg, copper as copper(II) sulphate pentahydrate (3b405) 91.6562 mg, Iodine as calcium iodate, anhydrous (3b202) 3.1425 mg, Selenium as sodium selenite (3b801) 4.7137 mg

Feeding recommendation per animal and day:
5 - 8 tablets, depending on the cat's size. The dose may be doubled for pregnant or nursing cats and for growing kittens.

Vitamin D_2 must not be administered at the same time. The recommended feeding amount must not be exceeded.

VELOX JOINT ENERGY

Feed material
100% green-lipped mussel meat meal
Not defatted – with natural omega fatty acids

The concentrated power of the New Zealand green-lipped mussel (Perna canaliculus) for your four-legged friend's musculoskeletal system and performance!

Canina® ***VELOX JOINT ENERGY*** provides the musculoskeletal system with high-quality glycosaminoglycans (GAGs) derived from New Zealands green-lipped mussels. GAGs, such as chondroitin sulphate, heparan sulphate and hyaluronic acid, support connective tissue structures such as tendons, ligaments, joint cartilage and intervertebral discs. Your pet's performance is improved and their well-being is promoted.

The naturally occurring omega fatty acids make a valuable contribution to overall metabolism in general and to joint metabolism in particular. They support the physiological function of the joint cartilage by enhancing its buffering capacity.

Kitten:	For optimal development of tendons, ligaments and joints
Mother cats:	To support connective tissue during pregnancy
Older cats:	To optimise well-being and quality of life
Performance:	To improve stamina and willingness to perform

Composition: 100% green-lipped mussel meat meal (Perna canaliculus)

Ingredients: Moisture 3.4%, crude protein 57.5%, crude ash 10.75%, crude fat 9.9%, omega-3 fatty acids 3.2%, glycosaminoglycans (GAG) 3.1%

Additives per kg: None

Feeding recommendation per animal and day:
For 4 weeks or on a long-term basis, as required.

Mix just under ½ teaspoon into their feed. Use a smaller amount for kittens.

(1 teaspoon = approx. 3 g)

Stir the powder into warm water. Do not exceed the recommended feeding amount.

PETVITAL® ARTHRO-TABLETS

Complementary feed
PETVITAL® ARTHRO-TABLETS contain vitamins, minerals and dried plants. These ingredients have a beneficial effect on bone metabolism, strengthening weak joints and restoring their resilience. Ageing processes are slowed down by supporting the natural ion balance of bone tissue, whilst the elasticity of bones and tendons is increased. The plant powder contained in ***PETVITAL® ARTHRO-TABLETS*** supports the natural function of bones and joints.

Willow bark & ginger:	Used to support bones, joints and connective tissue.
Vitamin E:	Acts as an antioxidant to neutralise free radicals and functions as a vitamin that protects cells.
Vitamin B_1:	It is essential for the transmission of nerve impulses.
Iron:	Important for blood formation, oxygen transport and muscle activity.
Copper:	It plays a role in blood formation, the production of hair pigments and cartilage formation.
Zinc:	Supports cell growth and cell division.

Composition: Maltodextrin, 14% willow bark (ground), devil's claw root (ground), 5% ginger root (ground), magnesium stearate, potato starch

Ingredients: Moisture 5.6%, Crude protein 2.3%, Crude fat 0%, Crude fibre 14.7%, Crude ash 6.4%

Additives per kg: | Technological additives: Microcrystalline cellulose (1c460i) 200 g

Sensory additives: Vitamin B_1 (3a821) 7,768.80 mg, Vitamin B_{12} (3a835) 2.4651 mg, Vitamin E (3a700) 2,203.65 mg, iron(II) carbonate (3b101) 143.415 mg, manganese sulphate monohydrate (3b503) 9.945 mg, zinc oxide (3b603) 7.47 mg, copper(II) sulphate pentahydrate (3b405) 1.215 mg

Feeding recommendation per animal and day:

Kittens/young cats:	2 tablets per 10 kg of body weight (max. 12 tablets), spread throughout the day; for 1 month. Repeat after 6 months.
Adult cats:	5 tablets per 10 kg of body weight (max. 20 tablets), spread throughout the day; for 3 months. Repeat once a year.

CAT VITAMIN TABS

Complementary feed
CAT-VITAMIN TABS are tasty vitamin tablets specially formulated to meet a cat's nutritional needs.

The carrier substance is mineral yeast, which is highly palatable to cats.

These vitamins are essential, particularly for cats and kittens whose diet consists mainly of meat.

Composition: Inactivated brewer's yeast (Saccharomyces cerevisiae), potato starch, maltodextrin, rapeseed oil, mono- and diglycerides of fatty acids

Ingredients: Moisture 4.6%, crude protein 41.0%, crude fibre 0.0%, crude fat 2.7%, crude ash 11.4%

Additives per kg: | Nutritional additives:
Vitamin A (3a672a) 600,000 IU, Vitamin D_3 (3a671) 11,000 IU, Vitamin E (3a700) 2,640 mg, Vitamin C (3a300) 2,200 mg, Vitamin K_3 (3a710) 66 mg, Vitamin B_1 (3a821) 264 mg, Vitamin B_2 (3a825i) 176 mg, Vitamin B_6 (3a831) 132 mg, vitamin B_{12} as a vitamin B_{12} preparation 1,980 µg, niacin (3a314) 1,313.4 mg, calcium D-pantothenate (3a841) 323.4 mg, biotin (3a880) 11,000 µg

Feeding recommendation per animal and day:
3 - 5 tablets, depending on the cat's size. The dose may be doubled for pregnant or nursing cats and for growing kittens.

Vitamin D_2 must not be administered at the same time. The recommended feeding amount must not be exceeded.

CANIVITA

Complementary feed
CANIVITA is a palatable vitamin emulsion containing a blend of 11 essential water- and fat-soluble vitamins. ***CANIVITA*** is used to address any potential gaps in the vitamin intake of dogs and cats: during pregnancy, lactation, when dogs are subjected to extreme physical exertion, as well as a dietary supplement to home-prepared meals, whether raw or cooked, to optimise vitamin intake.

For puppies, apply 1 drop under the tongue using your finger to boost vitality.

Composition: Soybean oil, sucrose, sodium citrate

Ingredients: Moisture 54.00%, crude protein 0.01%, crude fibre 0.95%, crude fat 37.15%, crude ash 0.19%

Additives per litre: | Technological additives:
Sorbic acid (1k202) 1,050 mg, butylated hydroxyanisole (BHA) (1b320) 240 mg, propyl gallate (E 310) 240 mg

Nutritional additives:
Vitamin A (3a672b) 500,000 IU, Vitamin D_3 (3a671) 10,000 IU, Niacinamide (3a315) 4,000 mg, calcium D-pantothenate (3a841) 1,000 mg, vitamin B_2 (3a826i) 1,000 mg, vitamin E (3a700) 1,000 mg, vitamin B_1 (3a820) 600 mg, vitamin B_6 (3a831) 250 mg, vitamin K_3 (3a710) 100 mg, folic acid (3a316) 10.0 mg, vitamin B_{12} (3a837) 1,000 µg

Feeding recommendation per animal and day:
½ teaspoon (½ teaspoon = 2.5 ml)

During periods of increased stress, such as pregnancy, lactation, training or hunting, the recommended dosage may be doubled. The recommended feeding amount must not be exceeded. Vitamin D_2 must not be administered at the same time.

Please note: Cut off the tip of the dropper before using it for the first time.

PETVITAL® VITAMIN-TABS

Complementary feed
Vitamins for:

- Increased energy levels
- Improved fitness
- Support during the growth and development phase
- Reduced loss of appetite and nervousness
- A shiny coat

PETVITAL® VITAMIN-TABS have been developed to provide the necessary vitamins.

PETVITAL® VITAMIN-TABS are essential, particularly for pregnant and lactating animals, during the growth phase and when nutritional requirements are increased.

A brief guide to vitamins:

Vitamin A:	Helps build and regenerate skin and mucous membranes; plays a role in growth and fertility; supports the immune system
Vitamin D_3:	Regulates calcium and phosphorus storage
Vitamin E:	Regulation of carbohydrate and hormone metabolism
Vitamin C:	Supports the formation of connective tissue, bones and cartilage and is essential for a strong immune system
Vitamin B:	Transmission of nerve impulses, carbohydrate and protein metabolism, blood formation, growth, fat metabolism, protection of the skin and mucous membranes
Biotin:	A coenzyme involved in the formation of keratin, the protein that makes up hair

Composition: Inactivated brewer's yeast (Saccharomyces cerevisiae), monocalcium phosphate, powdered cellulose, calcium carbonate, magnesium stearate, rapeseed oil, mono- and diglycerides of fatty acids

Ingredients: Moisture 6.7%, crude protein 27.7%, crude ash 29.1%, crude fat 2.5%, crude fibre 1.5%

Additives per kg: | Nutritional additives:
Vitamin A (3a672a) 613,990 IU, Vitamin B_1 (3a821) 270.156 mg, Vitamin B_2 (3a825i) 180.104 mg, Vitamin B6 (3a831) 135.078 mg, Vitamin B_{12} (3a837) 2026.17 µg, Vitamin C (3a700) 2251.3 mg, Vitamin D_3 (3a671) 11,756 IU, Vitamin E (3a700) 2701.56 mg, Vitamin K_3 (3a710) 67.539 mg, Calcium D-pantothenate (3a841) 330.9411 mg, Niacin (3a314) 1344.0216 mg, Biotin (3a880) 11,256.5 µg

Feeding recommendation per animal and day:
1 tablet

Vitamin D_2 must not be administered at the same time. The recommended feeding amount must not be exceeded.

TAURINE POWDER

Retail sizes:

Art.-No. 229505
100 g

4 027565 229505

Feed material
TAURINE is a sulphur-containing amino acid found in all animal cells. **Cats cannot produce taurine themselves.** Taurine is **essential** (vital) for them and **must therefore be obtained from their diet.** Taurine promotes metabolism, strengthens the immune system, supports vision and heart function, and improves the condition of the skin and coat.

The brewer's yeast contained in this product provides natural nutrients that boost your cat's energy levels by stimulating energy production at a cellular level and supporting the immune system.

Composition: Inactivated brewer's yeast (Saccharomyces cerevisiae)

Ingredients: Moisture 1.7%, crude protein 62.3%, crude fibre 0%, crude fat 0%, crude ash 1.9%

Additives per kg: | Nutritional additives:
Taurine (3a370) 700 g

Feeding recommendation per animal and day:
Adult cats up to 6 kg: ½ teaspoon
Adult cats over 6 kg: 1 teaspoon
Kittens, young cats, pregnant and nursing cats: 1 teaspoon
(1 teaspoon = approx. 5 g)

The taurine powder is mixed into their daily feed.

Dry food needs to be moistened. The taurine powder is easily digestible thanks to its formula, which is perfectly tailored to cats, and is very popular with them.

Whether you feed wet, dry or a raw meat diet (B.A.R.F.), it is advisable to add ***TAURINE*** daily. It is not possible to overdose; any excess is excreted.

Retail sizes:

4 027565 712106

Art.-No. 712106
100 g

PETVITAL® ENERGY-GEL

Complementary feed
PETVITAL® ENERGY-GEL is an energy concentrate designed to quickly replenish nutrient deficiencies.

It provides valuable energy, B vitamins and vitamin E during stages of a dog or cat's life when increased nutritional requirements arise: if the animal is not eating, it supplies energy and stimulates the appetite. Weak animals begin to eat again with the help of ***PETVITAL® ENERGY-GEL***. During the growth phase of puppies and young animals, and during the pregnancy and lactation of the mother dog, it bridges nutritional gaps that may arise due to high energy requirements and high performance levels when fed a standard diet.

PETVITAL® ENERGY-GEL - the energy boost for vitality, performance and well-being!

Composition: Marine oil, sunflower oil, malt (extracted)

Ingredients: Moisture 0.7%, crude protein 1.9%, crude fibre < 0.3%, crude fat 75.9%, crude ash 6.3%

Additives per kg: | Nutritional additives:
Vitamin E (3a700) 1,000 mg, Vitamin B_1 (3a821) 200 mg, Vitamin B_2 (3a825i) 150 mg, Vitamin B_6 (3a831) 100 mg, Vitamin B_{12} (3a837) 1,000 µg, nicotinamide (3a315) 1,000 mg, calcium D-pantothenate (3a841) 500 mg

Feeding recommendation per animal and day:
½ teaspoon, max. 1 teaspoon (1 teaspoon = approx. 3 ml)

PETVITAL® ENERGY-GEL can be given either on its own or mixed with food. Shake well before use!

PETVITAL® CATLAX GEL

Complementary feed
When grooming, cats swallow hair that they are often unable to pass naturally, as their daily diet frequently lacks sufficient natural fibre (e.g. coarse-fibred grasses).

PETVITAL® CATLAX GEL transforms into a gel-like substance in the intestines, allowing swallowed hair and hairballs to be passed easily and preventing them from becoming lodged in the intestines.

This substance is not metabolised in a cat's digestive tract. It increases the faeces' ability to bind water, which makes it easier to pass.

Composition: Rapeseed oil, malt, whey powder (partially desugared), sunflower oil

Ingredients: Moisture 1.3%, crude protein 1.4%, crude fibre 0.3%, crude fat 75.6%, crude ash 5.1%

Feeding recommendation per animal and day:
Cats: 1 teaspoon 3 times a week with their feed.
Kittens: ½ teaspoon 3 times a week with their feed.

Shake well before use!

Retail sizes:

Art.-No. 712403
100 ml

4 027565 712403

PEAT EXTRACT

Retail sizes:

4 027565 112708

Art.-No. 112708
250 ml

Feed made from natural peat
The humic substances contained in ***PEAT EXTRACT*** protect the mucous membranes in the gastrointestinal tract and support the gut-associated immune system in both young and adult animals. ***PEAT EXTRACT*** for pets is a natural feed ingredient free of additives and preservatives.

Areas of use:
- To stimulate appetite
- To promote growth and strengthen the immune system
- To promote fertility in female and male animals
- To stimulate blood formation

Composition: 100 % Torf (flüssig)

Ingredients: Moisture 95.3%, crude fiber 0.9%, crude protein 0.7%, crude fat 0%, crude ash 0%

Feeding recommendation per animal and day: Shake well before use! Mix the ***PEAT EXTRACT*** with the feed before serving. Always re-seal the bottle after use.

Cats: 2,5 ml

PETVITAL® INTESTINAL-GEL

Retail sizes:

4 027565 712304

Art.-No. 712304
30 ml

Complementary feed
PETVITAL® INTESTINAL-GEL supports the intestinal flora and thus the well-being of dogs and cats thanks to the microorganism it contains.

The lactic acid-producing bacterium Enterococcus faecium survives the passage through the stomach unscathed and multiplies rapidly in the small intestine. The physiological intestinal flora is stabilised and digestion is supported. Use, for example, following a change in diet.

Composition: Sunflower oil, potato starch, sucrose, rapeseed oil

Ingredients: Crude protein 0.5%, crude fibre 0.0%, crude fat 83.0%, crude ash 5.0%

Additives per litre: | Zootechnical additives: 1 x 10^{12} CFU Enterococcus faecium strain DSM 10 663 / NCIMB 10 415 (4b1707)

Feeding recommendation per animal and day: 1 level teaspoon mixed with a small amount of food or administered directly into the mouth before meals. For 1 week or longer.

1 level teaspoon = 4 ml
(4 x 10^{9} CFU Enterococcus faecium)

PETVITAL® ACTIVATOR

Complementary feed
PETVITAL® ACTIVATOR contains bovine blood serum obtained using a special process. It helps to stimulate the appetite and support the recovery phase. Indications: For physical and mental stress such as pregnancy and lactation; for sporting and hunting dogs to optimise training performance; to promote concentration and balance.

Composition: Blood products (bovine serum), water

Ingredients: Crude protein 0.06%, crude fibre 0.00%, crude fat 0.00%, crude ash 0.07%

Additives per litre: | Sensory additives: Flavourings and appetite-stimulating substances: Ethanol: 164.4 g

Feeding recommendation per animal and day: 1 drop per kilogram of body weight, up to a maximum of 20 drops. Administer the drops with food for 4 weeks, followed by a 2-week break, then administer the drops again with food for 4 weeks at the same dosage. Repeat up to 4 times a year as needed.

HEART VITAL

Complementary feed
L-carnitine can have a positive effect on the energy supply to the heart and skeletal muscles. It can help boost your dog's or cat's vitality, energy levels and general well-being. It can help support the heart's normal function.

Composition: Dextrose, inactivated yeast, hawthorn

Ingredients: Moisture 56.0%, crude protein 4.0%, crude fibre 1.2%, crude fat 0.8%, crude ash 1.8%

Additives per l: Nutritional additives: L-carnitine (3a910) 25,374 mg

Technological additives: Potassium sorbate (1k202, calculated as sorbic acid) 3160 mg, propionic acid (1k280) 5920 mg

Feeding recommendation per animal and day:
½ teaspoon (1 teaspoon = approx. 3 ml) of ***HEART VITAL*** should be administered with feed over a period of 6 months. It is recommended that you seek advice from a vet before starting to feed this product or extending the duration of treatment.

IMMUNE BOOSTER

Retail sizes:

Art.-No. 700707
15 ml

4 027565 700707

Dietary supplement feed
Nutritional Recovery and Convalescence > High energy content and high concentration of essential nutrients

Canina® ***IMMUNE BOOSTER*** provides dogs and cats with easily digestible, readily available energy, highly concentrated vitamins, and immunoglobulins from colostrum. This is the first milk produced by the mother during and after birth. It is rich in lactoferrin and lysozyme. **Canina®** ***IMMUNE BOOSTER*** supports the body's natural defense system and optimizes the animals' recovery phase, particularly during and after physical stress such as birth (mother and offspring), training, sports, and competitions. The lactic acid-producing bacterium Enterococcus faecium in **Canina®** ***IMMUNE BOOSTER*** ensures rapid colonization with important lactobacilli. These are essential for a healthy, balanced gut flora and, consequently, for a stable intestinal immune system. **Canina®** ***IMMUNE BOOSTER*** is a tasty paste that dogs and cats enjoy. It is equally suitable for puppies/kittens through to senior animals. To support well-being and performance, **Canina®** ***IMMUNE BOOSTER*** can enhance the daily diet. The paste can also be administered during certain life stages when the daily food does not optimally meet the high demands.

Composition: Vegetable oils and fats (sunflower oil, refined), colostrum powder 20%, glucose

Ingredients: Crude protein 14.00%, crude fat 63.60%, crude fiber 0.20%, crude ash 4.00%, hydrochloric acid-insoluble ash 3.70%

Additives per kg: | Nutritional additives:
Vitamin A (3a672b) 2,210,000 IU
Vitamin D_3 (3a671) 100,000 IU
Vitamin E (3a700) 9,000 mg

Intestinal flora stabilisers: Enterococcus lactis NCIMB 10415 (4b1705i) 200 x 10^9

Energy value per 100 g: 651 kcal / 2726 kJ

Feeding recommendation per animal and day:
Cats: 0.25 ml

Recommended feeding duration:
Until a full recovery.

Feeding instructions:
The measuring aid (ring on the syringe) ensures accurate feeding for puppies from day one. It is recommended that you seek advice from a nutritionist or vet before use or if extending the feeding period. Due to the higher levels of additives compared to complete feeds, this complementary feed must only be fed to the specified animal species in accordance with the feeding guidelines.

Retail sizes:

4 027565 150007

Art.-No. 150007
200 ml

ORGANIC COCONUT OIL

Feed material
Canina® ***ORGANIC COCONUT OIL*** is a pure natural product. The virgin coconut oil is obtained through a cold-pressing process. Since it is a pure natural product, it is not refined, bleached, hydrogenated, or deodorized.

Canina® ***ORGANIC COCONUT OIL*** is rich in medium-chain fatty acids, such as lauric acid, caprylic acid, and capric acid, which are converted directly into energy rather than being stored as fat, so the coconut oil has a positive effect on metabolism. It is also recommended to help prevent worm infestations and treat existing ones.

Many pet owners also use coconut oil topically. The lauric acid in coconut oil is said to help keep unwanted pests away from pets. The medium-chain fatty acids it contains nourish the skin and coat and provide moisture. The coat becomes silky and shiny and is easy to comb.

Composition: 100% pure coconut oil, from certified organic farming

Ingredients: Moisture 0%, crude protein 0%, crude fibre 0%, crude fat 97.4%, lauric acid content 50.5%

Energy value per 100 g: 900 kcal / 3768 kJ

Feeding recommendation per animal and day:
Canina® ***ORGANIC COCONUT OIL*** can be added to regular food in either its solid or liquid form. It changes from a solid to a liquid state at temperatures above 20 °C and melts.

1 g per 5 kg of body weight, up to a maximum of 12 g

For external use: To achieve a smooth consistency, rub **Canina®** ***ORGANIC COCONUT OIL*** between your hands and then massage it into the skin and coat. Depending on the animal's size, apply a pea-sized (cat) to plum-sized amount of coconut oil (large dog) several times a week. The animal's coat should be well moistened.

CANIFLORA VITAL

Retail sizes:

Art.-No. 245000
60 g

4 027565 245000

Complementary feed for cats
Canina® ***CANIFLORA VITAL*** supports your cat's gut microbiome and thus helps maintain a balanced gut flora. This product contains an optimal blend of both lactic acid-producing bacteria and lactic acid bacteria. **Canina®** ***CANIFLORA VITAL*** can be used as a complementary treatment for gut irritation caused by various factors.

Two high-dose strains of probiotic cultures can have a positive effect on the gut immune system, which is the body's largest interconnected defence system. The prebiotics carrots, inulin, cellulose and psyllium husks provide fibre, which has a positive effect on intestinal motility and stool consistency. They serve as a source of energy for the bacteria in the large intestine and support their activity.

Canina® ***CANIFLORA VITAL*** is gluten-free and suitable for people with allergies.

Composition: Inulin (from chicory), carrots (ground), psyllium husks (ground), powdered cellulose

Ingredients: Moisture 4.5%, crude protein 6.7%, crude fibre 8.5%, crude fat 0%, crude ash 17.5%, sodium 0.10%, calcium 5.80%, phosphorus 0.15%

Additives per kg: | Zootechnical additives: Enterococcus faecium DSM 10663/NCIMB 10415 (4b1707) 2 × 10^{12} CFU, Lactobacillus acidophilus (4b1715) 2 × 10^{12} CFU

Feeding recommendation per animal and day:

Kittens and cats up to 5 kg body weight	1 g
Cats over 5 kg body weight	2 g

BW = body weight
1 measuring spoon = approx. 1 g

The powder is mixed with your pet's usual food. It can be fed for 8 weeks, or longer if necessary.

Canina® ***CANIFLORA VITAL*** can be fed to cats from kittenhood right through to old age. It is suitable for pregnant and nursing cats.

Retail sizes:

4 027565 144006	Art.-No. 144006 **100 g**
4 027565 144013	Art.-No. 144013 **300 g**
4 027565 144020	Art.-No. 144020 **1.000 g**

FIBRE MIX

Complementary feed
Canina® ***FIBRE MIX*** contains plant-based fibre sources from apples, alfalfa, peas and carrots, which enhance the daily meal. Fibre is important for maintaining a healthy gut flora; as prebiotics, it acts as food for the bacteria in the large intestine. The plant-based ingredients provide hemicellulose, cellulose, lignin and natural minerals such as magnesium and potassium.

Canina® ***FIBRE MIX*** can be added to any type of food. Even B.A.R.F. diets and home-cooked meals often lack fibre, which stimulates natural bowel movement and increases stool bulk. This dietary fibre can have a positive effect on peristalsis, stool consistency and the emptying of the anal glands.

Canina® ***FIBRE MIX*** is very well accepted, as it has a slightly sweet smell and an apple-like taste. Rapeseed oil supports a healthy metabolism thanks to its naturally occurring fatty acids.

The individual ingredients in **Canina®** ***FIBRE MIX*** work together perfectly and, when taken as a whole, enhance the product's gut-supporting effects.

Canina® ***FIBRE MIX*** is grain-free and gluten-free and contains no animal proteins. It is therefore suitable for dogs with dietary sensitivities.

Composition: Apple pomace, alfalfa meal, pea fibre, carrot pomace, linseed cake, yeast cell walls (Saccharomyces cerevisiae), brewer's yeast (Saccharomyces cerevisiae), Jerusalem artichoke, 1% rapeseed oil, calcium carbonate

Ingredients: Crude protein 11.9%, crude fat 6.3%, crude fibre 27.3%, crude ash 7.5%, phosphorus 0.25%, calcium 1.16%, sodium 0.41%, potassium 1.19%, magnesium 0.16%

Additives per kg: | Technological additives: Diatomaceous earth E551c 30 g

Feeding recommendation per animal and day:
Canina® ***FIBRE MIX*** can be added to your cat's diet from kittenhood right through to old age. It is suitable for all types of feeding (dry feed, wet feed or home-prepared meals, whether cooked or raw).

The product is also suitable for pregnant or nursing cats.

Mix the powder with a little lukewarm water in the feeding bowl and then mix it in with the usual feed.

0.3 g/kg body weight, maximum 4 g.

Always provide plenty of fresh drinking water.

CAT MILK

Milk substitute complete feed
Specialised cat milk containing biologically valuable nutrients: a nourishing food packed with energy, providing all the vitamins and minerals necessary for healthy growth.

Replacement milk for kittens from day one
- Feeding motherless kittens
- If the mother cat's milk production is insufficient
- For large litters
- Before and during lactation
- As a supplement for breeding cats
- As a supplement for ageing and sick cats

Preparation: In line with the mother cat's natural milk, the milk formula is prepared using 3 parts by weight of water (75%) and 1 part by weight of cat milk (25%). Bring the water to the boil and stir the cat milk into water at approx. 50 °C using a whisk. Prepare the milk fresh for each meal and feed it at body temperature (38 °C). Do not leave any leftover milk to stand; dispose of it.

Kittens from 1 to 14 days old should be fed every 2 hours; during the first week, offer 3 milk feeds at night as well. Kittens from 14 days old until weaning (21 to 30 days old) should be fed every 2 to 3 hours.

Composition: Coconut oil (refined), whey powder (sweetened), soya protein isolate, skimmed milk powder, whole egg powder, sodium chloride, monocalcium phosphate, salmon oil, calcium carbonate, dicalcium phosphate, maltodextrin

Ingredients: Moisture 3.20%, crude protein 30.0%, crude fibre 0.20%, crude fat 30.2%, crude ash 9.70%, sodium 1.50%, calcium 1.20%, Phosphorus 1.00%, DHA C 22:6 (Omega-3) 896.00 mg/kg, EPA C 20:5 (Omega-3) 668.00 mg/kg

Additives per kg: | Nutritional additives:
Vitamin A (3a672a) 15,000 IU, Vitamin D_3 (3a671) 1,500 IU, Vitamin E (3a700) 150 mg, Vitamin C (3a300) 50 mg, biotin (3a880) 500 µg, folic acid (3a316) 1 mg, vitamin B_1 (3a821) 5 mg, vitamin B_2 (3a825i) 10 mg, vitamin B_6 (3a831) 5 mg, vitamin B_{12} (3a835) 50 µg, niacinamide (3a315) 20 mg, calcium D-pantothenate (3a841) 20 mg, choline chloride (3a890) 1,250 mg, Iron (3b103) 50 mg, Copper (3b405) 15 mg, Zinc (3b603) 20 mg, Iodine (3b201) 3 mg, Selenium (3b801) 0.3 mg, Taurine (3a370) 100 mg

Technological additives: Lecithin, liquid (1c322i) 1,800 mg

Feeding guide for orphaned kittens (per kitten):

1. - 3. day:	10 times every 2 hours (including 3 times at night)	1 teaspoon
4. - 7. day:	10 times every 2 hours (including 3 times at night)	1 - 2 teaspoons
8. - 9. day:	10 times every 2 hours	2 teaspoons
10. day:	10 times every 2 hours	2 - 3 teaspoons
11. - 14. day:	8 times every 2 hours	4 - 5 teaspoons
15. - 21. day:	8 times every 2 hours	5 teaspoons

Vitamin D_2 must not be administered at the same time.

CELLULOSE POWDER

Feed material
Canina® ***CELLULOSE POWDER*** is derived from plant cell walls and, like starch, is a complex carbohydrate. Unlike starch, however, cellulose is not broken down but acts as a water-insoluble dietary fibre that helps cleanse the intestines.

Canina® ***CELLULOSE POWDER*** has a wide range of uses: It can help with weight management by replacing part of the usual diet with low-calorie fibre. This ensures that no excess calories are consumed, whilst the animal still feels full. For intestinal cleansing, to support bowel function and stool passage, to optimise nutrient absorption from the intestine into the bloodstream by maintaining and protecting the intestinal villi; stimulation of natural intestinal peristalsis. The improved stool consistency (firmer and bulkier) optimises the mechanical emptying of the anal glands through pressure.

For cats, **Canina®** ***CELLULOSE POWDER*** can help them pass swallowed hair more easily. When administered in conjunction with **Canina®** ***CATLAX-GEL*** from **Canina®**, it forms an ideal combination. If vegetables, fruit or fermented grains in a BARF diet are poorly tolerated or not well accepted, **Canina®** ***CELLULOSE POWDER*** replaces the dietary fibre necessary for gut health in the diet. The fibres are tasteless and odourless, very well tolerated and are therefore eaten without any problems.

Canina® ***CELLULOSE POWDER*** is suitable for all life stages, from puppies and kittens to senior pets, throughout their entire lives.

Composition: 100 % cellulose powder

Ingredients: Crude protein 0%, crude fibre 80%, crude fat 0%, crude ash 22%

Additives per kg: None

Feeding recommendation per animal and day:
0.5 g to a maximum of 1 g per kg of body weight, not exceeding 80 g. The animal should be gradually introduced to cellulose (increasing the dose to a maximum of 1 g per kg over one to two weeks).

Only dry food needs to be moistened; BARF or wet food already has a sufficiently high water content. If several meals are fed per day, the total daily amount of fibre should be spread across the individual meals.

To optimise weight, to improve stool consistency (firmer, bulkier): Replace approx. 5 to a maximum of 10% of the daily feed ration with cellulose.

It is important to note that reducing the daily food intake also reduces the amount of essential nutrients. If this is done for longer than 4 weeks, a vitamin and mineral supplement, such as **Canina®** ***CANILETTEN***, should be added to the diet to maintain a healthy metabolism and meet the animal's daily nutritional requirements.

Fresh drinking water must be available at all times to prevent blockages.

Canina®

B.A.R.F. WITH PRODUCTS FROM **Canina®**

With products from **Canina®** you can easily and simply feed your B.A.R.F. cat according to its needs - with all the vitamins and minerals your cat needs every day to stay healthy and active!

B.A.R.F. is the abbreviation for "Biologically Apperpriate Raw Food". Barfed cats are fed raw meat and bones and are also given raw vegetables, fruit in pureed form and possibly also cereals and dairy products. This natural, transparent feeding method contains no additives, colorings or other unhealthy substances. You decide for yourself what you put in your cat's food bowl.

What additional supplementary food does a barfed cat need to cover its requirements? Your cat needs calcium, other macro- and microminerals, trace elements. Vitamins and essential fatty acids for a balanced metabolism, strong bones, a healthy coat and elastic skin. Only with these food supplements will your cat remain vital, efficient and healthy!

Various B.A.R.F. options with **Canina®** products (plus feed oils for each combination):

Cat	**Canina®** Product / Combi every day	... or combination every day	Option as a cure or if required
Kitten / Young Cat	*BARFER'S BEST FOR CATS* or *EGGSHELL POWDER* (or *ALGAE LIME*) + *SEAWEED* + *CANIVITA* (3 x per week) + *TAURIN*	*CAT VITAMIN TABS* + *CAT MINERAL TABS* + *TAURIN*	*VELOX JOINT ENERGY* *ENERGY GEL*

- If possible, alternate the oils (offer variety).
- ***COD LIVER OIL*** 3 x per week is recommended for kittens and young cats.
- ***DOG IMMUN PROTECT*** is also recommended for cats (kittens, young cats).
- ***CALCINA MEAT BONE MEAL*** as a source of calcium is also possible for catsh.

BARFER'S BEST FOR CATS

Complementary feed
Canina® ***BARFER'S BEST FOR CATS*** contains all the naturally sourced vitamins and minerals, including calcium, that a cat fed a raw meat diet needs every day to meet its nutritional requirements and stay healthy and active.

Canina® ***BARFER'S BEST FOR CATS*** contains high-quality seaweed calcium as a source of calcium. The calcium in seaweed calcium is easily absorbed and essential for bone structure, teeth, claws and muscles. Calcium activates numerous enzyme systems, regulates nerve impulses and supports heart function.

Canina® ***BARFER'S BEST FOR CATS*** contains the amino acid taurine, which is essential (vital) for cats. Cats cannot produce taurine themselves. Taurine is essential for healthy heart function and supports eyesight. A prolonged taurine deficiency can lead to blindness.

Natural seaweed provides vitamins, trace minerals such as iodine and fluoride, as well as amino acids and enzymes. It helps to promote the pigmentation of the coat, nose and paw pads.

Yeast provides all other vitamins, including the B vitamins and biotin. Its high content of enzymes, minerals and trace elements boosts energy levels and general well-being, and protects the skin and hair.

Composition: Inactivated brewer's yeast (Saccharomyces cerevisiae), seaweed lime (Lithothamnium calcareum), seaweed meal (Ascophyllum nodosum)

Ingredients: Crude protein 25.1%, crude fibre 1%, crude fat 2.1%, crude ash 29.6%, calcium 8.31%

Additives per kg: | Nutritional additives:
Taurine 10,000 mg

Feeding recommendation per animal and day:

Adult cats:	1 g per kg body weight, max. 8 g
Kittens and growing cats:	1.5 g per kg body weight, max. 8 g

Body weight = body weight | 1 teaspoon = approx. 5 g

4 027565 100927	Art.-No. 100927 **2.500 g**

ALGEA LIME

Feed material
The seaweed Lithothamnium calcareum (red algae) is a natural source of calcium, magnesium and other minerals. Calcium is essential for healthy bone metabolism and strong teeth; together with magnesium, it supports muscle function and nerve health. This seaweed is also characterised by the high bioavailability of its calcium within the body.

Canina® ***ALGAE LIME*** is an alternative to other calcium sources such as meat and bone meal or eggshell powder, particularly for dogs that have intolerances to animal-based calcium sources. **Canina®** ***ALGAE LIME*** is equally suitable for kittens, adult cats, senior cats and pregnant or nursing cats. As a natural source of calcium to optimise the nutritional requirements of home-prepared cooked or raw meals (B.A.R.F.), **Canina®** ***ALGAE LIME*** is a valuable supplement, as the algae have a low phosphorus content, thereby providing a balanced calcium-to-phosphorus ratio in meat-based meals that are naturally high in phosphorus (adult animals: calcium to phosphorus ratio 1.2 to 1).

Composition: 100% calcareous algae (Lithothamnium calcareum)

Ingredients: Crude protein 0.5%, crude fibre 1%, crude fat 0.5%, crude ash 93.5%

Minerals: Calcium 34%, phosphorus 0.04%, sodium 0.73%, magnesium 2.34%, potassium 0.04%, iodine 20 mg/kg

Additives per kg: None

Guideline doses for an optimal calcium intake: (Depending on age, size, physical condition, pregnancy, lactation and feeding regime; BW = body weight)

Kittens up to 6 months old:	0.4 g/kg BW
Young cats from 7 to 12 months old:	0.3 g/kg BW
Cats from 12 months old:	0.2 g/kg BW
Pregnant cats from the 6th week of pregnancy, nursing cats (depending on the number of kittens):	0.3 g to 0.5 g/kg BW

EGGSHELL POWDER

Feed material
Canina® ***EGGSHELL POWDER*** supplies not only calcium – an essential mineral required for bone metabolism, healthy teeth and muscle function – but also other natural minerals such as magnesium, potassium, sodium, iron, copper and zinc.

Thanks to its fine grind, **Canina®** ***EGGSHELL POWDER*** is easily digestible, and its bioavailability – and thus the absorption of calcium – is very high.

For dogs that are allergic to meat proteins, such as those from beef, chicken or pork, **Canina®** ***EGGSHELL POWDER*** is a high-quality alternative to meat and bone meal.

Due to its low phosphorus and high calcium content, **Canina®** ***EGGSHELL POWDER*** is particularly suitable for supplementing raw meat-based meals (B.A.R.F.) or cooked meat dishes that are high in phosphorus and low in calcium.

Composition: 100% ground eggshell

Ingredients: Crude ash 96%, calcium 36%, phosphorus 0.1%

Feeding recommendation per animal and day:
To meet calcium requirements when feeding raw meat, tinned meat alone or cooked meat meals, without supplementing the diet with bones or meat-and-bone meal:
0.3 g per kg of body weight, up to a maximum of 2 g per animal

1 teaspoon = approx. 5 g BW = body weight

Remove with a clean, dry spoon.

BOVINE BLOOD POWDER

Feed material
Canina® ***BOVINE BLOOD POWDER*** naturally contains various minerals and trace elements. Furthermore, bovine blood provides proteins, which in turn consist of amino acids that are required for the formation of genetic material in every single cell of the body.

The addition of **Canina®** ***BOVINE BLOOD POWDER*** is particularly recommended for dogs and cats fed a raw meat diet (B.A.R.F.), as the raw meat no longer contains any blood. Due to its naturally high protein content, **Canina®** ***BOVINE BLOOD POWDER*** can help promote muscle growth.

During the growth phase, bovine blood powder helps to promote the development of a well-proportioned physique.

Dogs and cats benefit from being given **Canina®** ***BOVINE BLOOD POWDER*** following periods of intense exertion or special tasks (sporting dogs, working dogs, hunting dogs, breeding dogs and cats): it supports strength, stamina and well-being, and improves performance.

Composition: Blood products (dried whole bovine blood)

Ingredients: Moisture 4.0%, crude protein 92.0%, crude fat 0.2%, crude ash 6.0%, calcium 0.1 g/kg, magnesium 0.1 g/kg, phosphorus 0.8 g/kg, potassium 2.2 g/kg, sodium 19.4 g/kg, iron 2.5 g/kg

Additives per kg: None

Feeding recommendation per animal and day:
0.3 g per kg of body weight, up to 12 g per day

Feed as a supplement for 6 weeks. Add to the daily B.A.R.F. meal. **Canina®** ***BOVINE BLOOD POWDER*** should be mixed into the food. Dry food must be moistened with warm water.

(100 ml of fresh blood is equivalent to 12.5 g of **Canina®** ***BOVINE BLOOD POWDER***)

BEEF FAT POWDER

Complementary feed
Canina® ***BEEF FAT POWDER*** is a natural source of energy made from cooked beef fat and the resulting beef stock, with no added sugar. Dogs and cats can convert the energy from this animal fat – derived exclusively from beef – and utilise it for their bodies. Growing young animals that tend to be underweight and lose weight despite eating enough will develop more substance and build a body fit for show; pregnant and lactating animals benefit from the fat calories, including for the nourishment of their puppies (increased fat content in the mother's milk). For dogs that are physically very active (hunting, guard and sporting dogs), **Canina®** ***BEEF FAT POWDER*** should be included in their daily meal as a natural source of energy for greater strength, performance and stamina. Animals with a sensitive palate or those that are poor eaters may accept their meal more readily and develop a better appetite with **Canina®** ***BEEF FAT POWDER***, as fat is an excellent flavour enhancer.

Canina® ***BEEF FAT POWDER*** is also an excellent source of animal fat for optimising a B.A.R.F. meal; dogs fed a raw meat diet often lose weight because the meal contains too little animal fat from the meat.

Canina® ***BEEF FAT POWDER*** is tasty, easily digestible and provides energy for the whole day!

Composition: Animal by-products: 72% beef fat & 27.9% beef stock (both cooked and spray-dried)

Ingredients: Moisture 1.1%, crude protein 35.3%, crude fibre 0%, crude fat 56.9%, crude ash 6.1%

Additives per kg: | Sensory additives: Rosemary extract 1 g

Energy value: 740 kcal = 3,100 kJ per 100 g of beef fat powder

Feeding recommendation per animal and day:
½ tsp, up to 1 tsp for large cats
(tsp = teaspoon / 1 teaspoon = approx. 2 ½ g)

The powder should be mixed in with the usual food; dry food must be moistened.

COD LIVER OIL

Feed material
Canina® ***COD LIVER OIL*** is a valuable source of vitamins and rich in unsaturated fatty acids (EPA, DHA, linolenic acid), which dogs and cats cannot produce themselves.

Its natural vitamin A and vitamin D_3 content can help fill nutritional gaps in home-cooked meals and thus enhance the nutritional value of the diet.

Vitamin A is important for eyesight and the mucous membranes, whilst vitamin D_3 aids the absorption of calcium and phosphorus in the gut, thereby supporting bone development. When used daily in rotation with **Canina®** ***BARFER'S OIL***, it helps prevent potential deficiency symptoms in home-cooked meals (vitamins A, E and D_3).

Composition: 100% fish oil (cod liver oil)

Ingredients: 100% fat

Average fatty acid composition:
Saturated fatty acids 17%, monounsaturated fatty acids 53%, polyunsaturated fatty acids 30%, linoleic acid 1.5%, linolenic acid 2.0%, stearidonic acid 2.5%, eicosapentaenoic acid (EPA) 11.5%, docosahexaenoic acid (DHA) 12%

Zusatzstoffe je l: Nutritional additives:
Vitamin A (3a672b) 375,000 IU, Vitamin D_3 (3a671) 50,000 IU

Energy value per 100 ml: 831 kcal/3,415 kJ

Feeding recommendation per animal and day:
Administer 1 ml with the feed; give a smaller amount to kittens

Canina® ***COD LIVER OIL*** should be given 2 - 3 times a week. On the other days, please use one of our other feed oils as a supplement.

BARFER'S OIL

Feed material
Canina® ***BARFER'S OIL*** is made from pure, natural hemp oil, which is extracted at low temperatures and then mechanically filtered. No further processing takes place. Hemp oil provides essential fatty acids that support overall metabolism and skin health (gamma-linolenic acid). It is easily digestible and is popular due to its mild, nutty, slightly hay-like flavour.

Hemp oil is particularly rich in essential fatty acids, which dogs cannot produce themselves and must therefore be provided through their diet. It is essential for dogs fed a raw meat (B.A.R.F.) or cooked meat diet! When used in conjunction with **Canina®** ***BARFER'S BEST***, ***BARFER'S OIL*** meets their daily requirements, ensuring that their meat-based meal – whether raw or cooked – is complete.

Composition: Hemp oil

Ingredients: Fat: 100%

Average fatty acid composition: saturated fatty acids: 11%, monounsaturated fatty acids: 13%, polyunsaturated fatty acids: 76%, of which gamma-linolenic acid: 3%

Energy value per 100 ml: 900 kcal / 3.700 KJ

Feeding recommendation per animal and day: ½ teaspoon (1,5 ml) per 10 kg of body weight, up to 3 teaspoons

SALMON OIL

Feed material
Canina® ***SALMON OIL*** consists of 100% pure salmon oil and is rich in polyunsaturated fatty acids (omega fatty acids, EPA and DPA). As dogs and cats cannot produce these fatty acids themselves, they must be supplied through their diet. They are essential and indispensable for a properly functioning metabolism.

Canina® ***SALMON OIL*** supports the skin and coat and helps regulate the body's overall metabolic processes. Whatever you feed your pet, **Canina®** ***SALMON OIL***, as a high-quality feed ingredient, enhances your pet's meal.

Composition: 100% salmon oil

Ingredients: crude fat 99 %

Fatty acid composition: Free fatty acids 1.5%, saturated fatty acids 17%, polyunsaturated fatty acids 56%, monounsaturated fatty acids 27%, total omega-3 fatty acids 14%, total omega-6 fatty acids 11%, eicosapentaenoic acid (EPA) 2%, docosahexaenoic acid (DHA) 3%, docosapentaenoic acid (DPA) 1%

Additives per litre: none

Energy value per 100 g: 823 kcal/3,419 kJ

Feeding recommendation per animal and day:
Mix 1 ml with the food; give a smaller amount to kittens

MARINE OIL BLEND PREMIUM

Complementary feed
Canina® ***MARINE OIL BLEND PREMIUM*** is a specially formulated blend of high-quality edible oils, which complement each other perfectly in their beneficial effects on the entire body.

Natural marine omega-3 oil is rich in unsaturated fatty acids (EPA, DHA), which are essential for dogs and cats; these must be obtained from their diet, as the animals cannot produce them themselves. Naturally occurring vitamins, antioxidants and phytochemicals support bone and skin metabolism, vision, growth and cell protection, and have a positive effect on metabolism.

Whatever you feed your pet, **Canina®** ***MARINE OIL BLEND PREMIUM*** enhances every meal. Used in rotation with **Canina®** ***BARFER'S OIL***, **Canina®** ***SALMON OIL*** or **Canina®** ***COD LIVER OIL***, **Canina®** ***MARINE OIL BLEND PREMIUM*** completes the B.A.R.F. meal.

Composition: Fish oil (with a natural content of omega-3 fatty acids from mackerel, sardines, anchovies, cod, herring, capelin and tuna), walnut oil, argan oil, rosehip seed oil

Ingredients: crude fat 100 %

Average fatty acid composition: Eicosapentaenoic acid (EPA) 11.6%, docosahexaenoic acid (DHA) 7.6%, linoleic acid 4.7%, linolenic acid 18.6%

Energy value per 100 ml: 822 kcal/3,438 kJ

Feeding recommendation per animal and day: Mix 1 ml with the food; give a smaller amount to kittens

Canina®

PRODUCTS FOR

BIRDS

PETVITAL® BIRD POWER

Feed for large parakeets, parrots, ornamental birds and songbirds

Recommended daily dosage per animal in 100 ml of drinking water:
Small birds (canaries and budgerigars): 3 - 5 drops.
Larger birds, depending on size: 5 - 10 drops in their feed or drinking water.

Dosage: Administer for 4 weeks, then repeat the treatment for a further 4 weeks. Do not exceed the recommended feeding amount.

Composition: Blood products (bovine serum), water

Ingredients: Crude protein 0.06%, crude ash 0.07%, crude fibre 0.00%, crude fat 0.00%

Additives per litre: | Sensory additives:
Flavourings and appetite-stimulating substances: Ethanol: 164.4 g

Retail sizes:

Art.-No. 731305
15 ml

4 027565 731305

MOULT STOP

Feed material
Contains amino acids from bovine blood serum to meet the increased protein requirements during moulting.

Possible consequences of an amino acid deficiency:
brittle feathers, feather loss, weakened immune system, reduced performance, loss of fitness

Feeding recommendation per animal and day:
Pet birds (canaries, budgerigars): 5 drops
Parrots, large parakeets: 10 drops

With their food or drinking water, during the moulting season. Do not exceed the recommended feeding amount.

Composition: Blood products (bovine serum), water

Ingredients: Crude protein 0.06%, crude fibre 0.00%, crude fat 0.00%, crude ash 0.07%

Additives per litre: | Sensory additives:
Flavourings and appetite-stimulating substances: Ethanol: 164.4 g

PETVITAL® VITAL VITAMINS FOR BIRDS

Retail sizes:

4 027565 713301 Art.-No. 713301 **50 ml**

4 027565 713318 Art.-No. 713318 **100 ml**

Complementary feed
For the prevention and treatment of vitamin deficiencies, as well as during periods of particular stress when vitamin requirements are increased, such as the breeding season, moulting, transport, exhibitions, changes in climate, changes in diet and other physical stresses.

Feeding recommendation per animal and day:

Parakeets, canaries:	2 sprays
Cockatiels, large parakeets:	3 sprays
Amazon parrots, grey parrots, cockatoos:	4 sprays
Macaws:	5 sprays

Spray the mixture over the feed.

Do not exceed the recommended feeding amount. Vitamin D_2 must not be administered at the same time.

Composition: Glucose, 1,2-propanediol, sodium citrate, potassium chloride

Ingredients: Crude protein 0.01%, crude fat 3.10%, crude fibre 0.00%, crude ash 0.80%, moisture 87.90%

Additives per litre: | Nutritional additives:
Vitamin B_2 (3a826i) 1,500.00 mg, Vitamin B_{12} (3a835) 1,800.00 mcg, Vitamin E (3a700) 5,000.00 mg, Vitamin A (3a672b) 7,500,000.00 IU, Vitamin D_3 (3a671) 18,000.00 IU, Vitamin K_3 (3a710) 70.00 mg, Biotin (3a880) 25,000.00 mcg, Folic acid (3a316) 800.00 mg, vitamin B_1 (3a820) 600.00 mg, vitamin B_6 (3a831) 800.00 mg, niacinamide (3a315) 4,000.00 mg, calcium D-pantothenate (3a841) 3,000.00 mg

Technological additives: Sodium ascorbate (1b301) 16,800.00 mg

BIRD V12

Retail sizes:

4 027565 410514 Art.-No. 410514 **25 ml**

Complementary feed
Feeding recommendation per animal and day:

Ornamental and songbirds:	5 drops
Large parakeets and parrots:	10 drops

Add to the feed or drinking water. Do not exceed the recommended feeding amount.

Composition: Soybean oil, sucrose, sodium citrate

Ingredients: Moisture 54.00%, crude protein 0.01%, crude fibre 0.95%, crude fat 37.15%, crude ash 0.19%

Additives per litre: | Technological additives: Sorbic acid (1k202) 1,050 mg, butylated hydroxyanisole (BHA) (1b320) 240 mg, propyl gallate (E 310) 240 mg

Nutritional additives: Vitamin A (3a672b) 500,000 IU, Vitamin D_3 (3a671) 10,000 IU, Niacinamide (3a315) 4,000 mg, calcium D-pantothenate (3a841) 1,000 mg, vitamin B_2 (3a826i) 1,000 mg, vitamin E (3a700) 1,000 mg, vitamin B_1 (3a820) 600 mg, vitamin B_6 (3a831) 250 mg, vitamin K_3 (3a710) 100 mg, folic acid (3a316) 10.0 mg, vitamin B_{12} (3a835) 1,000 µg

Canina®

PRODUCTS FOR

RODENTS

PETVITAL® VITAL VITAMINS FOR RODENTS

Complementary feed
For the prevention and treatment of vitamin deficiencies, as well as during periods of particular stress when vitamin requirements are increased, such as during transport, exhibitions, changes in climate, changes in diet, and other physical stresses.

Feeding recommendation per animal and day:

Guinea pigs, rabbits and hares:	4 sprays
Hamsters and other small rodents:	3 sprays

Spray the mixture over the feed.

Do not exceed the recommended feeding amount. Vitamin D_2 must not be administered at the same time.

Composition: Glucose, 1,2-propanediol, sodium citrate, potassium chloride

Ingredients: Crude protein 0.01%, crude fat 3.10%, crude fibre 0.00%, crude ash 0.80%, moisture 87.90%

VITAMINS AND THEIR PHYSIOLOGICAL IMPORTANCE

Vitamin A
Vitamin A plays a decisive role in the formation and regeneration of skin and mucous membranes. It helps to increase the body's resistance to infectious diseases. Vitamin A is therefore of crucial importance for health, growth and fertility.

Vitamin D_3
Vitamin D_3 regulates the absorption of calcium and phosphorus from the intestine, the storage of calcium and phosphorus in the skeleton and the impervement of the calcium and phosphorus exchange rate in the skeleton.

Vitamin E
Vitamin E is extremely important for controlling carbohydrate metabolism, especially muscle metabolism and glycogen balance. In connection with this, vitamin E is also involved in the regulation of hormone metabolism. An insufficient supply of vitamin E leads to the degeneration of heart and skeletal muscles, movement disorders and other animal diseases, some of which are species-specific.

Vitamin C
Vitamin C is essential for the formation and maintenance of connective tissue, bones, cartilage and dentin. An adequate supply of vitamin C increases the body's resistance to infection.

Vitamin B_1
This vitamin is essential for the transmission of nerve impulses, i.e. withoutB1, no impulse exchange between muscle and nerve is possible. Growth depression, nervous system disorders, loss of appetite and inadequate energy utilization can only be prevented with an adequate supply of vitamin B_1.

Vitamin B_2
Vitamin B_2 plays an important role in carbohydrate, fat and pertein metabolism. An optimal supply of vitamin B_2 prevents growth retardation, poor feed conversion and digestive diseases.

Vitamin B_6
Vitamin B_6 plays a central role in pertein metabolism. A vitamin B6 deficiency results in growth retardation, skin inflammation and poor hatching and throwing results.

Vitamin B_{12}
Vitamin B_{12} is essential for blood formation, growth and numerous other metabolic percesses. It is also directly involved in the formation of various amino acids, which is why vitamin B_{12} can replace or save animal pertein in favor of plant pertein.

Vitamin K
Vitamin K is responsible for the regulation and maintenance of normal perthrombin formation. An inadequate supply of vitamin K leads to disorders in blood clotting, so that even minor injuries or irritation of the intestinal mucosa, for example, can lead to more severe bleeding by perlonging the blood clotting time.

Nicotinic acid
If the animal's nicotinic acid requirements are not adequately met, skin changes, gastrointestinal disorders, growth retardation and inflammation of the mucous membranes can occur.

Pantothenic acid
This vitamin is of particular importance for the formation and breakdown of fats. Pantothenic acid is also essential for the normal function of the skin and mucous membranes. An optimal supply of pantothenic acid prevents diseases of the skin and mucous membranes, disorders of the digestive tract and respiratory organs as well as growth and reproductive disorders.

Folic acid
Folic acid is involved in pertein metabolism and in particular in the formation of cell nuclei. Alongside vitamin C and vitamin B12, it also plays a significant role in the production of red blood cells and blood pigment.

COMPANY PORTRAIT

Today, **Canina®** can look back on 40 years of company history. The company was founded in 1984 by the industrial clerk and then managing director Ingrid Spanke in Hamm.

By 1986, Mrs Spanke was no longer able to manage the business on her own and her husband, Manfred Spanke, joined the company to handle sales. At the time, **Canina®** was the very first company whose supplementary feed products were available through pharmacies. Demand then skyrocketed, so that by early 1989 a storage and packing room had to be rented and the first employee was hired.

At the end of 1989, the sole proprietorship '**Canina®**' was renamed '**Canina®** pharma GmbH'. In the same year, the company established its first foreign distribution partners in Austria (**Canina®** Austria) and in Eastern Europe. As the company's presence in pet shops, at trade fairs and exhibitions grew, so too did brand awareness and the need for additional staff in both the office and field sales teams.

Having met the relevant requirements, the state government of North Rhine-Westphalia granted **Canina®** a manufacturing licence at the beginning of 1992. Later that same year, the building that now serves as the company's headquarters was leased and subsequently purchased in 2004, and a subsidiary named "**Canina®** pharma GmbH & Co. KG" was founded, which dealt specifically with the distribution of veterinary medicines (exclusively to vets and pharmacies). A vet was appointed to be responsible for product development, product advice, and staff and customer training both at home and abroad. Under the brand name 'Original Canidos®', a product line exclusively for veterinary practices was launched in 1999. The contract for exclusive nationwide distribution was awarded to the company 'Heiland Vet.', now 'Henry Schein Vet.', based in Hamburg.

Canina® has been a recognized training company since 2001.

Canina® pharma GmbH places great emphasis on excellent product quality and high customer satisfaction. In 2018, the company was awarded the GERMAN BUSINESS AWARD, received the 'Hammer Betrieb' seal of approval, and in 2021 was certified in accordance with the EU Guidelines on Good Distribution Practice (GDP).

In addition to animal welfare, **Canina®** is also committed to acting responsibly and reducing its environmental impact. In 2001, **Canina®** received the "ÖKOPROFIT-Betrieb Hamm" award and in 2020, the ÖKO certificate. Thanks to the "ÖKO-logical PROject for Integrated Environmental Technology", practical measures to reduce environmental impact were developed and successfully implemented.

High quality standards and sustainable production are firmly anchored in the company's objectives. **Canina®** pharma GmbH plans to achieve Coatther certifications in accordance with internationally recognized quality standards in the coming years and to make its packaging materials more environmentally friendly. To this end, the growing family business now has its own quality management department.

The company's aim is to be the perblem solver throughout the animal's life. Canina also wants to get involved and do good. It supports animal welfare organizations and donated over 400 kg of supplementary feed and care products for animals in emergency situations in 2019 alone.

A new building was completed in January 2008, increasing the office, warehouse and production space by a total of around 1,500 m². The company premises still available allowed for a Coatther expansion of a good 1,000 m², which began in 2015 and was completed in February 2016.

The succession of the family business is assured. Son Tim Spanke, who studied business law, took over the management of the company in May 2009.

Canina® has continued to evolve to this day, and now has over 50 employees ensuring that its product range, comprising more than 240 items, is available in nearly 3,000 German pet shops, veterinary clinics, dog grooming salons and in a further 50 or so countries around the world. Across almost all of Europe, as well as in China, Singapore, Korea, Saudi Arabia and the United Arab Emirates, **Canina®** products can be found on the shelves of specialist retailers. Furthermore, **Canina®** manufactures its products for numerous well-known domestic and international companies under their own labels.

The following trademarks are registered for **Canina®** worldwide: **Canina®**, ***PETVITAL®, CANIDOS®, CADOC®, CAPH®, CAPHA®, EQUOLYT® und MESOFLEX®***

Canina®

- Core healthy supplements
- Highly effective products
- Useful care & hygiene products
- Vermin control products
